

# Two Wonderful Fuels

## HANNA Coal

HANNA COAL has been Omaha's most popular soft coal for years. It is the ideal fuel for the home—practically smokeless, sootless, it leaves very little ash, and holds fire longer than the ordinary grades of soft coal.

For years HANNA COAL sold in Omaha from a dollar and a half to three dollars per ton higher than the best grades of Illinois coal; last year HANNA COAL sold for \$14 per ton, while Illinois coal sold for \$12 per ton.

Today we are able to offer the same genuine HANNA COAL at our special low price of \$12.50 per ton. Higher in quality than the best grades of Illinois coal—yet \$1.50 per ton lower in price. Order your Hanna Coal TODAY and we will deliver it IMMEDIATELY—but don't put off until the mad rush starts.

**\$12<sup>50</sup>**

PER TON

## Petroleum Carbon

PETROLEUM CARBON is the cleanest and most economical fuel available. There is no waste in the form of smoke, soot or ash, every pound is utilized in producing HEAT.

PETROLEUM CARBON is a by-product of crude oil; it contains more heat units ton for ton than the best coal mined. Petroleum Carbon can be burned in any type of furnace and will not damage grates if properly handled; it requires little attention, for Petroleum Carbon will hold a fire for 24 hours.

Economize on fuel and eliminate the disagreeable job of lugging ashes this winter by burning PETROLEUM CARBON. It is 97 per cent HEAT and is positively sootless, smokeless and leaves no ash. Order your PETROLEUM CARBON TODAY, while delivery is certain.
