

HON. A. L. WIGTON, Editor of the Hastings Journal was nominated state Senator from that county.

CHAS. YATES, Supt. Telegraph, B. & M. R. E., paid us a visit Sunday. Charley looks well and feels natural yet in Plattsmouth.

We think the Democratic convention treated our friend Gov. Todd very shabbily, and we believe they have not put us on a man on their ticket.

The Omaha Herald is really quite worried about the influence of the B. & M. over Valentine and Nance. Don't worry friend, you've had your "indings" for a long time. Let some one else take the bat awhile.

THERE was Republican speaking last week at Greenwood and Louisville, and early this week at Glendale and South Bend. The boys are up and in earnest; work has commenced. Let it not cease until victory perches on our banner.

From the Kalamazoo, Mich., Daily Telegraph we learn of the marriage of Miss Lula Foster, who resided in Plattsmouth for a short time some years ago, to Mr. J. C. Gates of Detroit. We are glad to congratulate our old friend, and wish her all due happiness.

From the Cincinnati Enquirer we learn that Judge Fitzgerald, who has been the guest of our Mr. Fitzgerald, delivered an address of welcome in behalf of the Irish Nationalists of Cincinnati, to Mr. Edward M. O'Mahoney, who has been incarcerated for eleven years in an English prison "for love of Ireland and hatred of oppression," as he says.

THE New York Weekly Times comes to us with a proposition to make a weekly visit to any subscriber from now until Jan. 1st for twenty-five cents, and we advise all our readers who want a straight Republican paper to try it. Bring us in thirty cents, the extra five cents for stamps, writing etc., and we'll send for it for you.

The element of uncertainty is what every gambler delights in. It is the uncertain quality of money that gives Wall St. or any other set of speculators the chance to gamble off the poor man's earnings. What the farmer needs, the business of the country demands is a fixed financial policy of some sort. If the government could have fixed the volume of currency at 400 million dollars long ago, and announced that as the fixed status of affairs, we should already be nearer to final prosperity and success.

If every better and all the world knew just how fast Barnum was doing on Wednesday and just what horses would win the races there would be no betting, no gambling on the races. Just so in monetary affairs, if every citizen knew positively what the financial policy of the government would be, and that it would be sound, capital would flow out, business revive, great enterprises be entered upon and peace and plenty follow. Just such stability and certainty the Republican party proposes to give to the people, if continued in power.

OPENING OF THE CAMPAIGN.

The meeting at Eight Mile Grove on Saturday.

The Republican Central Committee met at Eight Mile on Saturday last as per call. An active and energetic canvass was ordered and time and places of meeting designated, as found elsewhere in this paper.

We hope the speakers and committees will be prompt and have the places of meeting lighted up and ready for business. Work is demanded, the Greenbackers are afoot and horseback all over the County and need to be met and answered at once.

After the Committee meeting the various Candidates, except Mr. Stone who was not present, were called out and made short speeches. We were surprised and pleased with their appearance and ability.

Both Mr. Tefft and Mr. Polk made very good, sound and earnest speeches and we are proud of them as representatives of the people, feeling that we can safely leave our case in their hands.

Mr. E. L. Reed of Weeping Water addressed us too and made, perhaps, the happiest speech of the lot. From his position in local affairs, and the widespread reputation he has for energy and ability, his words have great weight and value.

Many of these steps we have passed through during our infatuation days; all reading persons will recognize each phase up to a certain point. The southern Confederacy's money followed the French Assignat all the way through.

What saved us? Simply and only that our money and bonds were redeemable, it was believed that we could and would some day redeem this money.

Let us see if we are right—Let us see if France learned anything. We have France constantly thrown in our teeth. We have traced the fate of her Assignat, her convertible bonds, her worthless securities, her "staying" qualities, as the horse man says, that give them life and credit.

This is often misquoted by our Greenback friends as an instance of the benefits of an irredeemable issue, an unlimited issue of paper currency. France paid her debt off with it.

She did nothing of the kind. According to Victor Bonnet—good authority—to meet her war expenses she did increase her legal tender paper money issue till it reached 1,800,000,000 francs, but it was kept at par by a coin reserve of 600,000,000 francs (or 33 per cent of coin, a pretty fair banking reserve) and besides it was always redeemable at the law of 1876.

France has profited by her experience in Assignats, her next issue of paper money was made and kept redeemable. Follow France in this if you like but not in her first experiment.

France, a country of wonderful resources, a country whose exports have exceeded her imports—as a rule—by millions of dollars, could pay her debt off or did it by heavy taxation in a few years. We do not argue that we should do this, we do not favor any further contraction, we simply protest against the absurd and desperate theory that an increased issue of paper money would obviate hard times and better the condition of the laboring man.

France, France, do we hear? Which exact date in French history do we want to follow, that of 1796 or that of 1876. France has profited by her experience in Assignats, her next issue of paper money was made and kept redeemable.

Follow France in this if you like but not in her first experiment. France, a country of wonderful resources, a country whose exports have exceeded her imports—as a rule—by millions of dollars, could pay her debt off or did it by heavy taxation in a few years. We do not argue that we should do this, we do not favor any further contraction, we simply protest against the absurd and desperate theory that an increased issue of paper money would obviate hard times and better the condition of the laboring man.

the life of a Nation, (as in this country and France), the only condition under which it is excusable, is at best a curse to the laboring man, the poor man, insuring constantly and all the time to the benefit of the capitalist, the rich man in this, that during the rise in prices the rich man alone can fully take advantage of it, having the capital to purchase. Having purchased in lots, perhaps, lands and merchandise, he sells in quantities to suit to the poor man at the increased rates, thus making money in the sale, and again when the prices come down he buys at his own figures, "bed rock" as it is called, or forecloses his mortgage and again has the poor man at a great disadvantage.

The last thing to go up during inflation is the poor man's wages, and the first to be reduced when hard times comes on is his meagre pittance. Recall the past and see if this is not true. We are on the eve of genuine prosperity, hard earned and secure property. We have waded through Inflation, Gold-ism, Grauger-ism, Bond-ism, and all the evils that too surely follow a great war in any country and any time.

The morning is breaking. The sunrise of a sure, an unfluctuating currency, and safe, constant and reliable employment for the masses is in view. For God's sake let us not take a backward step and plunge again into the uncertainty and night of speculation and hard hazard.
