

**Council Ratifies Mandates Given Under Peace Pact**

**Great Britain's Policy in Palestine to Be One of Strict Impartiality, Balfour Tells Council.**

London, July 25.—(By A. P.)—The mandates created under the peace treaties were given the final seal of approval by the council of the league of nations at its last sitting Tuesday afternoon.

M. Viviani of France referred to the council's action as a solemn and important accomplishment for the league and one full of significance and historic interest.

In an eloquent but restrained address, the earl of Balfour outlined Great Britain's future policy in Palestine, which he said would be one of strict impartiality and justice, in which all traditional rights, sentiments and religious feelings of the different racial groups would be respected and held inviolate. He predicted great material prosperity, rapid advancement and fuller privileges for the Arabs and others under the new regime.

He was confident that the establishment of a Jewish national home which had been proclaimed in America, as in Europe, would not be antagonistic to or incompatible with their interests.

**Privacy Necessary.**

M. Viviani, who arrested the immediate attention of the audience by his oratory and animated gestures, begged the newspapers to believe that the secret sittings of the council during the past week were in the interest of an amicable and speedy solution of the many difficult and delicate problems which could not be settled otherwise.

"The newspapers are quite right in their objection to secret diplomacy, that is not our purpose or intent," M. Viviani said, "but we must have a certain amount of privacy if we are to reach harmonious decisions."

There were no serious difficulties between France and Italy regarding the mandates, continued M. Viviani, who expressed confidence that the negotiations on minor points which were proceeding would result in a complete understanding.

**Tribute to Balfour.**

Marquis Imperiali, for Italy, and Count Quinones de Leon, Spanish ambassador to France, also spoke, congratulating the league on the successful issue of the mandates question. Attention was diverted from the formal proceedings for a moment when Marquis Imperiali announced that Tuesday would be the earl of Balfour's 75th birthday and felicitated him in behalf of his colleagues on his long and brilliant career and testified to the warm affection in which he was held by the whole world.

The session of the council was more largely attended than any previous meeting. Represented in the audience were delegations of Arabs, Jews and Moslems, as well as many men distinguished in state, church and official life.

Monsignor Cerretti, representing the Vatican, was denied a hearing by the council on the Vatican's claims respecting the holy shrines in Asia, occupied a seat in the rear and listened with rapt attention to the earl of Balfour's promises that the sacred traditions and all interests in Palestine would be preserved.

**Salerno Honored by His Countrymen**

**Banquet Given Newly-Appointed Italian Consul —Mayor Speaks.**

Sebastian Salerno, newly-appointed Italian consul here, was honored as a guest at a banquet in the Brandeis restaurants Monday night, which was attended by 135 persons, mostly Italian personages of the city.

The program was concluded in Italian, with the exception of a short talk by Mayor Dahlgren, who received uproarious applause. The mayor congratulated Mr. Salerno on his appointment and his friends as well.

Mr. Salerno is my friend, I have been a guest at his home and I was happy to endorse his appointment," said Mayor Dahlgren. "He earned it by square dealing with his fellow people."

The mayor drew laughter and applause when he declared he "understood" the program, "even though it was in Italian."

A sumptuous dinner, enhanced by music from Randall's Royal orchestra and the Hoffman quartet, much of the stirring Italian variety which kept those from fair "Italia" from leaving the program, even though it was in Italian.

The question of polarity is all important. Be sure that the positive side of the line goes to the positive pole of your battery, otherwise the battery is ratted according to "ampere hours" and is ruined. To ascertain the polarity of the line dip the two ends in a solution consisting of water to which a little salt has been added. The wire at which the most bubbles form is the negative wire.

Batteries are rated according to "ampere hours." For instance, a battery of 60-ampere-hour capacity will give a steady current of one ampere for a period of 60 hours, or two amperes for 30 hours.

The plate fastened on the front of the battery box usually gives the normal rate of charge and discharge. These are the rates at which the battery will give greatest service. With the charging apparatus described and with the battery before mentioned, the duration of charge should be about 14 hours.

Many experimenters have alternating current in their homes, and for these people some form of rectifier will be necessary. The most convenient and dependable rectifiers are the magnetic and vacuum tube types. Homemade apparatus has in many cases proved unsatisfactory.

A hydrometer accords a sure means of testing the condition of a cell. The electrolyte, when the cell is fully charged, should read about 1.280, and under no circumstances should the battery be discharged until the cells read below 1.170.

Distilled water should be added from time to time to make up for that lost by evaporation. Water with even slight impurities will greatly shorten the life of the battery. Keep the water about 1/2-inch above the tops of the plates. Do not add acid or electrolyte to increase the specific gravity, after the battery is once in use, but bring it up only by further charging.

A voltmeter may also be used with some success to test the condition of the cells. A cell when fully charged will test about 2.5 volts. Put a load on the battery, such as several lamps, when making voltage tests and do not let the voltage go below 1.7.

**RADIO Sparks**

**How to Recharge Storage Battery**

**Common Electric Light Circuit May Be Used, Expert Says—Connections Simple.**

The care and upkeep of storage batteries is an essential matter in radio. The battery has proven the only satisfactory and economical source of electrical current for the vacuum tubes.

If one has direct current in his home, it is quite a simple matter to recharge the battery oneself. If the battery is of 60-ampere-hour capacity, all that is necessary are five sockets and five ordinary 32-candle power carbon bulbs. Connect these bulbs in parallel and connect one side of the lamp bank to one of the heavy current wires and the other to the battery. The other power wire goes direct to the battery.

The question of polarity is all important. Be sure that the positive side of the line goes to the positive pole of your battery, otherwise the battery is ratted according to "ampere hours" and is ruined. To ascertain the polarity of the line dip the two ends in a solution consisting of water to which a little salt has been added. The wire at which the most bubbles form is the negative wire.

