

Iowa Instructor Urges Training in Citizenship

Development of Useful Americans Is Business of Public Schools, Says County Superintendent.

At yesterday morning's session of the state teachers' association, in the World theater, Miss Agnes Samuelson, page county superintendent of schools, spoke on "Teaching Citizenship in the Public Schools."

At the conclusion of her address, she stressed the following 19 points in teaching citizenship: Health instruction; good manners in home, school and in public; fundamental principles of obedience, kindness, fair play, reverence, truthfulness and courage; responsibility of the citizen to home, school, state and nation; patriotism and flag respect; protection of life and property and respect for authority; thrift, including fire prevention and elimination of waste; charity and corrections; social group, including local history; machinery of government.

"Education today must move under a new banner," said Miss Samuelson. "If all roads are to lead to the goal of citizenship in a world of democracy. Safety of the future lies in the adjustment of the individual to his environment. Hence, the development of useful, intelligent American citizenship is now the business of the public schools."

"Citizenship in the schools can be approached by instilling a love for America, by a study of the country's scenery and natural resources, by teaching the language of the Americans, by a study of America's government, history, inventions, literature, and by a study of economics and civic progress."

"What a Good School Is" was discussed by I. M. Clark, state rural school inspector, before the rural school section at Castle hotel yesterday afternoon.

Too Many Subjects. "Such an ideal institution," he said, "is one that is well organized, well managed and well taught." He asserted that a survey made by the state superintendent during the last year revealed the fact that schools were having too many subjects, that too many subjects were being taught and almost no time given to directed study.

"The management of the school is a community function," he said, "and it behooves all residing in a school community to look well into the affairs and problems of rural education."

Chas. C. Baldrige, Nance county superintendent of public instruction, endorsed the parent-teachers' associations, asserting that they promote a better understanding between parents and teachers of the problems and needs of the public.

"No improvement in school conditions is possible until a strong public opinion approves and demands it," Miss Baldrige said. "No group can so successfully influence public opinion and public school officials as an enthusiastic, interested group of parents. The united strength of a group of parents and teachers is double the strength of an organization composed of either parents or teachers. Full and free discussion of general school problems in a meeting of teachers and parents often solves, without friction, petty, particular problems. Discipline usually becomes easy when a child realizes that father, mother and teacher are only under stand each other, but are working together. Acquaintance with the parents makes possible a more intelligent understanding on the part of the teacher of the children's needs and potentialities."

She stated that Nance county is one of the best organized of the counties in this state in this line of co-operative work between teachers and parents.

Dancing and Card Clubs Condemned by Teacher. Dancing clubs, card clubs and secret societies should have no place in the public high school, according to H. L. Caswell, principal of Auburn high school, who spoke to the high school section of District No. 2, State Teachers' association, yesterday afternoon.

"The schools of Auburn are free from these influences," said the Nance county educator. "When this group of recreational activities enter the school the primary object of the school is not drawn nearer, but is repelled. It is through this group of activities that jealous, cliquishness and snobbery develops. It is here that the students are not under the direct supervision of the teachers."

An international competition for motorless airplanes will be held in Italy in the spring of 1923 under the auspices of the Aero club of Rome. At the same time there will be contests for airplanes with small engines.

Western Teachers Ride in Freight Cars to Reach Convention. Scottsbluff, Neb., Oct. 13.—(Special.)—Those buddies of the A. E. F., who traveled 48 hours at a time, had nothing on the school teachers of Scottsbluff and Gering who, more than 100 strong, left yesterday for the sixth district convention at Alliance by local freight. School boards of the two towns had agreed to make Thursday a holiday if the teachers could reach the convention in time for the opening sessions yesterday afternoon.

The school boards may have thought they were crafty, for no passenger trains run between Scottsbluff and Alliance that would permit that. But the teachers showed their resourcefulness. With the aid of Burlington officials, they chartered the freight as far as Bridgeport, where passenger accommodations were available. The train was gaily decorated with banners.

New Uniform for Legion Is Designed at Bellevue

Eight Representatives of Local Training School to Attend New Orleans Convention.

Eight representatives from Bellevue vocational training school will attend the national convention of the American Legion at New Orleans to spread the gospel of aid to disabled veterans of the great war and assist in promoting the two uniforms, designed and made at Bellevue, for the American Legion and auxiliary.

In the delegation are Mrs. H. M. Shelley, recreational director at Bellevue; Dr. E. E. Coffey, Capt. H. E. McClintock, James E. Collins, Morris C. Watson, Ralph Mercer, Cecil Miller and Adolph Wangelin.

Mercer, Miller and Wangelin set out by flier last Friday.

The two uniforms will be presented to the legion and auxiliary for approval and adoption. The uniform of the women's auxiliary already has been adopted by the Nebraska department.

The suit is of regulation olive drab cloth, with a sort of Norfolk arrangement and has a knicker and skirt combination. The cap is modeled after that worn by the Blue Devils of France. The models who will display the uniform at New Orleans will be Mrs. Kilmartin, Miss Margaret Kennedy, Mrs. N. P. Mettlin, all of Omaha, and a fourth to be chosen at the convention, probably the new president.

The men's suit, shown above, is made of regulation olive drab cloth, and is constructed with an adjustable collar, so that it may be worn on any occasion. An olive drab shirt, black string necktie and tan shoes complete the uniform. The cap is standard A. E. F. style. Models for the men's uniform will be National Commander Hanford MacNider, Col. Sprague of Indianapolis, Col. Reese of Washington and Capt. McClintock of Omaha.

