Looks Over NYA Work in Plattsburgh

Miss Marion Guggenheim of Lincoln, Supervisor National Youth Administration, Visits City.

Miss Marion Guggenheim of Lincoln, a supervisor of the National Youth Administration, was in the city Tuesday to spend a few hours looking over the work that has been carried out under this department of the government for the aid of the unemployed youth.

The work locally has been in charge of Superintendent L. S. Devoe and has been very helpful to a large group of the boys of the community as well as serving as a great help to civic beautification and improving.

There were a number of the boys engaged in cleaning up vacant lots and tracts owned by the city, making them more presentable and less of an eye sore to the community, while many have been engaged in work around the school buildings as well as along the streets of the city.

One of the plans that it is hoped later to have definitely worked out is a series of playgrounds and recreational spots in various parts of the city that will afford a safe and attractive spot for the younger children to play and have enjoyment, having these playgrounds supervised by the NYA and its workers.

The NYA has been very successful in this city and which was most pleasing to Miss Guggenheim who is visiting the various places over the state where this phase of the administration relief work is being carried out.

EDWARD MURPHY INJURED

Edward Murphy, 53, of 1612 E street, Lincoln, state liquor inspector, former resident of near Manley, suffered possibly serious injuries Tuesday morning when the car he was driving collided in Lincoln with a truck and overturned. Taken to St. Elizabeth hospital in an ambulance, he was attended by Dr. George E. Lewis, who said he suffered an injury to the cervical vertebrae, crushing chest injuries and bruises on his left hand and leg.

According to police report, the truck, driven by Wendell Woods, 1605 K, was traveling south on 10th and Murphy was driving west on L. They collided in the middle of the intersection and Murphy's car upset on its side.

Dr. Lewis said the injury to the vertebrae was at the same spot Murphy suffered an injury several years ago and because of that it "may develop into a serious condition."

NEW ROSE GEM PETUNIA IDEAL FOR WINDOW BOX

The big family of petunias seems to be getting bigger, and of better quality. This year there were several notable additions, and if one were to grow all of the best types and colors in one garden it would have to be a large one indeed.

This continuous influx of new members can only be regarded as a tribute to the vitality of the flower, and its adaptability to almost every condition. Today we can find a petunia to grow anywhere, and of a color to harmonize with any other

flower or surrounding.

Rose Gem, an Award of Merit winner for 1936, selected by the All-America committee, brings new glory to the petunia family. It is a bright rose color which even the strongest sun will not fade. It has a very compact growth of a bally habit during its blooming period. This characteristic, along with its small stature, only 6 to 8 inches, make it an ideal border plant, or window box subject.

Like most petunias, it is easily grown, and may be sown out in the open, or started indoors in flats for early bloom and to lengthen the season for them. Because of its com-

act growth, it should be an excellent pot plant for the open window or sill, and it would not be difficult to pot a few plants if you start them indoors, putting the bulk of them in the garden.

In the window box, Rose Gem harmonizes well with a balcony strain of deep blue, the latter to trail over the side and the pink for a center, with a row of sweet alyssum for a white border. These three hardy annuals will stand almost any amount of sun or bad ether, and will provide a sheet of color throughout the summer.

EXHUMED BODY EXAMINED

Los Angeles.—A small wound similar to a snake bite was found on the exhumed body of Mrs. Mary Bush James, fifth wife of Robert S. James, accused by the district attorney's office of killing her last Aug. 3 in a fantastic plot involving rattlesnakes and drowning.

"The finding of the puncture explains the reason for the rapid swelling and the black condition of her left leg," said Coroner Frank Nance. "The condition is characteristic of snake bites."

"See it before you buy it."