A voltmeter may also be used with some success to test the condition of the cells. A cell when fully charged will test about 2.5 volts. Put a load on the battery, such as several lamps, when making voltage tests and do not let the voltage go below 1.7.

**Radio Station at Stockyards Will Send Out Reports**

**Will Cover Radius of 500 Miles in Adverse Weather**

A radio broadcasting station has been installed at the stockyards under the call of WIAK and broadcasting of market reports and weather statistics will start at 7:45 tomorrow morning. To insure service, which will cover a radius of 500 miles under adverse weather conditions, an C. W. attachment has been installed. It is the only attachment of the kind in Omaha, it is said.

The stockyards station, it is claimed, will be the largest sending station in Omaha. It is a 250-watt plant and reports will go out on 485-meter wave lengths. The transmitter is equipped with 50-watt oscillating tubes and 50-watt modulators. The plant will be run with a 2,000-volt generator and the poles bearing the sending antennae are 100 feet high connected by a cage aerial.

Speeches by Everett Buckingham, Secretary of Agriculture Wallace, Charles Burg and 50-watt modulators. The plant will be run with a 2,000-volt generator and the poles bearing the sending antennae are 100 feet high connected by a cage aerial.

**More Deputies on Duty in Falls City Strike Zone**

Falls City, Neb., July 25.—(Special.)—Seven more men have been sworn in as sheriff's deputies, detailed for strike duty at the Missouri Pacific shops, as the result of the visit here last Thursday of Adj. Gen. Paul. This brings the total number of deputies at the shops to 11. Though the strike is more than three weeks old, not a case of disorder has been reported in the strike zone.

**Horsetowns, Man Escapes as Wagon Goes Into River**

Nebraska City, Neb., July 25.—(Special.)—A horse owned by John Frank, expressman, and driven by his son-in-law, Fred Carman, was drowned in the Missouri river here when Carman backed the wagon so as to dump a load of refuse into the water. Carman was unable to stop the animal and the heavy wagon dragged the horse after it. Carman escaped by jumping.

When he arrived at the dump, Carman had removed his 3-year-old child from the seat of the wagon, placing her on the bank nearby.

**\$50,000 More Valuation on Falls City Real Estate**

Falls City, Neb., July 25.—(Special.)—Despite consistent decreases in all other taxable properties, the valuation of real estate in Falls City was \$50,000 greater this year than that of 1921, according to the report made by County Assessor S. H. Bolejack. Completion of many building improvements the past year boosted the values, Bolejack explains.

It's a wise woman who fools her own neighbors.

**Party of 25 to Attend Frontier Days Show**

A party of 25 representing the livestock interests at the stockyards will attend the Frontier day show at Cheyenne this week, leaving this afternoon at 4 in a special sleeper over the Union Pacific, and will return to Omaha Saturday evening.

**Keep Teeth and Gums in Wonderful Condition**

It is easy to keep your mouth free from the germs which cause the gums to soften and bleed, which start tooth decay. Just use Loksene as a wash, daily, and it will bring relief so quickly that you will be amazed and gratified. It is soothing, healing, powerful and efficient in keeping the mouth sweet and clean. Sold by leading druggists.

**Road Conditions**

(Furnished by Omaha Auto Club.)

Lincoln highway, east: Roads muddy to Denison and east. No report from Marshall. State Highway 1, Des Moines east of Cedar Rapids due to road construction.

Lincoln highway, west: Roads muddy to Grand Island; raining at most every point. Des Moines to Omaha on Lincoln highway one-half mile east of Elkhorst. This detour is somewhat slippery due to rain, but traffic is moving with chains.

O. & N. D. highway: Road slippery clear through to Fairmont. Traffic moving with chains. In leaving Omaha go west on Dodge street to 11 miles, south four miles to O. & N. D. again.

Highland county: Roads somewhat slippery.

Cornhusker highway: Slippery. S. W. A. slippery.

O. Street: Slippery.

George Washington highway: Slippery.

Black Hills Trail: Slippery.

King of Trails, north: Slippery.

King of Trails, south: Slippery.

River to River road: Slippery; still raining some stations.

Custer Battlefield highway: Roads somewhat slippery out of Omaha due to rain. South Dakota and Wyoming roads all good. Inquire Sheridan for north and west.

Chicago-Omaha Shortline: Roads slippery. Des Moines one and one-half miles east of Council Bluffs for six miles; also Anita and Casey, Des Moines from Victor to Iowa City will be terminated August 15.

O. W. Shortline: Roads slippery.

Elkhorn highway: Slippery.

Meridian highway: Raining through southern Nebraska. Roads slippery.

Weather cloudy most everywhere. Predictions for clearing today, with fair and warmer tomorrow.

**Elevator and Warehouse Destroyed by Lightning**

Superior, Neb., July 25.—(Special.)—Lightning struck the elevator and warehouse belonging to Bossemyer Bros. of Superior at Webster, Kan., completely destroying both buildings, with 4,000 bushels of grain. Telephone wires were down, due to the terrific storm, and a party drove to Superior to notify Bossemyer Bros. Several carloads of men went from Superior, but they arrived too late to save anything but a part of the postoffice building and scales. The rain was the greatest help in putting out the fire in the smaller buildings.

**A Free Radio With Every Piano Player Piano or Phonograph**

We give FREE, an efficient Radio Receiving Set with the purchase of any of the above instruments. This is your opportunity to become the owner of a high-grade musical instrument at a low price and an entertaining and popular Radio.

**NOTE THE SPLENDID BARGAINS LISTED BELOW. They are instruments we have accepted in trade on new ones or returned from rental.
