Engineer and Mrs Chambers are visiting in the east.

The railroads of Holland will transport bicycles as baggage, any distance, for 70 cents in their money, equivalent to 28 cents of ours.

This department of the paper does not care what your politics are, but, if you want the latest railroad news of the day, subscribe for THE TRIBUNE only.

A colonization company organized at Sioux City, Iowa, has purchased 20,000 acres of land along the Mobile & Ohio railroad, sixty miles north of Mobile.

Kansas City railroads have unearthed a system of robbing cars of freight in transit which has been operated successfully for several years, at an estimated loss of \$20,000 during the last three years to the roads.

The Southern Pacific's Atlantic system has abandoned the use of brass checks for checking local baggage, substituting cardboard checks attached to baggage by twine. They have proved so satisfactory that they will be continued permanently.

It is reported that the Baltimore & Ohio railroad will soon enter Kansas City, Mo. They will enter over the partly constructed Winner bridge, which is to be finished at once, and by building 100 miles of track they will get direct connection.

The Southern railway has issued a circular directing that employees who have been in its service for a period of one year or more shall be given leave of absence and passes to Atlanta, Ga., to attend the exposition, for themselves, their wives and dependent children. This system has a total mileage of 4,334 miles.

A car of whisky en route east over the Big Four road exploded on the night of September 21st near Leroy, Illinois, and Conductor Murphy and brakeman Muldoon were slightly burned. There were sixty-five barrels in the car, valued at about \$5,000. The car took fire from some unknown cause and the explosion was occasioned by the brakeman knocking in the top for the purpose of pouring in water.

From the recent published statistics of Russian railways we call the following: "The length opened for traffic in the year 1893 was 1,128 miles. This makes the total in operation in that country 21,884 miles, of which 8,225 miles were owned by the government. There are 4,362 miles of double track. These figures include 908 miles of the Trans-Caspian railroad, and 1,317 miles in Finland. At the close of 1893 3,912 miles of new railroad were under construction.

The Muir tunnel on the Northern Pacific, near Livingston, Montana, took fire on September 13th and had to be sealed up. A switchback was immediately constructed over the mountain through which the tunnel runs. A great freight blockade has been caused by this delay and over 500 cars are sidetracked in the yards at Helena alone, with hundreds more at intermediate points. Passenger trains and perishable freight are all that are moving and it will take ten days at least to clear the blockade. The fire is in the center of the tunnel, which is 3,500 feet long.

The ill-fated project for constructing a canal across the Isthmus of Panama is likely, it is said, ere long to enter upon a new and more promising stage. Mr. Philip Weigel, Jr., of New Brunswick, N. J., has, with two other wealthy Americans, formed a syndicate, the object of which is to purchase the entire interest and plant of the Inter-Oceanic Canal Co., with a view of the completion of the work. The sum which these enterprising gentlemen are preparing to put down is stated, on the authority of Mr. Weigel himself, to be no less than one hundred million dollars.
