

### Band of Concert Club to Appear at Miller Park

Xylophone Soloist and Quartet to Be Headliners in Concert at 5 P. M.

Jack Willis, xylophone soloist, and the Hoffman quartet, comprising E. E. Moore, first tenor; Phil Helgen, second tenor; Phil Helgen, baritone, and Gus P. Swanson, bass and director, will be the headline attractions at a concert given at 5 p. m. today in Miller park by the City Concert club band, of which Arthur E. Smith is conductor. The concert given by this club are supported by subscriptions and \$1 memberships to the club. The club officers give their services free to promote municipal music.

### Phonofilm to Be Tried in America

Dr. Lee De Forest, inventor of "Talking Film," to Give Demonstrations Here.

Berlin, Aug. 19.—(By A. P.)—Dr. Lee De Forest's phonofilm has emerged from the seclusion of the American inventor's Bessie laboratory and will shortly be taken to the United States, where he proposes to give the invention a practical try-out at a large motion picture studio.

Dr. De Forest, who has been experimenting on his "talking film" for more than a year, gave a private demonstration, during which he admitted it is still in the initial stage. He predicted for it, however, widespread application to the fields of science and entertainment.

With the aid of specimen films, each about 100 feet in length, the inventor gave an exhibition of the synchronization of sound and movement of the screen. One of the films showed Dr. De Forest giving a vocal explanation of his invention, and another strip showed a man playing a violin, the notes of which emerged from the funnel at the side of the screen in unison with the movement of the violin's bow.

The secret of the phonofilm is wrapped up in a brass tube called a photo-electric cell, which can be attached to any standard theater picture projector. An audion intensifier and controls the projection, both picture and voice, or other sound, being recorded at once on a film of standard size, which is unreeled at ordinary motion picture speed.

**Father Weeps in Court for Son Hating School**  
Stanley Tilla, 16, 3502 North Fifty-fifth street, does not want an education. His father, Joseph Tilla, wept in juvenile court today as he told of his efforts "to make something" of his boy.

"I want him to get education so he have better job," said the elder Tilla, whose hands are hard and worn with toil in a boiler shop. "I make \$4 a day and I pay \$150 for him to go to summer school so he can graduate from eighth grade. I want him to go to Creighton university. But he will not go to school. I don't know what to do. I wanted to make something out of him. Judge Stauffer gave the boy a chance, ordering him to report weekly as to his school attendance. "I don't like to go to school," Stanley said.

**Youth Speaks a Part in Ak-Sar-Ben's Pageant**  
"I'll carry that spear as it never was carried before," exclaimed a 16-year-old Central High school youth this morning, addressing Belle M. Ryan, assistant superintendent of schools.

The boy explained he was eager to have a part in the pageant that will be presented by school children in connection with Ak-Sar-Ben festivities next month. He did not aspire for a place in the front row, but just wanted to be part of the big show. He would even be content to carry a spear and he would carry it with a keen eye and steady nerve and the other attributes which a competent spear-bearer should have.

Telephone communication with Charles Gardner, secretary of Ak-Sar-Ben, resulted in finding a place for the ambitious student.

**For PYORRHEA**  
At Last A Successful Treatment—Pyorrhea, and its attendant conditions, are quickly and permanently overcome by using MOORE'S PYORRHEA MEDY. Obtainable at any drug store. Bleeding, tender, ulcerated gums. See how both children and adults are cured. MOORE'S PYORRHEA MEDY. 16th and Douglas.

### Pittsburgh Scientists to Attempt Conquest of Fog by New Oil Product

River Mists to Be Thwarted by Spreading Thin Oil Film on Water.

Pittsburgh, Pa., Aug. 19.—A major scale experiment in fog prevention will be attempted by scientists of Mellon Institute of Industrial Research and its parent body, the University of Pittsburgh, in conjunction with the War department, the weather bureau and state and city authorities within the next 60 days. The cost will be defrayed by a Pittsburgh business man. If the big outdoor demonstration comes up to expectations Pittsburgh can be insured for a few thousand dollars annual outlay that it can have sunshine when the upriver and downriver valleys are shrouded in dense mist.

