## TIGHT FITS between engine parts

## That's why mere "fast-flowing" oils get beat by WINTER OIL-PLATING

How hard is it for any known oil to squirm in amongst scores of close-fitting engine parts? It's hard. Hence all Winter oil ads rightly tell you that even a worn, loosened-up engine needs extra fast oil-flow this season.

Free-flowing Conoco Germ Processed oil holds records for speedy flow in any cold. And yet Conoco asks you earnestly: WHY BE SATISFIED WITH ANY FREE-FLOW ALONE, WHEN YOU CAN JUST AS EASILY HAVE THE RE-DOUBLED INSURANCE OF AN OIL-PLATED ENGINE?

Only an OIL-PLATED engine is lubricated for every cold start in advance—whole hours and days before any mere free-flowing oil can do one single wiggle!

Germ Process action on every working part creates OIL-PLATING. It becomes a part of all surfaces. It cannot drain down. It stays up without interruption, forever ready to speed your starter and preserve your engine every-inch of the way this Winter.

Oil level stays up, too, once your Conoco Mileage Merchant puts in your correct Winter grade of Germ Processed oil.

"I am a local independent merchant. My living depends on you people right here. I want you coming to my place steady. I want to be able to look you in the eye. That's why I've got Conoco Products and Service for you. You'll get mileage that tells you I've got a right to be called 'Your Mileage Merchant.'"
