We know that in thousands of cases t has proved more than a blessing to spectant mothers. It overcomes morng sickness. It relieves the sense of ghtness. Headaches cease, and daner from Swollen, Hard and Rising Ereasts is avoided. Labor itself is shortened and shorn of most of the pain. We know that many doctors recom-

mend it, and we know that multitudes of women go to the drug stores and buy it because they are sure their physicians have no objections. We ask a trial-just a fair test. There is no possible chance of injury being the result, because Mother's Priend is scientifically compounded. It is sold at \$1 a bottie, and should be used during most of the period of gestation, although great relief is experienced if used only a short time before childbirth.
