### Selden, Kansas, Lands

Below we give a brief description of a few of our choice bargains in farms and ranches. All these farms are underlaid with an abundance of sheet water, which is of the best quality, pure, clear and free from alkali. The soil is a rich black loam, as productive as the Nile Valley. We have no hardpan, no rocks nor stumps to harrass the farmer in tilling the soil.

Our climate is healthful. The air is pure, the nights are cool in summer, most of the winters are open and mild, we have more days of sunshine in this section than in any other spot in the United States.

The wheat sown on many of these farms will, if the yield is good, and 1.50 the prespects never looked better, pay for the land.

If in the market for land you can't afford to neglect to investigate the propositions we have to offer. We have resided in this territory for over 7.03 twenty years and when you deal with us you deal with an old reliable firm. Agents will find us on the square and willing to cooperate in helping them Board decided to rent through Miss sell to their clients and will find our commissions and our business methods
