

J. B. Elliott, Jr. Files for Office of Lieut. Governor

Also Implement Dealer and Farmer
to Contest at Polls With Car-
penter and Johnson

LINCOLN, Oct. 6 (UP)—John B. Elliott, Jr., 41-year-old Alvo implement dealer and farmer, today entered the general election race as an independent candidate for lieutenant governor.

He personally filed petitions containing 1,376 names which were accepted by the secretary of state. Only 1,000 signatures are required. Elliott will compete against Terry Carpenter, Scottsbluff, democratic nominee and William Edward Johnson of Schuyler, republican candidate.

In a statement Elliott sharply attacked Carpenter's candidacy without referring to him by name.

"The people of the state have been disillusioned, and now see that it is necessary to eliminate the '10-day politicians' who jump from one party to another riding on the coat-tails of the leaders, blowing their tin horns, radiant in the reflected glory

but having no power to generate energy by his own efforts.

"As to the old age pension, I am more than willing to do all I can for the deserving old. I do not see why any particular candidate for lieutenant governor should make such a ballyhoo over this one issue merely to encourage votes, as we all have relatives and friends who are old, and he has no monopoly on this subject."

TO MAKE SURVEY OF PROPOSED WPA SEWER

Adequate plans of an enlarged Chicago avenue storm sewer upon which to make WPA application in the near future, were ordered prepared by the council at its meeting a week ago Monday.

Last Sunday the council members met with Joe Reynolds, Omaha engineer, spending most of the forenoon going over the ground, and authorizing the preparation of plans and specifications.

The closed storm sewer will have a carrying area of more than 20 square feet, being continued this size from the Louisville road intersection to connect with the large sewer on Pearl street. It will be built of native rock, arched over the top and provided with sufficient inlets all along the length of Chicago avenue to get surface water underneath the ground before it reaches the business section.

The sewer will follow the present open ditch that is threatening to undermine Chicago avenue paving from Holdrege street to Gold street, and from that point may either run down the street under the paving if decision is finally reached to repave that thoroughfare, or in the parking along the east side of the street if it is not repaved.

The present sewer that crosses to the west side of Chicago avenue at Rock street will not be disturbed in either event. Numerous sanitary sewers feed into it and the cost of tearing it out to replace it with a larger one would be greater than to leave it intact and build new down the center or along the east side of the avenue.

Engineer Reynolds has promised to have the plans ready within a week or ten days.
