Alfalfa Seed is Short; Big Crop of Sudan Grass

Increased Sudan Acreage Brings Four Times Last Year's—Weather Conditions Unfavorable.

Washington.—Reports received by the department of agriculture indicate the alfalfa seed crop may be slightly smaller than last year, but the sudan grass seed crop about four times as large, or around 60,000,000 pounds, perhaps the largest on record. Growers say the big production is due mostly to increased acreage, because of high prices received for the 1934 crop, as the yield is indicated to be no larger than in the past.

It was too dry for proper development of sudan grass plants during July and August in parts of some states, particularly Oklahoma, Kansas and Nebraska, but even in those states the drouth was not so severe as last year. Spring and early summer rains delayed planting in several sections and fear was expressed that some plantings would not mature seed before killing frosts occurred.

Altho the retail sales of sudan grass seed the past spring were 19 percent smaller than in the spring of 1934 and imports the largest on record, there was practically no carry-over except of imported seed. The fiscal year ended June 30, saw 10,896,600 pounds imported, compared with 102,700 pounds the year before.

Altho the alfalfa acreage is indicated to be somewhat larger than last year, seed did not see set so well, production is estimated at from 45,000,000 to 50,000,000 pounds compared with 50,000,000 pounds last year, 61,000,000 pounds in 1933, 36,000,000 pounds for the five year (1927-31) average.

Grasshoppers probably did more damage to the crop this year than last. However less injury from winter killing was reported, and more acreage was available for seed because supplies of hay and pasture were ample this year.

Weather conditions at harvest time were not generally favorable. Frequent rains fell in many sections when the crop was ready to cut or after it was in the shock. The quality of the seed is not expected to be so good as last year, but may average good to fair. The average yield expected by the 213 growers who reported is 155 pounds compared with 175 last year.

CASE GOES TO HIGH COURT
Jefferson City.—The state supreme court was asked to restrain an order that Mrs. Nellie Tipton Muench's "gift of God" baby be produced in court.

The application for a writ of prohibition was filed by counsel for Mrs. Muench, recently acquitted of charges of participation in the kidnaping of Dr. I. D. Kelley, St. Louis physician.

The St. Louis appeals court issued the order to bring the child into court after a hearing on a writ of habeas corpus sought by Anna Ware, 19, unwed servant girl, in an attempt to recover a baby son which she said was born to her last Aug. 17. Miss Ware contends Mrs. Muench has her baby.

FARMERS' SALES IMPROVED
Washington.—The agriculture department reported sale of 636 millions worth of farm products in September, an increase of 89 million dollars over the August figure and 13 millions more than in September, 1934.

AAA benefit payments during September totaled 56 million dollars as against 45 million dollars in August and 76 million dollars in September a year ago. The department said the figures showed sales improvement was better than usual. It estimated total cash farm income from marketing in rental and benefit payments would amount to 6.8 billions in 1935 as compared with \$6,387,000,000 in 1934.

HINT A NEW NAZI PURGE
Berlin.—The shadow of a new nazi party purge hung over Germany. In speeches Sunday, three men high in the party's councils declared that nothing would be allowed to slow up the nation's rearmament program. The most outspoken warning that punishment awaited all who directly or indirectly sabotaged that program came from Gen. Hermann Wilhelm Goering, premier of Prussia and minister of air, in a speech before a nazi meeting at Breslau.

"We are working night and day, in three shifts," he said, "until we can be sure nobody can attack us. Reichsfuehrer Adolf Hitler has saved Germany from the fate of becoming a second Ethiopia. We have had ample opportunity to see what it means to be defenseless in the face of other countries which are armed to the teeth.

"In accordance with der fuehrer's will we shall now deal with those who break discipline by starting individual action thru private grudge or overzealousness. Those who do not observe the pace set by der fuehrer shall be eliminated."

Goering also indicated the nazi party aims at further centralization of power by elimination of state governments.

BOY AND FATHER BURNED
Omaha.—George Smith, 5, son of Seldon Smith of Omaha, was burned seriously and his father was burned painfully in a freak accident involving a paint brush and a can of gasoline. The boy suffered first and second degree burns over the body and is confined to a hospital. His father was treated for first degree burns on the left forearm and second degree burns on the right arm.

George was sprayed with burning gasoline as his father attempted to throw away a small can of the fluid that had exploded as he was using it to clean a paint brush. Police said Mr. Smith apparently was swishing the brush back and forth in the can of gasoline and that friction caused it to ignite. The accident occurred at the Smith home.

ELEVATOR MAN RE-ELECTED
Omaha.—Oscar Heline, of Marcus, Ia., was re-elected president of the National Farmers Elevator association at the closing session of its convention here on Tuesday.

Paul E. Peeler of Elk City, Okl., was re-elected vice president and Frank Rutherford of Omaha, was re-elected secretary-treasurer. The president and secretary of each state association comprise the national board of directors.

Plans were made for a semi-annual meeting here during the latter part of May, 1936. Officials of the association reported "progress" in an effort to merge the Farmers National Grain Dealers association with the National Farmers Elevator group, but said no definite decision was reached.

Plate supper and program, to be given at District 37, Taylor school, Wednesday evening, Nov. 6, 8 p. m. Norma Baumgart, teacher.
