

Modern Homes Electrically Equipped, Is Yours?

Women May Have Cool Kitchens at Time of Canning

Put Jars of Fruit in Oven, Set Switch and Electricity Will Do the Rest.

Canning time, although it comes at the hottest season of the year, has no terrors for the woman who has an electric stove.

The highest authorities on canning recommended the "cold pack" process and the fruit to be canned must be selected with care and blanched by submerging in boiling water from 1 to 10 minutes. A wire basket, lined with cheesecloth, is useful for this process and may also be used for a second bath of cold water in which the fruit is allowed to remain 2 or 3 minutes.

After draining and drying the fruit is packed into hot jars and either boiling syrup or boiling water added. The tops are then put on but not screwed tightly.

Meanwhile the electric oven has been heated as for baking and the jars placed in the first rack above the heater. It is not necessary, when canning electrically, to place the jars in a pan of hot water as is customary when other fuel is used.

The most important factor in fruit canning is to maintain uniform heat until sterilization takes place and this uniformity is only possible with electric heat.

As soon as the jars have been stacked in the oven the adjustable band of the thermostat must be set at 1 1/2 (boiling point) and the oven door tightly closed. When the circuit breaker trips at 212 degrees Fahrenheit the adjustable band should be moved forward to 2 1/2, the circuit breaker knob reset and the switch for the oven bottom turned to "low."

The important thing is to keep the oven at 212 degrees Fahrenheit for the time required for sterilization.

The woman who is not fortunate to own an electric range will find canning in an electric fireproof safe entirely satisfactory. The "cold pack" method is used and uniform heat is as readily obtainable in the cooker as in the range.

Many questions have been received recently about the proper lighting of the laundry in the modern home. It appears that some owners are having difficulty in selecting their reflectors and in having their lights placed where they will be the most effective.

We will assume that the modern home has an efficient step saving laundry. Although it is almost impossible for us to meet all conditions we will assume that the laundry is equipped with an electric washer, trays for soaking, rinsing and bluing, an electric dryer, an electric ironing machine and an ironing board.

Receptacles for lights should be of porcelain and mounted at the ceiling. The reflectors may be of porcelain, enameled steel, equipped with Mazda daylight lamps.

Proper Lighting in Home Laundry

Fowler & McDonald Sell Acreage to J. L. Haugh

Fowler & McDonald report recent sales as follows: 2.10 acres in Fairacres from Anna Porter to Jesse L. Haugh, \$5,000; lot in Happy Hollow to Rose Simanek, \$6,000; business lot on North Twenty-fourth street, having 132 foot frontage, to an investor, \$10,000; lot on Fifty-second street, south of Farnam, to Emma J. Morton, \$2,500; lot, 50x125 feet, on Fifty-second street, near Farnam, to Helen Bolker, \$2,500; lot on Forty-ninth avenue, near Farnam, to J. B. Archer, \$2,250; 22-foot lot on North Twenty-fourth street, near Burdette, to W. Fomarrow, \$1,000; lot at Twenty-ninth and Erskine streets to Cora L. Owen, \$450; house and lot at 5010 Burt street to L. L. Swanson, \$7,400.

Appropriation Is Made for Armistice Medal

Paris, Aug. 12.—Funds to strike a medal commemorating the fourth anniversary of Armistice Day have been voted by the finance commission of the chamber of deputies. A former suggestion to strike a medal to celebrate the return of peace was defeated by the deputies, according to Le Matin, on the grounds that France, they said, had never seen any peace.

New Luncheon Dish

Luncheon dish prepared on an electric grill; lamb chops with bacon and mushrooms. Trim extra fat from the chops and turn them over and over in two tablespoons of olive oil, then broil in lower pan of electric grill. Roll the slices of bacon and secure with small wooden toothpicks; fry in deep fat in upper pan of electric grill, until cooked through. Drain on soft paper and remove the skewers. Fry the mushrooms and turn them in the oil and broil three or four minutes on each side. Set the chops on a hot dish with a mushroom cap and roll of bacon above; sprinkle on a bit of maitre d'hotel butter and serve at once.