**Soot Nuisance Abated.**  
By the strict enforcement of smoke regulations this city has accomplished wonders in abating its soot nuisance. The present desire is to also banish the terrors of fogs, which, though infrequent, bring midnight darkness, time loss and traffic jams in the congested downtown triangle, formed by the confluence of the Monongahela and the Allegheny rivers.

The scene of the experiment will be a 20-mile stretch of the Monongahela, running from Rice's landing to McKeesport, Pa. Under the direction of Maj. J. Franklin Bell, district chief of the War department's rivers and harbor work, government steamers and crews will lend aid. The city of Pittsburgh will supply sprayers for equipping the boats.

**River Main Fog Source.**  
The battle against the fog will be fought on the river, because it is from water surfaces, except in excessively wet spring seasons, that all the vapor clouds arise. It has long been known that evaporation can be completely checked by blanketing a body of water in heavy mineral oil. At always, heretofore, grave objections to the use of oil have existed. Cost has been excessive and the petroleum product used gave the water a disagreeable taste.

After five years of study three of the university and institute scientists have discovered how to lay down an oil film 25 times thinner than that produced by the petroleum products hitherto tried, yet apparently retaining all the toughness that the thicker coating possessed. This film is 1/2500 of an inch thick and in laboratory experiments it kept heated water from giving off vapor for 100 days. Use is made of an intermediate oil from petroleum, costing about \$2 a barrel, to which is added a small amount of a cheap organic acid.

Henry Pennywitt, government forecaster for the Pittsburgh area, enters into the experiment with the statement that he can predict a fog 12 hours in advance. This means that at a midnight hour, after he has given the word of a fog due the next morning, the scientists on their fleet of boats will set out at Rice's landing to lay down a blanket of oil several miles long over the Monongahela. At dawn, unless some flaw develops in the carrying out of the experiment, the observers stationed along the river from Rice's landing to McKeesport expect they will see the sun through a clear atmosphere, while at other points, up and down the river, dense fogs will prevail.

**Also Mosquito Ban.**  
As a further development of commercial use of the thin oil film it is proposed to apply it to mosquito-infested waters and swamp lands. The oil spreads over such a greatly extended surface that it may be possible to use an airplane, with a light cargo of oil, to spray marshy lands which have been inaccessible to present methods of oil treatment.

And finally such oil films might be employed for calming rough water at sea.

Dr. Warren Fred Faragher and Dr. William A. Hamor.

Three Pittsburgh scientists who have evolved method by which they believe fog nuisances can be abated in Pennsylvania industrial center. The new petroleum derivative also may be used to eliminate mosquitos and later may be employed to smooth rough waters at sea during storms. Product to be used can be spread much thinner and therefore over much greater surface at less than any material previously in use.

amount to cover a great water surface that no bad taste or deleterious effect will be noticeable.

The researchers men to whom credit is due for the discovery and for laying plans for the proposed outdoor experiment are H. B. Mellon, dean of the school of mines, University of Pittsburgh, and chief of the bureau of smoke regulation, city of Pittsburgh; William A. Hamor, assistant director of Mellon institute, and Warren F. Faragher, senior incumbent of Mellon institute's multiple industrial fellowship on petroleum technology and professor of refinery technology in Pitt School of Mines.

Henry Pennywitt, government forecaster for the Pittsburgh area, enters into the experiment with the statement that he can predict a fog 12 hours in advance. This means that at a midnight hour, after he has given the word of a fog due the next morning, the scientists on their fleet of boats will set out at Rice's landing to lay down a blanket of oil several miles long over the Monongahela. At dawn, unless some flaw develops in the carrying out of the experiment, the observers stationed along the river from Rice's landing to McKeesport expect they will see the sun through a clear atmosphere, while at other points, up and down the river, dense fogs will prevail.

