'Wimpy Inn' is a Place of Beauty Since Remodeled

Newly Remodeled Building Makes One of Most Attractive Places to Be Found in City.

Wednesday evening the newly remodeled and rearranged Wimpy Inn on Chicago avenue opened its doors to give the public one of the most attractive lunch rooms and taverns in this section of the state.

The building has been greatly enlarged and reconstructed into a semi-Spanish type building as far as the exterior is concerned and which in the gray stucco and red trimmings makes a striking picture to the passerby and which lures them into the even more delightful interior.

The interior is bright and gay in tones of red and white which are borne out in the colorings of the booths, these tones of color being very cleverly blended. The large counter and serving bar at the east of the building is also finished in red and the stools also in red, are provided with red leather seats. The back of the counter is in the pure white serving counters and cupboards which make it very convenient to handle the trade. The floor of the room is of composition stone in a gray tone and effectively sets off the brighter settings of the room. New rest rooms also have been arranged to the north of the main room to add to the comfort of the guests.

The carpenter work has been under the direction of the Tiekotter brothers and their force, while a great deal of the decorative work on the interior has been looked after by Mr. and Mrs. Carl Christwiser, the owners of the inn.
