We Burn Wood

When we can get it. If your subscription is delinquent and you have the wood bring us in a load or two.

Last week, when we were filled with enthusiasm and south wind, we publicly made the assertion that in the event of any unpleasantness between ourself and Great Britain our first move would be to seek our English friend, Joe Bannister, and when we got through with him we would gather his remains together with a garden rake and send them home to his sorrowing family in a clothes basket. Someone with more time than brains notified Mr. Bannister of our personal antipathy toward him, and when the two great nations met in the postoffice, the other night, the crowd knew that war was imminent, and that the Monroe doctrine would be badly disfigured if not knocked out entirely. Our patriotism had fallen about 20 degrees when we met the enemy and we endeavored to argue the matter. He refused to listen to our words of wisdom, however, and expressed (prepaid) a desire to cut us up into fish bait. We finally came to the conclusion that if we had been selected out of the thirteen millions to uphold the honor of the United States, Holbrook included, we would do so, and immediately charged upon the enemy's works, which we found were not as coarse as they might be. We never experienced so much trouble upholding the U. S. and standing on our feet in our life. This upholding business is all right to talk about, but we would sooner fight ten Englishmen that are now in England than one in this country. But we have done our duty and don't wish any praise for it. But if there is any more upholding to be done we will do our fighting with brick bats a half a mile apart, or let Cleveland do it himself, instead of hunting ducks and have us do the upholding.—Johnny Morrissey.

The Burlington has received permission to move its track in Doniphan county, Kansas, and Richardson county, Nebraska. Senator Allen, from the committee on Indian affairs, reported with an amendment a bill granting to the company the right of way over a part of the Sac and Fox and Iowa Indian reservations in the states of Kansas and Nebraska. The report states that the Missouri river has been encroaching upon the Burlington tracks to an extent making relocation necessary, that an agreement has been made between the Indians, who are competent to contract, and the company for removing the tracks to a place of safety. The company stipulates to pay \$25 an acre for the land. The amendment provides that the grantees shall pay the allottees the amount agreed upon within ninety days.

He returned from Haves Center on Wednesday evening.
