He had not supposed that Julian would take the two black men to service so near his own person, and when he found that such arrangement had been made, his first inclination was to hesitate least a suspicion of the slaves' honesty had led the chieftain to place them thus near him. However, after the lapse of a few days, Judah was satisfied that no suspicion was entertained against himself or his companions, and he began to turn his attention to the work he had in hand.

On the morning of the fourth day Julian announced his intention of moving, and gave orders that his men should be in readiness. A spy had arrived during the night with intelligence that a large caravan was on its way from Tyre to Damascus, and the chieftain had determined to intercept it. Some wealthy merchants from Rome were in the approaching train, and it was probable that they bore

Judah knew the characters and dispositions of the two and he felt no uneasiness.

"She must be very near here, my lord. I left her upon this very spot." The chieftain heard a slight rustling behind him; but, not being startled into quick action, before he could turn he received a blow upon the side of the head that felled him to the earth. He was for the moment stunned, and before his reason was clear enough to direct his movements, he was set upon by three stout men, who bound his arms and legs so quickly that his power of resistance was gone before he fairly knew what opposed him.

"Sir Robber," spoke the Israelite bending over the prostrate chieftain, 'you are my prisoner, and henceforth you are in my keeping until I deliver you up to my master. You cannot escape me, so do not trouble yourself with the attempt."

WHITE GIRL AS INDIAN.

She Has Had a Strange Life Among the Blackfeet.

The curious story of a white girl's life among the Blackfeet Indians for 16 years just come out through a suit brought by Alice Burke against Thomas Husson, a cattle rancher of Eastern Oregon to recover a ranch which once belonged to her father, and is now valued at 22,000 dollars, says the "Chicago Herald." Burke and old Husson started to cross the plains from Kansas to Oregon. Burke was detained and sent his girl, then two years old, with night when he was aroused by some Mrs. Husson. Husson sold the child to one moving near him, and on starting a Blackfoot Indian Chief for 12 ponies, and when Burke arrived in Oregon told him that Alice had died. Six years ago Burke died, and the Hussons have been in possession of his ranch. Alice meanwhile grew up among the tribe, and when white people noticed her fine hair, the Indians said she was a halfbreed whose parents were dead. She gained the love of the son of a chief named Fleetwing, who was sent to Carlisle. When he was there Alice took lessons of the Indian agent's wife and kept pace with him in his studies. When the agent was removed she went with him to Boise City, but his wife died, and she had to take a place as a servant, and was a kitchen drudge for many months. Then Fleetwing sent her money, and she returned to the reservation. The revelation of her white blood came when she was an applicant for a place in a big tribal ceremony. Then young Husson appeared and told her the story, but offered her only \$100 for her father's property. She refused and investigated, and is now suing for the recovery of the land. When she gets it she is to marry John Fleetwing.

> wool throughout the world, the lowest known for many years, and the great prostration now prevailing in the wool and sheep industry in every country, except the United States, it is interesting to know how the American sheep farmer fares. He fares best among all his competitors, very much the best. His industry has not been ruined; far than are the sheep and wool producers of the rest of creation. Vastly better off he is than during the disastrous free wool period of 1894-97, and the succeeding two years of a home market over-stocked for foreign wools brought here free of duty. So great was the glut of foreign wool under the Wilson tariff law that it was not until 1900 that our domestic growers began to feel the benefit of the duty on wool restored by the Dingley tariff. Even now there is on hand a considerable quantity of the free wool that was rushed in during the closing months of the Wilson law.

American Protective Tariff league showed some surprising results. Conof 71.44 per cent in the total number of sheep owned and a gain of 121.59 per | in any and all forms, whether by outout of the world's wool markets, Since which calls for a reduction of duties has taken place.

with the sheep of Australia, South America and other wool producing countries? Decidedly not.

On the contrary, the sheep census of 1901, just completed by the American Protective Tariff League, shows:

Number of states reporting ... Number of reports received... 707 Sheep owned, March, 1901...1,464,781 Sheep owned, March, 1900...1,256,738 Gain for 1901......208,043

Percentage of gain for 1900.....16.55 It is found that against an average value of \$3.90 per head in March, 1900, the average value for March, 1901,

It would appear that the American sheep raiser has a marked advantage over the flock masters of the rest of the world. First, he has in his favor a protective tariff, which fixes an irreducible minimum of market value for his fleeces. Unless the foreign grower sells his wool for nothing, he cannot compete with the domestic grower slaves-a prisoner within in the American market. The Dingley tariff takes care of that. Second, the average value per head of American sheep is kept up by the enormous demand for mutton and lambs for food purposes. The American wage earner, when busily employed at high wages, as he has been for three or four years past and now is, consumes from three to thirty times more meat than the other wage earners of the world. He is fond of good mutton and juicy lamb. and he is a tremendous consumer of these meats. In fact, he is the best customer the American butcher has. It is not the rich people, but the wage earners, that keep the butcher shops going. It is no longer possible, as it was in 1896, under Wilson tariff free wool to buy a good sheep for fifty cents. That day has passed, and will come no more as long as the tariff on wool protects the wool grower while the tariff on all lines of production makes times good, wages high and the consuming capacity of 76,000,000 people three to thirty times greater than the consuming capacity of the rest of