**They All Looked Alike to Charles**  
Voice Was That of Missing Polly's, But Who Could Pick Him From Whole Colony?—and Such Language!

Charles A. Brown, 415 North Fifteenth street, had a parrot. Polly was its name. Now Polly's wise cracks were a constant delight to Charles, so what ham it to eggs, Polly was to his owner. The bird squawked for freedom one day. "Lemme out, lemme out," it cried with a gusto accentuated with invectives. Charles complied and Polly departed. All of which worried Charles. So with stealthy men the owner conducted a search. Passing a house on North Fourteenth street yesterday Charles thought he heard Polly's voice.

"Get Me, You."  
"Get me, get me, you blankety-blank-blank," was the plaintive squawk. "Eureka." Charles was wont to shout as he started for a copper. He was directed to justice court where he filed a writ of replevin for the bird.

Accompanied by Constable George Sazy the happy man led the way to Fourteenth street. As the pair entered the place a chorus of voices greeted them. And it was not choice language, either. "Pull in your port runnin' lights, your starboard torpedo net is dragging." "Howe up the gang plank, the captain of the brig is comin'." Such was the argot that permeated the air from a menagerie of parrots. Charles scratched his head. Don't know which one is Polly," he explained. The constable and Charles gave up the case. Charles is still hunting for his own dear Polly.

Holstein cows give about 10,000 pounds of milk a year each, or about 13.5 gallons a day. Angkor Vat, one of the mightiest ancient structures ever built, is in the forests of Siam.

**Miss Vada Masden Tells How Cuticura Healed Eczema**  
"Eczema broke out in a sort of blister on the tips of my fingers. It soon spread over my entire fingers and itched and burned dreadfully. Many times in the night I would wake up and scratch. I tried many different remedies without relief. The trouble lasted about three months before I began using Cuticura Soap and Ointment. After using them about a week I got relief and when I had used one cake of Cuticura Soap and one box of Cuticura Ointment was completely healed." (Signed) Miss Vada E. Masden, Verdel, Nebraska, Feb. 7, 1922.

### Boy Runs Away to Escape School

So Believes Mother, Who Thinks Son on Way to Farm.

Every time the family moved to a new town, Melvin Sheldon, 13, found himself "put back" in school. He stood it bravely until the last "move" from Atlantic, Ia., to Omaha, when he was "put back" a whole grade. But ever since the announcement, last week, that school would reopen the first week in September, Melvin showed signs of restiveness.

Thursday he disappeared. "I think he is making his way back to our cousin's farm near Grant, Ia.," said his mother, Mrs. Max Sheldon, 4223 Grant street. "He likes the farm and I know he doesn't care much about going back to school." Melvin attended Walnut school last term. The boy had several dollars, earned by doing errands, with him when he left. Joseph Bodnar, jr., 18, left his home, 5117 North Thirty-fifth street, the same day, and has not been heard from since, his father reported to police.

### Deeds Registry Shows More Property Changing Hands

Register of Deeds Pease has recorded 5,920 deeds and 16,950 instruments up to August 15 this year. In the same period last year 5,228 deeds and 13,863 instruments were recorded. Receipts of the office this year so far are \$21,996. Last year they were \$18,120. Considerations this year were \$15,759,902; last year, \$19,311,654.

### St. Louis Will Build \$140,000 Bird House

St. Louis, Aug. 18.—A nice steam heated birdhouse, costing \$140,000, will be built to house birds at the St. Louis Zoological gardens in this city. An artificial ice plant, to "fool" the Arctic bears, also will be constructed. Six polar bears have been purchased to roam on the ice.

### Flapperish Styles in Discard, She Says

Josephine Grace.