SALESMEN

Manufacturer of nationally advertised and established line has two vacancies in his sales organization. This corporation is a really large one in a large industry.

The above positions will be filled just as quickly as we can find the right man. Salary and expense basis for a short time and then commission with prospective and bonus. Our men must each have \$4,000 per year in satisfactory.

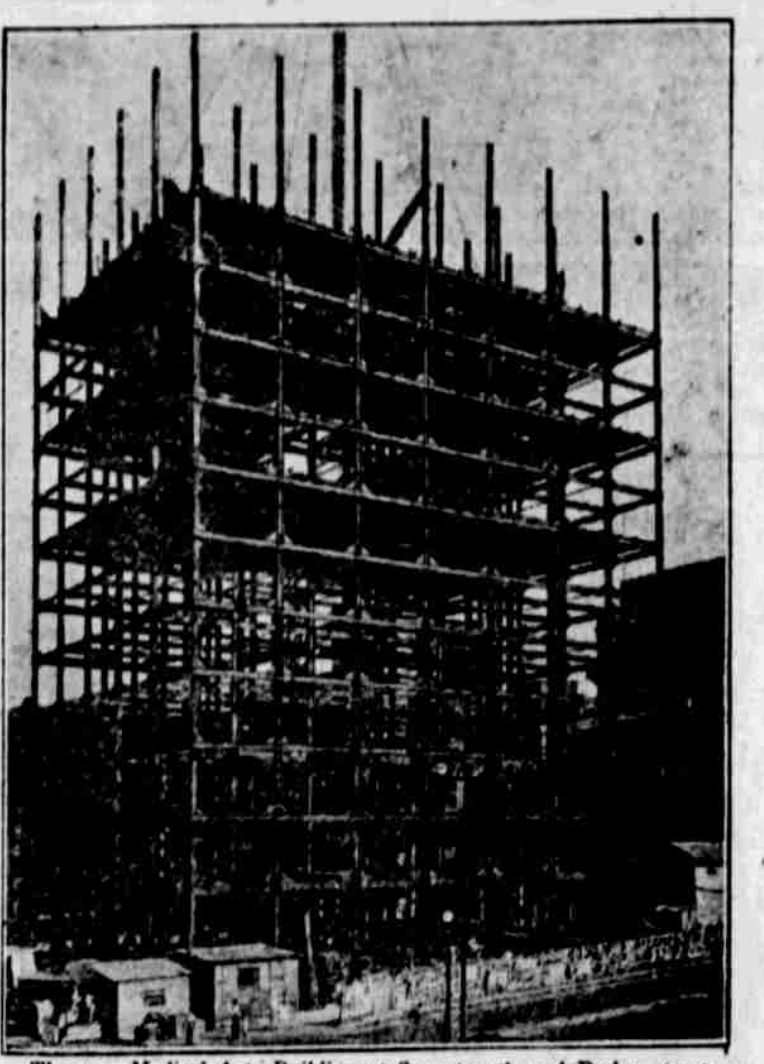

Our territories are not large, but they are home every week-end. They work out there a week and sell by wholesale trade only. There are no profits of closed seasons. The line is stable and shipments are made from Omaha.

The men we are looking for now are probably between 25 and 35, have made few changes in the past and are already employed now, with a good reason for considering a change.

Reply in detail. All correspondence treated strictly confidential until after personal interview which will be arranged if your letter looks interesting. Our present salesman have been advised of this advertisement.

New 19-Story Medical Arts Building

The new Medical Arts Building at Seventeenth and Dodge streets as it looks in course of construction today and as it will look completed. Work on this 19-story structure is being pushed as rapidly as possible. It will be occupied by physicians, surgeons and dentists.

