

Agricultural.

WINTER SHELTER FOR SHEEP.—Have our friends provided winter shelter for their sheep? or are they—many of them—neglecting it as usual, as usual, not having the best of luck with their sheep. Depend upon it that the cold in addition to wet, is hurtful. You will see it more especially in the spring. Shelter is feed saved, strength kept, which would otherwise be lost; and wool improved by the good condition of the sheep, to say nothing about one of the most important points of all—the lambs which are to follow. A suffering sheep will produce a weak lamb. Among weak lambs there is always mortality, and a stunted growth in the future body of the sheep. A weak, sickly lamb, will not make a first-class sheep, even under good treatment.—Good treatment of sheep is profit all round—and shelter is one of the important points to be attended to. Build it and invite the sheep in it, feed them there; let their salt be there, and the little tibias they need. Now is a good time to see to this thing—to prepare for it.

RAISING TREES ON THE PRAIRIES.—A correspondent of the New York Tribune says: "When it snows or blows on the prairie it is bitter cold. For miles there is no shelter. Barns are few, shelter for cattle are fewer. Stables are made of straw. They want trees. Trees will grow well. In seven years, Dunlap, at Champaign, has raised a nice little forest of silver leaf maples. Many of them are 25 feet high. Phoenix says if he were going to commence life again, he would plant pines for saw logs. Indeed he has commenced a pine forest of several acres. Let one look at Samuel Edward's evergreens, and he will see how they grow. Mr. Galusha also is successful; so is every one who plants and properly cultivates. Walnut trees grow finely, as do most trees. Farmers should plant trees. If there were no other way should get up at midnight to do so."

HOW TO TAKE UP TREES.—One of the speakers, at a recent meeting of agriculturists in New Haven, Conn., gave the following sensible directions for taking up trees for nurseries. He said: "An enormous amount of money is annually lost to tree purchasers from rude and unskillful taking up. Trees are torn up by the roots, as if the trunk and branches were the one thing necessary, and the roots superfluous.—The proper way is to open a trench on each side of the tree with a common spade, keeping the edge toward the tree so as not to cross a root. These trenches should be far enough from the tree to avoid the main roots, and deep enough to go below all except the tap root, which may be cut off. This being done, the tree may be pulled up with its roots entire."

RABBITS IN ORCHARDS.—I believe I have found out a protection for my fruit trees from rabbits, the great destroyers in winter. One year ago last winter there were left in my orchard some twenty shocks of corn not husked. The rabbits that winter destroyed many orchards near me, but not a tree of mine was injured by them. Last year I planted my orchard in potatoes and beans; late in the fall I had set out near the margin of the orchard, about twelve rods apart, shocks of corn, and not a tree was injured, so I concluded that all that is necessary is to feed the rabbits, and feed them is the surest protection.

YELLOW AND WHITE CORN.—At a meeting of the Little Falls (N. Y.) Farmers' Club, the discussion turned upon the comparative sweetness and nutrition of the different varieties of corn. Dr. Isham said yellow meal, when old, was apt to have a bitter taste. Yellow corn contained more oil than white, and when the meal was kept some time, the abundance of oil had a tendency to become rancid—hence the bitter taste of the meal.

WARTS ON CATTLE.—A subscriber says that his cow has warts upon her bag and teats "long and slender," and asks how he can cure them. The warts can be readily removed with caustic, lunar or potash. Five cents worth of either lunar caustic, or caustic of potash, will suffice. Keep the caustic in a vial; take a stick of it, wet the end with water or sputle, and rub it on the warts. Two or three applications will suffice. Be very careful with the caustic of potash or it will eat too deep and make a sore.—N. H. Farmer.

Plant warts and pears in autumn, but leave stone fruit until spring.

Coal oil is found to be a suppurating wound what water is to an inflamed—it dispels flies and vermin, sweetens the wound, and promotes healthy granulation.

STATEMENT OF THE FIRE AND TORNADO Insurance Company, OF FREEPORT, ILLINOIS.

We, Thomas J. Turner, President, and D. W. C. Tanner, Secretary, of the Fire and Tornado Insurance Company, of Freeport, Illinois, hereby certify that said Company is possessed of a capital of at least one hundred thousand dollars, secured by lien on real estate worth at least five times the amount of said capital, and not encumbered to more than one-fourth of said cash valuation.

CERTIFICATE OF AUTHORITY.

To expire on the 31st of January, 1866. Insurance Department, Office of the Auditor, Chicago, Nebraska, Oct. 17th, 1865. WHEREAS, J. T. Campbell, Esq., Assistant General Agent for the Fire and Tornado Insurance Company, located at Freeport, in the State of Illinois, has filed in this office a certified copy of "the Act of Incorporation of said Company, together with a written instrument under the seal of said Company under oath, certifying that said Company is possessed of a capital of at least one hundred thousand dollars, secured by lien on real estate worth at least five times the amount of said capital, and not encumbered to more than one-fourth of said cash valuation," in accordance with the requirements of the Fourteenth section of a law of the Territory of Nebraska, entitled "An Act in relation to Insurance Companies," approved February 15th, 1864.

F. M. Dorrington, Agt., PLATTSMOUTH, NEB.

THE NEBRASKA FLUID EXTRACT

At the Cape of Good Hope

BUCHU.

THE HOTTENTOTS

Have long used

For a variety of Diseases.

It was borrowed from their early practitioners in the East Indies, and was introduced into Europe and has since come into general use.

It is given chiefly in Gravel, Chronic Rheumatism, the Stomach, Mucous Discharges, the Urinary Organs, for Female Weakness and

DEBILITY.

For Peppermint and Eucalyptus, Broom of Peppermint, Broom of Eucalyptus, and all diseases requiring a stimulant of the system, and a dose of half a pint is given in the above cases.

It is also recommended in cases of

Dyspepsia, Chronic Rheumatism,

Obstinate Affections and Diseases.

To cure these diseases we use the following: To cure these diseases, however, an admissible remedy in the most difficult cases, is to be given in the form of a decoction. To prevent these diseases, a dose of half a pint is given in the above cases.

Our Flesh and Blood

are supported from this source

PERSON AT EVERY PERIOD OF LIFE

From Infancy to Old Age.

In every state of health, we find it to be a most valuable and safe remedy.

The Cause in many instances is unknown.

The patient has, however, an admissible remedy in the most difficult cases, is to be given in the form of a decoction.

Philadelphia Evening Bulletin, Editorial, Sept. 15, 1865.

HELMBOLD'S GENUINE PREPARATIONS.

His Solid and Fluid Extracts embody the full strength of the ingredients of which they are composed. They are left to the inspection of all, and a most conclusive test of their properties will be found in the fact that those who use them in the most difficult cases, are cured.

These remedies are prepared by H. T. Helmbold, a druggist of sixteen years' experience in the city, and we believe them to be genuine; in fact, we have never known an article lacking merit to be sold with a permanent success, and Mr. Helmbold's case is certainly prima facie evidence. His Drug Chemical Warehouse, in the city of New York, is not excelled, if equaled, by any in the country, and we would advise our readers, when visiting that city, to give him a call, and judge for themselves.

Alive & Stirring.
