IRRIGATION OUT WEST

Department of Agriculture Reviews the Condition in Wyoming.

CANADIAN METHODS ARE STUDIED

Gulding Principle is Security of Title and Use of Available Water for Lasting Benefits to Greatest Number-Progress of Work.

WASHINGTON, March 11.-The Department of Agriculture has issued as bulletin No. 96 a paper entitled "Irrigation Laws of the Northwest Territories of Canada and Wyoming," with discussions by J. S. Dennis, deputy commissioner of public works of Canexpert in the office of irrigation investigations at Cheyenne, Wyo.

The bulletin was prepared under the gation expert in charge of the office of irrigation investigations, who, in submitting the subject matter of the publications to the Department of

Agriculture, stated:

"This publication has been prepared because of a demand for information regarding the Wyoming law and the Canadian northwest irrigation | the instructions it had given Mr. Conscribed in bulletins numbered 58 and 60 of the office of experiment stations. Several of the western states are now earnestly seeking for some way to put an end to the litigation and controversy and to provide some simpler, cheaper and more effective method of establishing titles to streams than is possible through a resort to the courts. The success which has attended the operation of the two laws therein given makes them worthy of study and served as a guide in the framing of the interpretation of the northwest irrigation act are believed to be so sound and fundamental as to be worthy of general adoption. I believe the publication of the bulletin will be of service in pointing the way to muchneeded reforms in many of the arid

The six principles upon which the Canadian northwest irrigation law is based are as follows:

"First-That the water in all streams, lakes, ponds, springs or other sources is the property of the crown. "Second-That this water may be obtained by companies or individuals for certain described uses upon compliance with the provisions of the

"Third-That the uses for which water may be so acquired are "domestic," "irrigation" and "other" purposes, domestic purposes being limited to household and sanitary purposes. the watering of stock, the operation of railways and factories by steam, but not the sale of barter of water for such purposes.

"Fourth-That the company or individual acquiring water for irrigation or other purposes shall be given a clear and indisputable title to such water.

"Fifth-That holders of water rights shall have the protection and assistance of permanent government officials in the exercise of such rights.

"Sixth-That disputes or complaints regarding the use or diversion of water shall be referred to and settled by the officials of the government charged with the administration of the act and that decisions so given shall be final and without appeal."

Deputy Commissioner Dennis in his review of the operation of the Canadian northwest irrigation act based upon these principles, gives briefly but comprehensively an itneresting laccount of the operation of the law. which is in the main successful. He concludes "that while the Canadian laws relating to irrigation are in their bly weak in many respects, the guidprinciple and aim of these laws is security of title and the use of the available water in such manner as to bring the greatest and most lasting benefit to the greatest number."

Prince Ching and Earl Li seem to think that by spreading rumors of the court's unwillingness to return to Pekin, unless this or that thing is done, they can influence the deliberations of the ministers of the powers. RUSSIA ASSERTS IGNORANCE.

Denies Upon Every Opportunity that it Has Designs Upon Manchuria.

WASHINGTON, March 11 .- The official correspondence that has passed between the State department and the several powers interested in the Chinese question discloses the fact that Russia, suspected as she is by England and perhaps by some other powers of planning to seize and hold Manchuria as her own, has upon every occasion, when opportunity served to draw forth a statement of her motives, declared emphatically that she had no such purpose.

On February 16 the United States addressed strong representations to China through Mr. Conger and Prince Ching and Li Hung Chang. China was told that the United States could not approve any secret negotiations between China and any individual power looking to the concession of territory to such power. And, it was further in-Wyoming, and J. M. Wilson, agent and cession of territory should be given only with the assent of all other powers. To still further emphasize the warning against the beginning of direction of Prof. Ellwood Mead, irri- a division of China it was significantly stated that the United States did not regard the present as an opportune time for making any concessions of territory or even for conducting negotiations for such concessions.

On March 1 the State department took steps to acquaint every one of the powers interested in China with ger. The result was to elicit from nearly all of them expressions of approval of the doctrine laid down by the United States, and foremost among the powers which accepted it was Rus-

The United States government has not entered into any secret or open agreement with Great Britain or with any individual power, however strong it may sympathize with the British desire to insure Manchuria against seizure. views the situation in the far east. Well informed Japanese regard Russia's action in Manchuria as a gigantic bluff, inspired by the notion that England's hands are tied in South Africa, but as Germany is only half-hearted in the maintenance of Chinese integrity a coalition with Japan is improbable and Japan is too much embarrassed in her finances to do more than protest and endeavor to secure compensating advantages in Korea.

"China's signature of the Manchurian convention is practically assured," says the St. Petersburg correspondent of the Daily Mail, "because Russia last August sent to the empress dowager 7,500 pounds of bar silver."

A BELGIAN HARE SHOW

It Proved Successful Beyond All Expectations.

BIG AND LITTLE HARES IN PLENTY

The Hare Proposition as Viewed by a Well Informed Farmer-A Murderer Gets Nineteen Years' Imprisonment-Miscellaneous Nebraska Matters.

