Did Own Air Conditioning

Ross Shields has a business which appeals to the outdoor man in the winter time, for inside the cleaning establishment is cozy and warm, but as the seasons change and summer comes the atmosphere retains humidity and as well the high temperature and at the work table the air becomes stifling, and it becomes so not that something has to be done. To air condition a building of that size takes an outlay of much money or an equal amount of real thinking. While Ross did not have the ready money he had to fall back on his thinking, and as a result contrived a device which cools and conditions the air in the room. We were agreeably surprised when we entered the establishment to find how the little machine had ameliorated the atmosphere, making it indeed comfortable during the hottest days.

How Women in Their 40's Can Attract Men

Here's good advice for a woman during her change (usually from 35 to 42), who fears she'll lose her appeal to men, who worries about hot flashes, loss of pep, dizzy spells, upset nerves and moody spells. Just get more fresh air, 8 hrs. sleep and if you need a reliable "WOMAN'S" tonic take Lydia E. Pinkham's Vegetable Compound, made especially for women. It helps Nature build up physical resistance, thus helps give more vivacity to enjoy life and assist calms the jittery nerves and those disturbing symptoms that often accompany change of life. Pinkham's is WELL WORTH trying.

HELP STOMACH DIGEST FOOD
Without Laxatives—and You'll Eat Everything from Soup to Nuts
The stomach should digest two pounds of food daily. When you eat heavy, greasy, oily or rich foods or when you are nervous, hurried or have poorly-digested stomach, you get too much food. Your food doesn't digest and you have gas, heartburn, nausea, pain or sour stomach. You feel sour, sick and upset all over. Doctors say never take a laxative for constipation. It is dangerous and foolish. It takes those little black tablets called Bell's and for indigestion to make the stomach digest food. Bell's relieves distress in 15 to 30 minutes and you feel better. Bell's is so quick it is amazing and one 25c package proves it. Ask for Bell's for indigestion.

Henry says that the corn was planted with male seed occupying one row and female seed two rows, which would put a male row next to each female row, and when it comes time for the corn to tassle the female rows are de-tassled which prevents any pollen from falling from the female rows and thus the corn is supplied with only male pollen. He tells of the study being very interesting.

Has Unpleasant Experience.

The Wright sisters' mother has been very poorly at the home south of Union on the farm, and a few days ago Miss Maymie Wright, wishing some cherries, went to the garden where the cherries were, to gather some, and seeing a tree laden with the luscious fruit, skinned up the tree with the agility of a thirteen year old school boy and soon had a kettle well filled with cherries and returned to the house, and telling the nurse that she had been bit or stung by some bug or insect and exhibited a place on her side which when examined was pronounced as a snake bite by the nurse and further examination disclosed another bite on one of her legs. The wounds were treated by the nurse and an investigation was made which showed the offender a black-snake entwined around a limb of the tree, which was immediately dispatched. Then their family physician at Nebraska City was called up and consulted, who when he was advised of the treatment the nurse had given said that he thought that was sufficient and that no real harm would come from the bites. Miss Wright seems to be getting along very nicely.
