

CAR NOT STOLEN

For a few moments Saturday night one of the local residents had the shock of believing his car stolen, but which fortunately turned out to be a false alarm.

It seems that he had returned home from Omaha shortly after 5 o'clock Saturday afternoon and left his car parked on North Sixth street and with the motor running. After looking after some business he had gone on up Main street and spent several hours. He finally decided to go places and coming out

of one of the Sixth street places of business found that there was no car. He was about to sound the alarm for the police when some friends advised him that the car was faithfully pounding away at its parking place on Fifth street.

THE VALUE OF CREAM
IN DOLLARS AND CENTS

IS DETERMINED BY
Purity, Freshness, and Butterfat Testing 40 to 45%

- The separator will separate 40% to 45% Cream as efficiently as a lower testing Cream.
- Cream testing 40% to 45% does not sour as quickly as lower testing cream and leaves more skim milk for pigs and chickens.
- One hundred pounds of skim milk is equal to one half bushel of shelled corn, or one full bushel of ear corn, in feed value.

Rich Cream means Smaller Bulk, therefore it is more easily cared for and more thoroughly cooled. Separate 40% - 45% Cream.
