## Mother's Friend

does expectant mothers so much good is because it is an external liniment, to be applied upon the outside, where much of the strain comes. It helps because the pores of the skin readily absorb it, and it comes into direct contact with and is absorbed by the parts involved. Morning sickness is quickly banished, and nervousness is kept completely away. The sense of dread and foreboding is not experienced, even during labor itself. Confinement is short and almost without throat and lung diseases. Its early use prevents consumption. Children always like it and mothers endorse it. D. W. Loar.
