

First Arrest in State in Strike Ruling Ordered

Marshal Instructed to Take into Custody Striker Accused of Aiding in Intimidation.

The first arrest in Nebraska for alleged violation of the federal injunction against the striking railway shopmen was ordered yesterday by Federal Judge Woodruff, who issued an attachment for the arrest of Rex Hash of Norfolk, at request of Wymer Dressler, attorney for the Chicago & Northwestern railroad.

The order of arrest is based on an affidavit filed by George Friederich, employed at the roundhouse in South Norfolk since July 15.

He alleges that on July 25, a gang attacked him as he was entering the roundhouse, chased him, called him names and threatened to strike him with brass knuckles.

Hash, a striker, was formerly employed at the roundhouse as a night hostler's helper.

The United States marshal will go to Norfolk to arrest Hash and bring him to Omaha.

McDonald Is Victorious Over Fleahy by Safe Margin

Lincoln, Aug. 1.—Official returns received by the secretary of state from all counties in the state, with the single exception of Arthur county, on the vote on the democratic ticket for the office of attorney general, give McDonald 17,871 and Fleahy 17,292. The vote in Arthur county will not change the total more than a few dozen votes either way, officials believe.

Shipment From Papillion Tops Local Cattle Market

A consignment of 49 head of choice Hereford yearlings was brought to the local market by K. C. Brown of Papillion. The cattle averaged 935 pounds and brought \$10.40 a hundred, the highest price paid for that grade for a week.

Road Conditions

Furnished by Omaha Auto Club.

Lincoln highway, east: Detour Crescent to Missouri Valley. Roads all dry and well drained.

Lincoln highway, west: Roads fair to good to Central City. Central City to Papillion roads muddy. Grand Island and west roads good.

O. E. D. highway: Roads good to two miles this side of Ashland. Detour pretty rough. West of Ashland roads fine.

Highland road: Roads good.

Cornhusker highway: Roads good.

Black Hills trail: Roads dry, but still quite rough.

George Washington highway: Road closed north of Florence. Detour over high road to Blair. Road good to Blair. North of Blair just fair.

King of Trails, north: Roads good.

King of Trails, south: Roads good.

O. Street road: Roads fine.

Meridian highway: Roads just fair through northern Nebraska. South of Columbus, roads good.

River-to-River road: Road closed.

I. O. A. shortline: Roads good.

Chicago-Omaha shortline: Roads good.

Blue Grass road: Roads reported not to be very good condition.

Omaha-Topeka highway: Roads good.

Omaha-Tulsa highway: Roads good to Topeka.

Weather reported clear and warmer at every point.

Golden Wedding

Columbus, Neb., Aug. 1.—(Special.)—Henry Gass, sr., and his wife will celebrate their golden wedding anniversary August 3. Mr. Gass was born in Basel, Switzerland, May 13, 1844. He came to America June 5, 1868, settling at Pittsburgh, Pa. On February 2, 1870, he came to Columbus and started a cabinet shop. He was married at Rock Island, Ill., to Miss Elizabeth Schmid, also a native of Switzerland. Returning to Columbus, he established a furniture store, which was entirely destroyed

by fire in 1912, but was rebuilt in the same year on Thirteenth street, where he is conducting the firm of Henry Gass & Sons, one of the largest furniture stores in the state outside of Omaha and Lincoln. Mr. Gass, 78, and his wife, 73, are both enjoying good health. They have three living children, Sam, Henry and Rose. Mr. Gass is the only surviving charter member of the Columbus Maennerchor, which society has prepared a banquet for the jubilee.

Radio Frequency a Novel Success

Deeper Interest of Manufacturers Shown in New Type of Amplification.

As radio is developed further and further, the greatest interest of experimenters centers about radio frequency for receiving.

The time is not far off when manufacturers receiving apparatus will specialize in this type of receiver exclusively. There is an essential difference between radio and audio frequency amplification. It is this: With radio frequency the very slight current produced in the receiving antenna system by passing waves from a transmitting system are caught and passed through amplifying devices, designed to permit this current to oscillate—that is, to flow back and forth at the same frequency it passes through the ether.

With audio frequency the current from the detector tube is passed through successive amplified stages, not at the natural frequency of the signal as it passes through the ether, but at a frequency very much lower, which is within the range of audibility. In the case of radio frequency amplification, the incoming signals are amplified by means of a local source of energy before they reach the detector tube, while audio frequency amplification takes place after detection.

Detection requires a certain amount of energy for its proper functioning and it is obvious that several stages of audio frequency amplification would be useless where the strength of the incoming signal was insufficient to produce detection. It is here that radio frequency is valuable, for it builds up the infinitely weak signal to a point where proper detection may take place, and from this point on it is possible to increase the signal audibility by the radio frequency amplification method.

Broad Range.

