The above illustration is photographed direct from our No. 4 Dr. Horne's New Improved, Best and Most Powerful \$20 Electric Belt, (Suspensory Attachment for male removed). This belt has a battery consisting of 49 to 53 cells, according to the waist measure of the person wearing it, each one of which is a battery in itself, and six large discs or electrodes which conduct the electric current into the body. The webbing and material used in the manufacture of this belt are of the best. The battery is the finest most durable, most expensive and most powerful made, and we challenge the combined efforts of all other Electric Belt companies to produce its equal at any price. It is the only appliance used and prescribed by physicians.
