## Three cows and a DE LAVAL CREAM SEPARATOR will make more money than four cows with gravity setting

Thousands upon thousands of cow owners have already proved this statement; any experienced dairyman will verify it for you. With such a big saving it is hard to understand why any cow owner should try to get along without a De Laval Cream Separator. If you are selling cream or making butter, and have no separator, or else an inferior machine, we know if we could put a De Laval on your place we would be doing you a personal favor. If you haven't a separator don't make the mistake of starting with a "cheap" or inferior machine. When you do buy a separator—sooner or later you surely will be sure to get the best—the De Laval. Remember, you can't make money by trying to save money in the purchase price of a cream separator. A De Laval costs only a little more than the cheapest and will save you twice as much and last five to ten times as long as other separators.