Radio frequency amplification alone will not operate a loud speaker over any material distance. In fact, the general rule may be laid down that loud speakers may only be employed where at least one or two stages of audio frequency amplification are employed. Radio frequency amplification has not been very popular in amateur circles until recently for the

reason that different transformers were required for the various wave length ranges and the range of any one transformer usually covered but a few hundred meters. This difficulty has been materially reduced by the introduction of a new radio frequency transformer designed to function satisfactorily over a particularly broad range of wave lengths. The broad range is made possible by taking advantage of the balancing effect found to exist when an iron core radio frequency transformer is employed. A transformer of this character having a wave length range of 200-5,000 meters may now be had and another transformer having a range of 5,000-25,000 wave length ranges covered by these two transformers permit the operator to receive on practically all of the wave lengths now in use.

A very significant fact regarding radio frequency amplifiers is that the results obtained by a single stage of radio frequency amplification and a vacuum tube detector nonregenerative circuit are approximately the same as those obtained by vacuum tube detector alone, employed in a regenerative circuit of proper design.

"OUCH!"

How My Corns, Bunions and Calloused, Burning, Tired Feet Hurt—

—what shall I do?

USE

GYPSY FOOT RELIEF

No more soaking the feet in medicated baths—no powders, plasters, or inconveniences—no muss, no bother! Apply in one minute, then walk all you like and work on your feet as long as you wish!

The excruciating pains and aches from corns, bunions, callouses, and burning, sore, tired feet vanish as if by magic!

Gypsy Foot Relief

A Wonderful Secret From the Desert. Does Away With Foot Troubles.

Successful Results Guaranteed in every case or money back. Sold in this city by Sherman & McConnell, Beaton Drug Co., Halnes Drug Co., Merritt Drug Co., Green Drug Co.

Wheat Growers Open Sales Agency in Minneapolis

Organization to Apply for Membership in Chamber of Commerce—To Use Sample Market.

Minneapolis, Aug. 1.—The Northwestern Wheat Growers' association, representing 19,000 growers in the states of Oregon, Washington, Idaho, Montana and North Dakota, have opened a sales agency here.

The organization will apply immediately for a membership in the Minneapolis Chamber of Commerce, according to George C. Jewett, manager of the organization, who is here to arrange for the opening of agencies.

The Minnesota law, declaring the Chamber of Commerce and other exchanges open public markets, provides for the admission of co-operative organizations in the exchange.

The wheat growers plan to make

use of the sample market, but will not deal in futures, Mr. Jewett said.

"Under normal conditions, the growers in these five states will produce 40,000,000 bushels of wheat," said Mr. Jewett. "Approximately one-half of this amount will flow through the sales agencies at Minneapolis and the other half will go to the Pacific coast."

E. J. Jahn, formerly in charge of the London sales office of the organization, will be in charge of the Minneapolis office.

Mr. Jewett will appear before the War Finance corporation in Washington, August 9, to apply for a loan of several million dollars to be used in the marketing of the grain in the wheat growers' pool.

Nebraska Convict Drops Dead at Breakfast Table

Lincoln, Aug. 1.—(Special.)—Martin Mullany, convict, 43, dropped dead at the state penitentiary breakfast table this morning.

Prison physicians stated heart disease caused death.

Mullany was serving a three-year term for kidnaping in connection with the packing house strike at Nebraska City last winter. He entered the penitentiary in April.

Tri-State Crops Helped by Rains

Corn and Potatoes Benefit by Moisture—Threshing Is Well Under Way.

Sioux City, Ia., Aug. 1.—Rains that were general throughout northern Iowa, northern Nebraska and South Dakota during the week just ended were of inestimable value to corn, potatoes, pastures and other late crops, according to special reports to the Tribune. In a few places the rainfall was excessive and some damage was done and there were a few localities where hail caused heavy losses, but these areas were comparatively limited.

In the extreme northern part of South Dakota there still remain areas that are in need of more moisture.

Harvesting is nearly completed in all sections and the threshing is well started. Yields are above the average as a rule, while nearly all reports show the quality of the grains to be above average.

Corn is making wonderful growth

The same is true of late potatoes, and both promise big crops.

Filling Station at DeWitt Robbed of Cash and Gasoline

Beatrice, Neb., Aug. 1.—(Special Telegram.)—Thieves last night entered the private filling station of Delbert Badman at DeWitt, robbed the cash register of a small sum of money and tapped the tank for five gallons of gasoline. They were traced to Beatrice.

Governor to Be in Columbus When Legion Head Speaks

Columbus, Neb., Aug. 1.—(Special.)—Governor McKelvie has advised officers of the Hartman American Legion post that he will be in Columbus August 4, when National Commander MacNider of the legion will address a public meeting in the city park. State Commander Ritchie of Omaha will also come.

Plattsmouth Hearing on Water Rates Starts

Hearing on alleged discriminatory rates in the case of the city of Plattsmouth and the Plattsmouth Water company began yesterday in federal court before B. H. Duncan, special

Miss Pyrtle Speaks Before Albion Lions

Albion, Neb., Aug. 1.—(Special Telegram.)—Miss E. Ruth Pyrtle, candidate for state superintendent of education, spoke at a regular meeting of the Lions club here today on "Educational Needs in Nebraska." Miss Pyrtle stressed character making and citizenship as the most important functions of the schools. Miss Pyrtle spoke to a large audience at the evening chautauqua program.
