# NYA Program in Nebraska is Given in Detail

Information as to Scope of This Valuable Aid to Young People of Nebraska Through WPA.

Part-time employment for 7,600 young people between the ages of 16 to 25 was provided in Nebraska by the NYA through its Works Projects and Student Aid programs during the period from Sept. 1935 to July 1, 1936. For those youths who had either finished school or for whom additional schooling was impractical, the work projects were set up. For the young people, whose interest and effort justified continuance of their education, the Student Aid program was established. For both of these groups and many other young people a program stimulating interest in vocational guidance was provided.

### Student Aid.

One phase of the NYA program, operating from Sept. 1935 to July 1, 1936, was that of Student Aid, which made it possible for 5,823 students to continue their education who probably would otherwise have been unable to do so because of lack of funds. Their eligibility was based on their financial need and most of the high school students came from relief families. The money was provided for paying such expenses directly connected with school attendance as lunches, transportation and other essentials. The projects on which the young people in the three divisions of the Student Aid program worked were of a socially desirable nature and were provided and supervised by local school officials.

### School Aid.

The School Aid division of the Student Aid program provided nearly 25 years of age with part-time employment for which they received a maximum of six dollars per month. A total of 4,010 secondary school students participated during part or the entire time of the program in the 93 counties of the state. They were employed at various tasks in and about the schools.

### College Aid.

The College Aid division of the Student Aid program gave 1,807 students in the 23 colleges and universities in the state an opportunity to earn from an average of \$15 to a maximum of \$20 monthly. Their work consisted of part-time employment on the campus and in the community.

### Graduate Aid.

A total of 29 graduate students, attending the three universities in the state offering advanced degrees, earned an average of \$25 per month under circumstances similar to those of the undergraduate college students.
