**Changes To Be Made In RFD No. 2**

Persons in West Part of City and Mercerville to Benefit By Change in Rural Mail Route.

In accordance with instructions received from the division of rural mails, second assistant postmaster general, post office department, R. F. D. 2 at the Plattsmouth post office will be changed, effective August 16, 1939, in the following manner:

The carrier will follow the present route until he reaches the north center point of section 24. At this point he will turn north and follow Maiden Lane north to the cemetery road (or Oak street or Avenue B). When he reaches Avenue B he will turn west and follow what is locally known as the Cedar Creek road to Sulser's corner. At Sulser's corner he will turn south and travel to the north center point of section 23. From that point he will continue to the present route. This change will permit patrons living in the west part of Plattsmouth and in the vicinity of Mercerville to receive their mail by rural delivery.

The second change in R. F. D. No. 2 occurs approximately five miles west and one mile south of Mynard. Under the present routing the carrier turns north at the southeast corner of section 35 and proceeds north a distance of three miles. Under the new routing the carrier will go one mile farther east from the southeast corner of section 35 to the southeast corner of section 36 and then proceed three miles north to the northeast corner of section 24 where he again rejoins the present route. This change will eliminate three miles of a present retraced and afford closer delivery to eight patrons who are at present a considerable distance from the route.

**Federal Report Scores Billboards on Highways**

WASHINGTON (UP)—The bureau of public roads, in its report recommending a nation wide national defense highway system, took a crack at the billboards and roadside stands, labeling them "positive menaces" to driving safety which "must be controlled."

"The mere presence of these numerous, close-crowding objects and establishments is a distraction to drivers of vehicles," the bureau said. "Some of them, by every conceivable device, endeavor to attract the attention of drivers of vehicles from their primary responsibility; most of them contribute largely to the hazards of unexpected stopping, turning, and emergence upon the highways of both vehicles and pedestrians."

"All are positive menaces and must be controlled, and the only probability of material improvement lies in a general and substantial widening of the rights-of-way of the more important roads, together with effective border control."
