Farmers Improve Your Stock,

We were the first to introduce this very worthy variety of swine into this country—have tested them thoroughly and we are emvinced they are by far the most valuable breed for the farmers of this country for the following reasons:

Early maturity, quiet disposition, good breeders, good mothers, and the very best breed in the world to cross with the large coarse breeds, giving them beauty of form, improving their fattening qualities, and greatly improving the quality of the hims, which are not excelled by any other breed. Their color is black, the skin is perfectly smooth, and very thin and white—hence they have no scurf or skin disease which white hogs are sure to get in a black soil country, and they are not subject to cholera in common with other swine. They are the largest of the small breeds, making from three to four hundred its in one year—sometimes reach 600 or 700 pounds and can be fatted at any age.

We have now a very choice lot of bigs from six different importations, and are prepared to mate pigs properly for breeding, and warrant every pig pure Essex or no sale.