RADIO

Crystal Is Made More Sensitive

There has been considerable discussion as to the efficiency of loop or coil antenna compared to a standard aerial. It is generally agreed that a loop antenna in the summer months has less static capacity than an exposed wire aerial and it is also agreed that a loop antenna avoids considerable neighborhood interference because of its adjustable directive reception effect. It is, however, generally agreed that for long distance work a long single wire antenna of sufficient height is more efficient than a loop or coil antenna.

When used in conjunction with a carburenum or other crystals requiring a comparatively rigid and firm contact, care should be exercised in avoiding pressure sufficient to crush the arsenic crystal, which is quite fragile. With a sensitive spot once found, this combination, carburenum and arsenic, will hold its adjustment for days, and sometimes weeks, without further attention.

The experimenter should not forget, however, that carburenum alone or in combination with any other crystal is always used with a potentiometer, pole changing switch and two or three dry cell batteries.

Radio Ordinance Will Be Discussed Thursday

Radio enthusiasts will meet in the council chamber of the city hall next Thursday evening at 7, when City Electrician Israel Lovett will explain the salient points of the proposed radio ordinance now before city council which will regulate all wireless and radio installations and operations.

HEADQUARTERS for RADIO and EQUIPMENT

IN the practical sense of the word this is a headquarters because the amateur and expert radio telephonist can buy all of his supplies here at reasonable prices.

WELSBACH GAS HEATER

"We buy and use a little heat—when a little will do."

"We believe that it is extravagant and unnecessary to have the furnace fire going 'full head' most of the time.

"We believe that it is ECONOMY to be comfortable, to guard against colds and sickness.

"We like to have heat where we can use it, where its direct radiance falls right on us, with cheerful comfort.

"We like clean, odorless, instantaneous heat.

Welsbach GAS HEATER

And so does everybody who comes to see this fine, efficient, convenient little heater at our spacious store! Costs 25¢ per hour to operate.