"The gay and flapperish styles of summer have been completely replaced by modes that are delightfully feminine," announced Miss Josephine Grace, assistant to George Watson, manager of the women's ready-to-wear department of the Burgess-Nash company. "Skirts," she insists, "are definitely longer, being from seven to nine inches from the ground during the day; at night falling to the ankle in waves of frothy lace. "Milady's wandering waistline has come to rest at the hips or a little above, bringing out young lines that are little and supple. "Sleeves, on the contrary, show a decidedly willful bent to do just as they please—appearing long and flowing short, or not at all. "French panel effects, side and front draped models, and Russian silhouettes are leading in favor," she declared.

### Magazine Lauds Omaha Airplane

Bellanca Ship Far in Advance of European Designs, Says Editorial.

In the August issue of "Aviation," a leading aeronautical magazine published in New York, appears this editorial:

"The new Bellanca monoplane, which described in this issue, is a development of which the American aircraft industry may take justified pride. As may be seen from the specifications and performance figures published, this machine carries in a cabin four passengers and a pilot with fuel for a 600-mile flight with only a 90-horse power engine. This corresponds to a payload of 7.5 pounds per horse power, whereas the payload of a Mail DH is only 1 1/2 pounds and the best foreign machines carry at the most only about 5 pounds per horse power. "It is gratifying that this country should produce a commercial airplane so far in advance of European subsidized designs. The Bellanca plane was built in Omaha by G. M. Bellanca, its designer, and Victor H. Roos. It has won many trophy cups at aviation meets held recently in this part of the country. In addition to the editorial "Aviation" prints a long illustrated article explaining the construction of the Omaha-made ship.

### Central Air Service Found Near Perfect for 13 Weeks

Central division air mail service has a 100 per cent record for the last 13 weeks, with the exception of one day when 100 miles was lost. A. R. Dunphy, superintendent, announced today. The mileage covered was 175,000.

A perfect record the past six weeks between New York and San Francisco was announced at the same time. The 100-mile loss in this division occurred earlier.

### Chicken to Fly From Plane in Norfolk Aero Meeting

A live chicken, thrown from a plane at an altitude of 300 feet to glide its way to a set circle, will be one of the features of the Norfolk, Neb., aero meet to be held in that city next Thursday, Friday and Saturday under the auspices of the American Legion, Air Mail Pilot W. C. Hopson, who will fly a Bellanca sedan monoplane owned by Victor Roos of Omaha, in several events, stated the fowls glide to earth as cleverly as a plane. Mr. and Mrs. Roos and Prof. G. M. Bellanca, designer of the plane, will accompany Hopson to Norfolk.

### THE VALUE OF CHARCOAL

Everyone knows how useful it is in preserving health and beauty. Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier in nature, but few realize its value when taken into the human system for the same cleaning purpose. Charcoal is a remedy that the nurse and mother should have at hand. It absorbs the injurious gases which collect in the stomach and bowels; it softens the stools and relieves the distress of colic. Charcoal sweetens the breath after smoking and after eating onions and other odorous vegetables. Charcoal effectively cleans and impregnates the mouth, whitens the teeth and further acts as a natural and eminently safe cathartic. It absorbs the injurious gases which collect in the stomach and bowels; it softens the stools and relieves the distress of colic. All druggists sell charcoal in one form or another, but probably the best charcoal and the most for the money is in Stuart's Charcoal Lozenges; they are composed of the finest powdered Willow charcoal, in tablet form, rather than in the form of large, pleasant tasting lozenges; the charcoal being sweetened to be smooth and palatable. The daily use of these lozenges will soon tell in a much improved condition of the general health, better complexion, sweeter breath and purer blood, and the beauty of it is, that the possible harm can result from their continued use, but on the contrary, great benefit.

**10c White Bread 5c a Loaf**  
Every day during the "No Profit" Sale. Limited to five loaves to each customer. On sale all day.

**Cake Doughnuts, 2 Doz., 25c**  
Fresh Cake Doughnuts baked while you wait. On sale each day of the "No Profit" Sale from 8:30 till 10:30 a. m.

