

The McCook Tribune.

By F. M. KIMMELL.

\$1.50 A YEAR IN ADVANCE.

THE abdication of the Chinese emperor is proclaimed, but the genuineness of the proclamation is doubted.

JAMES W. SCOTT, chief owner of the Chicago Times-Herald, is dead. He was one of America's most sagacious newspaper men.

THE free silver agitation is taking another boom, and is attracting the attention of the administration by reason of its fervor and force.

THE Paris Figaro gives currency to a rumor that Dr. Nansen, the Arctic explorer, has found the North Pole, and that it is situated on a chain of mountains.

THE whiskey trust has been ordered dissolved by Judge Showalter of the U. S. circuit court at Chicago, and the property to be sold to the highest bidder.

THE price of coal oil is steadily advancing so far as the Pennsylvania product is concerned at least. And its uncertainty how high the figure will go that most bothers operators on the oil exchange.

THERE is ample money in the state's permanent school fund to take up the relief warrants, which should not in any manner go begging while almost a half million of the permanent school fund remains uninvested. Keep the interest at home.

THE resignation of Chancellor Canfield of the Nebraska University will be deeply regretted. His departure for Ohio, where he assumes the chancellorship of that state university, July 1st, will be a distinct loss to the state university of Nebraska, at whose head there has never been a brainier or more clever man.

THE talk that a beef trust exists is denied by the journals of that trade, who claim that the cattle are not in the country and that the increase in the price of cattle is due to this fact and to crop failures. The receipts of cattle so far in 1895 are indicating a remarkable decrease, while the price keeps steadily appreciating.

THE decision of the supreme court in exempting holders of municipal, county and state bonds and land rentals from the operation of the income tax, it is stated, will reduce the income of the government from that tax about one-half. Such decisions will not in any measure increase popular respect for the court. The injustice of it is too patent even to a school boy.

THE 217 voters of this city who died in the last ditch with Jacob Burnett at the last municipal election will doubtless be gratified to learn from the Times-Democrat of this city that there were "some of the most respected citizens of McCook in the ranks of the opposition." The Times-Democrat then pours a little brine into the wounds of the opposition—just to make them feel cheerful no doubt—by insinuating something about the "details of a rather ugly job which have been fled away for future reference." THE TRIBUNE is just a little curious. Let the people have those details—if they exist anywhere than in the pregnant and fertile imagination of the writer. Out with the details.

Children Cry for Pitcher's Castoria.

PRESIDENT CLEVELAND has further solidified himself with Wall street in his recent letter on the money question. But not so with the people of the west at least, where the silver sentiment seems to be growing rapidly and permanently.

THE supreme court of this land has not in years made a decision which has been so generally criticized as the recent decision on the income tax law. There is doubtless more law or precedent than common sense in the decision. The moral effect on the masses will be damaging—the wealthy class being the chief beneficiaries.

ONE thing that Nebraska can congratulate herself on her escaping is the avalanche of swollen rivers and floods that is carrying dismay into many quarters of New England and the east. There is no present danger of the Nebraska rivers slipping their banks this year. Between too much moisture and no moisture at all the farmers of the country have a hard time. The happy medium of just moisture enough is what Nebraska prefers.—Bee.

A DISPATCH to the London Times from Shanghai says that Li Hung Chang's son-in-law telegraphs that a peace convention was signed at Shimoneseki, Monday, by the plenipotentiaries of China and Japan. Following are the terms of the convention: 1. The independence of Corea. 2. That Japan retains the places she has conquered. 3. That Japan shall also retain the territory east of the Liao river. 4. That the island of Formosa shall be ceded permanently to Japan. 5. The payment of an indemnity of 100,000,000 yen. 6. An offensive and defensive alliance.

IN THE INTEREST OF BEAUTY.

A Town Should Have Control of Planting and Pruning Trees.

Who is not interested in seeing our streets lined with rows of beautiful trees? What a boon their shade! Trees in a town often have a hard time of it. Poor soil and little or no attention do not conduce to strong and luxuriant growth. But in many towns and cities trees are made to flourish, showing that it is not an impossibility. It is hardly necessary to say that trees will not thrive unless they are treated with an intelligent understanding of their requirements. While every property owner plants a tree or not in front of his property, as it suits him, and retains full control of it, chopping off limbs and otherwise mutilating it as he sees fit, the aspect of our streets cannot improve. The town should take entire control of the planting and pruning of shade trees, and under the direction of some person who has knowledge of their requirements in time long rows of verdure will border our thoroughfares.

Mr. Joseph Meehan, in a paper read before the Pennsylvania Horticultural society, made some useful suggestions as to tree planting in towns. He says:

"As to spring or fall planting, it makes no difference. Unless in localities where the natural soil exists in its original purity it is better to dig out a moderate cartload of soil and fill in with fresh, good earth. Rank manure should not be used at all, but that a year or more old, well decayed, may be mixed with the soil moderately, but good planters think it better that it be not in direct contact with the roots, so unmixd earth is first thrown in to cover the roots.

"It is well known good practice to do some pruning before planting. Just how much is determined by examining the roots. All trees lose more or less roots in digging. If but few are lost, but little pruning of the top is called for; if many are, a good deal of the top must come away. Nonattention to this is the cause of the loss of thousands of trees. Numerous branches make more mouths than the roots can supply, and the trees die. Do not be afraid of a good pruning of the top. There is another reason for pruning at planting. The trees may be unshapely, the branches too low or the top spindling. Pruning or cutting away of branches to remedy these defects aid the roots at the same time."

By J. A. CORDEAL, their attorney. 4-19-95.

Castoria is truly a marvelous thing for the children. Doctors prescribe it, medical journals recommend it and more than a million mothers are using it in place of paregoric, Bateman's drops, so-called soothing syrups and other narcotics and stupefying remedies. Castoria is the quickest thing to regulate the stomach and bowels and give healthy sleep the world has ever seen. It is pleasant to the taste and absolutely harmless. It relieves constipation, quiets pain, cures diarrhoea and wind colic, allays feverishness, destroys worms and prevents convulsions, soothes the child and gives it refreshing and natural sleep. Castoria is the children's panacea—the mother's friend. Castoria is put up in only one size bottle. It is not sold in bulk. Don't allow any one to sell you anything else on the plea or promise that it is "just as good" and "will answer every purpose." See that you get C-A-S-T-O-R-I-A.