New Apartments to Be Open Soon

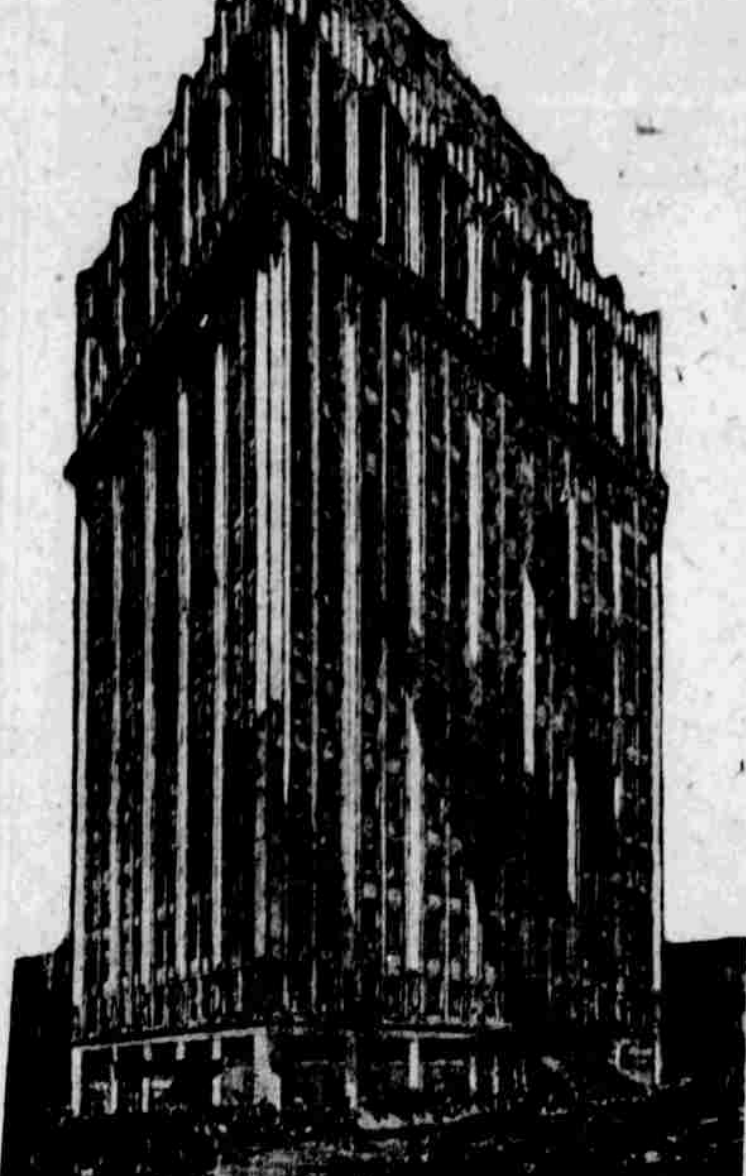

Conamore, With 18 Modern Divisions, Will Be Managed by Peters Trust Company.

The Conamore apartment building, located on California street, just west of Lincoln boulevard, is nearing completion and will be available for occupancy about September 1.

There are 18 apartments in all. Six of them are three-room apartments, which will rent for \$65. Twelve are four-room apartments, renting for \$80 and \$85.

Peter Mehrens is the owner of the building, and also owner of the Joyce adjoining it. J. L. Conley company are the architects. John E. Wakefield company is the general contractor, and it will be managed by the property department of the Peters Trust company.

"The new Conamore apartment house," states Alfred C. Kennedy, manager of the property department of the Peters Trust company, "will be a welcome addition to Omaha's beautiful apartment houses. It will possess many new and attractive features appealing to the housewife. It is fireproof, and the finish, style and construction make it desirable. Every convenience and comfort is arranged for the occupants."

Stamps That Change in Color Used in France

Paris, Aug. 12.—Philatelists may wonder why French stamps of the same denomination and series appear in varied shades of the same color. The Postal department has explained that some of these stamps, due to a defect in the inks used, change color with the weather. Stamp buyers are warned that color variation does not affect the value.

University Buys Fair Home for Frat House

The D. H. Fair house at 201 South Thirty-third street has been purchased as a fraternity chapter house by the University of Nebraska branch of Nu Sigma Nu, national medical fraternity. The fraternity will take possession about September 1.

The local branch of the fraternity is known as the Meta Epsilon chapter. Its new home is three stories high, and contains 15 rooms. The house, bought through Shuler & Cary, cost \$23,000. The fraternity bought its house in a central location, believing it will be able to sell in a few years at an increased price, and buy or build a larger home near the school, which is at Forty-second street and Dewey avenue.

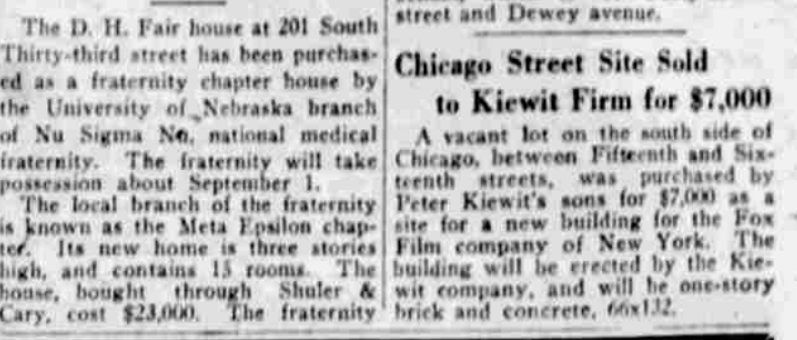

Chicago Street Site Sold to Kiewit Firm for \$7,000

A vacant lot on the south side of Chicago, between Fifteenth and Sixteenth streets, was purchased by Peter Kiewit's sons for \$7,000 as a site for a new building for the Fox Film company of New York. The building will be erected by the Kiewit company, and will be one-story brick and concrete, 60x132.