OMAHA, March 11.-The Belgian

hare show in this city was so well

attended and created such interest that it was prolonged beyond the date first Just how many hares were on exhibition is not known, though not on account of them running around so fast, for all were in cages or in the rabbitry language, in hutches. there were hundreds of them and then

more hundreds, not only from Ne-

braska, but from all adjoining and several far-away states. There were big hares and little hares, brown, golden, red, black and spotted hares, and a number of interesting hare families. As a rule they are gentle, but they have teeth like knife blades and some of the boy hares are great fighters of other boy

A number of farmers were in attendance and bought quite heavily. One of these farmers in discussing the hare proposition said :

"I am of the opinion that the hare is going to be raised extensively by the farmers in the near future. They will not breed for points, but instead, will pay most of their attention to meat stock. I have investigated this question thoroughly and have reached the conclusion that on a farm I can raise a hare to maturity for not to for at least 121/2 pounds on foot, thus yielding a net profit of \$1.15 on each animal. If I care to do my own killing, I can sell the meat at 18 to 20 cents per pound and as a hare of ten pounds will dress seven pounds, I have from \$1.26 to \$1.40 to say nothing of the pelt, which is worth something like 50 cents. You may raise chickens hogs, sheep or cattle, but you can't get any such returns for your money.

"Just now the small hare, weighing eight pounds is more in demand, but inside of a year, when the hare gets down to a strictly meat proposition, as it must, the big fellows will be the high priced ones and will be the ones

Of the hares now at the show, Pro fessor Crabtree, who is recognized as an authority, says that they are as fine a lot as he ever saw on exhibition. Along this line he said:

"I realize that Nebraska was one of the last states to take up the Belgian hare industry, but it has made some rapid strides. In this show the animals average as good as those in Colorado, Kansas and California, where breeders have been in the business for years, ond and it provided for the appoint-There must be something about the! Nebraska climate that does it, for it that the animals are given,"

THE LIVE STOCK MARKET.

Latest Quotations from South Omah" and Kansas City.

SOUTH OMAHA.

Cattle-There was another light run of cattle and the demand being quite lib-eral the market ruled active and steady to strong all around. Beef steers of good quality were picked up early this morn-ing at prices that looked strong as compared with yesterday. Where the cattle just suited them they paid perhaps a little higher prices, but as a rule the sit uation could best be described by calling it a strong, active market. As high as \$5.40 was paid for a bunch of steers, which is the highest price paid in some time. The cow market was also active and fully steady with yesterday. Medium weight heifers or cows of good quality were ready sellers and in some cases brought a little stronger prices today The ordinary run of cow stuff sold fully steady, particularly early in the morning. Bulls were in good demand if the were of good quality and prices could safely be quoted steady to stronger. Calves also brought good firm prices and the same is true of stags. Stockers and feeders did not show much of any change. There were only a few on sale and anything at all desirable met with ready sale at fully yesterday's quota-

Hogs-There was not a heavy run of hogs today and the market started out about 2½c higher than yesterday morning. 'the first hogs sold largely at \$5.37% (95.40, and some prime heavyweights sold as high as \$5.45, or 5c better than yesterday's top. The hogs began moving toward the scales quite rapidly, but before there was time to sell more than half the receipts the market weakened and packers were only offering \$5.22/205.35. The last end of the market was very slow, as the best hogs were sold first and packers were not particularly anxious for what was left.

Sheep-There was just a fair run of sheep here today and the demand was in good shape, so that the market ruled active and steady to strong all around. MEANS EARLY ADJOURNMENT.

Senators Not to Reorganize Committees at Extra Session.

WASHINGTON, March 9,-The republican senatorial conference decided to not reorganize the committees at this session. This means an early adjournment of the senate-probably to-

The conference was without exciting incident, although many speeches were made. Two resolutions were considered and both were voted down. The first was offered by Senator Mason and provided for the immediate reorganization of the committees. Senator Foraker presented the sec-

ment of a committee to consider the basis of a reorganization, to report is not all in the breeding and care at the beginning of the session of congress commencing next December. The majority against both propositions was large. The effect of these two negative votes is to defer all action on reorganization until the December session.

The speeches against organization at this time were all based upon the plea that it meant indefinite prolongation of the present special session. To this argument the reply was made that it was better to take the time for this neessary work now, when only one house is in sssion and no legislation is pending.

The new senators said very little, generally taking the position that they were willing to be guided by the experienced senate leaders.

THE DUTY OF MOTHERS.

What suffering frequently results from a mother's ignorance; or motfrequently from a mother's neglect to

properly instruct her daughter! Tradition says "woman must suffer," and young women are so taught. There is a little truth and a great deal of exaggeration in this. If a young woman suffers severely she needs treatment, and her mother should see that she gets it.

Many mothers hesitate to take their daughters to a physician for examination; but no mother need hesitate to write freely about her daughter or herself to Mrs. Pinkham and secure the most efficient advice without charge. Mrs. Pinkham's address is Lynn, Mass.

Mrs. August Pfalzgraf, of South Byron, Wis., mother of the young lady whose portrait we here publish, wrote Mrs. Pinkham in January, 1899, saying her daughter had suffered for two years with irregular menstruationhad headache all the time, and pain in her side, feet swell, and was generally miserable. Mrs. Pinkham promptly replied with advice, and under date of March, 1899, the mother writes again that Lydia E. Pinkham's Vegetable Compound cured her daughter of all pains and irregularity.

Nothing in the world equals Mrs. Pinkham's great medicine for regulating woman's peculiar monthly troubles.