**HAYDEN'S**  
Assorted Cookies, doz., 10c. Assorted Butter Rolls, doz., 15c.

Starting Afresh Monday Morning With Scores of "Extra Specials," Even Greater Values Than Offered Before

## Continuing "NO PROFIT" SALES

the

### "No Profit" Wash Goods Sales

**IMPORTED VOILES, 50c.**  
One line of imported voiles, 40 inches wide, an exceptionally good quality and beautiful designs and colors. These voiles were sold during the season at \$1.35. For this cleanup day, 59c sale all go at, per yd.

**SCOTCH GINGHAM, 49c.**  
A splendid assortment of Scotch gingham, 32 inches wide, in checks, plaids and stripes. For cleanup day at 49c per yard.

**IMPORTED FRENCH RATINE, 98c.**  
A number of pieces of imported French ratine, 40 inches wide. This is a rare bargain. Don't miss it. Regular price of \$1.25. For cleanup day, 98c per yard.

**DOMESTIC VOILES, 29c.**  
One line of domestic voiles, 40 inches wide, good quality and colors, regular price 69c, for cleanup day, 29c per yard.

**30-IN. TISSUE GINGHAM, 47c.**  
A good assortment of 36-inch tissue, splendid quality, good colors and patterns, in checks, plaids and stripes, well worth 85c. For cleanup day, all go at, yard 47c.

### "NO PROFIT" Sales of Silks and Woolens

**Canton Crepes**  
Cost \$2.65, Sale Price \$2.65

Heavy quality all silk Canton Crepes. The season's desired dress fabrics in black. A full line of colors, 40 inches wide.

**FRENCH SERGE,**  
Cost \$1.55, Sell \$1.55  
54-inch fine twill French serges, navy, brown and black.

### "NO PROFIT" Sales of SHOES

Women's brown and black velvety kid oxfords and brown velvety kid 2-strap slippers. Made with Goodyear welt soles and would be a splendid \$4.00 seller. Sizes 2 1/2 to 6, widths A to C. \$1.95. Cost \$1.95.

Child's dongola button shoes in sizes 2 to 5 and 5 to 8, made with heavy turned soles. Cost 98c. \$1.50.

Women's white canvas one-strap with 2 buttons, with a good walking heel, in all sizes, 4 to 8. Cost \$1.80. \$1.50.

### "NO PROFIT" Furniture Selling Monday At "No Profit"

**Walnut Buffet \$49.50**  
60-inch Queen Anne genuine walnut buffet, large linen drawer, dust-proof construction, cost \$49.50 sells \$49.50.

**Extension Tables, \$33.75.**  
54-inch genuine walnut extension tables to match, extends 72 inches, cost \$33.75, sells \$33.75.

**Walnut Chairs at \$6.75.**  
Genuine leather seat walnut chairs to match, cost \$6.75, sell \$6.75.

### "No Profit" Sale Corsets

Elastic girdle, \$4.00.  
Hayden's Custom made elastic girdle, boned with black boning, heavy front clasp, in pink, white and fancy brocade. Classy real values, cost \$4.00, sell for \$4.00.

Sanitary Apron, finest of material, cost \$1.50, sell for 39c. Second Floor.

### "No Profit" Sale Underwear

Gowns and Toggles, \$1.19  
Bath and washroom gowns or toddlers, trimmed with lace or embroidery, cost, price \$1.19, sell for \$1.19.

Little Union Suits, 60c.  
Women's blue union suits, tailored or bodice top, light knee or short bottom, all sizes, cost price 60c, sell \$1.00. Second Floor.

## Just 2 more weeks in which to dispose of this Gigantic Stock of New Fall Wearables

In Our Sensational GOING OUT OF BUSINESS SALE

Every day sees more drastic price cuts—Every day sees some new merchandise arrive and hosts of garments sent to the wrapping counter.

### Now Is the Time to Act!—Now Is the Time to Buy!

The time is short—shrewd women will avail themselves of this extraordinary opportunity to share in the greatest money savings ever attempted in Omaha.