John Kelley, D. S. C., Lincoln, Neb., president of the student body at Bellevue vocational training school, garbed in the proposed uniform for the American Legion designed and made at Bellevue vocational training school.

Congress to Be Called to Meet on November 20

Appropriations and Ship Subsidy Will Be Pushed by President—Call to Be Issued After Election.

By GEORGE F. AUTHIER, Washington Correspondent, Omaha Bee. Washington, Oct. 13.—(Special Telegram.)—November 20 is the date which has been fixed by President Harding for calling congress into extra session. The call will not be issued until after the elections on November 7. The executive's chief purpose in calling the special session now is to avoid a similar one in March. It is believed much preliminary work can be accomplished in the preliminary session now.

The decision on this point has been communicated to senators who have been personally interested in knowing the executive's plans.

The president hopes to have the senate act on the ship subsidy bill at this special session, while the house is working on the appropriations. By the time the appropriations come over from the lower body it is hoped the senate will have cleared the decks so far as ship subsidy is concerned.

Other matters which the president feels inclined to see handled at this time is the anti-lynching bill to secure the country against the activities of lawless mobs.

Harry McGinnis Escapes From Lincoln Reformatory. Lincoln, Oct. 13.—Harry McGinnis, 27, sentenced from Omaha to an indeterminate term in the state reformatory, escaped from that institution yesterday. Up to a late hour last night no trace had been found of him.

Man Kills Brother Chattanooga, Tenn., Oct. 13.—Bob Hamilton was killed yesterday near Pikeville, Tenn., by his brother, Jim Hamilton, after he had shot the latter in the face and hand during what was said to be a family row.

Body Capacity Affects Tuning

Various Methods of Operating Receiving Sets May Eliminate Trouble.

A movement of the hand toward or away from the circuit may effect a decided change in the tune of the circuit. Quite frequently we find operators of regenerative sets who have to hold their hand on the adjustment controls after tuning in a station, as removal of the hand would entirely detune the station. All this can be entirely eliminated by a few extra precautions in mounting the apparatus.

These precautions are not always easy to incorporate, particularly with the table or base-mounted receiving set. In the first place, try to have the greater portion of the circuit actually grounded. This condition calls for the variable tuning condenser to be on the antenna side of the tuning inductor, which with the single circuit system puts the vacuum tube filament and plate circuits at ground potential. The rotary plates of the variable condenser should be connected to the inductor and the stationary plates to the antenna. This will reduce the effect of hand capacity on variable condenser while tuning.

On the panel-mounted receiving sets the shielding against body capacity may be made by coating the back of the panel with tin foil or thin metal sheeting and grounding this by connection to the ground terminal of the set. In addition, all of the rotor shafts or coupling controls should be grounded, care being taken that they are not in any way a part of the circuit. The rotary plates of the variable condensers should always be connected to the side of the circuit which is nearest to ground potential.

Theatricals by Radio. Radio fans in the middle west who may wish to listen in on some theatrical song numbers to be broadcast from Chicago tomorrow night by Ed Wynn, star of "Perfect Fool," may tune their sets accordingly for long distance operation. Word from the Windy City is that Mr. Wynn will open the Radio exposition in the Coliseum by broadcasting the brightest portions of his current production.

Those who listen in on Chicago at 11:30 tomorrow night will hear a first impression of the comedian in his most successful musical vehicle, which is a November looking at the Brandeis theater.

Sparks. It is proposed to increase the number of available wave lengths for broadcasting by varying some of the many 50-meter stations by 25 or more meters.

The sensitivity of an audio tube sometimes may be increased by placing a large horseshoe magnet in a certain position so that the poles of the magnet are on each side of the tube. This probably is due to the magnetic effect upon the moving electrons that flow across from the filament to the plate.

Latter Day Saints Accept Revelation

Independence, Mo., Oct. 13.—(Special Telegram.)—General conference of the Reorganized Church of Jesus Christ of Latter Day Saints, in business session here, voted to accept the revelation presented by President Frederick Madison Smith on the first day of the conference as of divine origin, to become binding upon the church. Yes and nay votes stood 646 for acceptance and 441 for rejection. President Smith retired from the session just before the taking of the vote.

Men—Here's a Shoe as Serviceable as It Looks

A Dressy Oxford for Year 'Round Wear

Freakish shoes fail to hold the favor of the well-dressed man. The popularity of the plainer styles is most apparent. A shoe style to be new need not be freakish. The very plainness of this oxford makes it stylish. The broader toe makes it comfortable. The low price makes it a great value.

PAINS SO BAD WOULD GO TO BED

Two Women Tell How Lydia E. Pinkham's Vegetable Compound Stopped Their Suffering

Iron Mountain, Mich.—"I had terrible pains every month and time had to go to bed on account of them. I saw your advertisement and took Lydia E. Pinkham's Vegetable Compound with very good results. I can work all day long now at my sick time. You may use these facts as a testimonial and I am recommending the Vegetable Compound to my friends."—Mrs. A. H. GARLAND, 218 E. Brown St., Iron Mountain, Michigan.

Xenia, Ohio.—"Every month I had such pain in my back and lower part of my abdomen that I could not lie quietly in bed. I suffered for about five years that way and I was not regular either. I read an advertisement of what Lydia E. Pinkham's Vegetable Compound had done for other women, so I decided to try it. It surely has helped me a lot, as I have no pain now and am regular and feeling fine."—Mrs. MARY DAVIS, Route 7, Xenia, Ohio.

If you suffer as did Mrs. Garland or Mrs. Davis, you should give this well-known medicine a thorough trial.
