#### A TRUE HERO.

One of the Kind That Gets Little Recognition Here Below.

Did you ever know a hero real well? I know at least one and quite intimately. Who? I am afraid you would hardly recognize his name, and besides it would not be just right to give it here. He is only an old bachelor who works in a shop. He has been at one bench for something like-well, from this you may judge: When he began, he was fresh from school. He lives in a little frame house, with an absurd little back yard hardly more than big enough for the syringa bush and the ash bar-

"The first morning I started for the shop," he once told me, "I cut across the back yard and climbed the fence. I have been doing it ever since, and it has been a long time." In the tiny lawn is worn a deep footpath. The top rail of the back fence is smoothly polished. His feet were the path. His hands polished the rail. And all these years he has worked at the same bench, doing the same work.

Not that he lacks intelligence or that he never had an ambition. Intelligence he most certainly has, no mean lore of books and a wide, generous grasp of affairs and the drift of things. Ambition he had, too, but that was before his feet had worn a path across the back yard. I am quite sure that he once loved. In fact, I suspect that I know the one he loved, and that she loved him. But he never married. She did, though she has been widowed for a dozen years.

But why, you ask, with intelligence and ambition, did he stick to his bench? In an upper room of his little cottage is a window blind which is never opened. Behind that blind, peering out through the shutters with unrecognizing gaze, sits one who bears the outward form of manhood, yet lacks manhood's mental qualities. The one behind the blind is his brother. Downstairs, puttering feebly about and speaking only in high, thin, querulous tones, is a wan and bent old womanhis mother. For the sake of these two he has worn the path in the lawn; for them he put away ambition; for them he stifled the love that once stirred

within him. He is past middle age now, thin as to hair, stooped as to shoulders. Yet is there a tenderness in his voice, a cheerful sweetness in his smile, a patient resignation in his pale blue eyes, that make his manner of such mild gentleness as you might expect in a saint. red light, are: From him comes never a word of complaint; about him is no trace of disappointment, no hint of bitterness.

And so, though few know his name, though he wears no glittering gauus, though he goes his way unhampered by pomp or circumstance and all unrecognized by church or state, I cannot help but count him one of earth's true heroes. Don't you?-Sewell Ford in Brandur Magazine.

# Moses and His Horns.

Did Moses have horns? Certainly not, but if you have ever had the pleasure of examining a copy of Michael Angelo's great picture of "The Lawgiver" you have wondered why the great painter surmounted the patriarchal face, gray beard and becoming priestly gown with a pair of horns much resembling those of a two-yearold animal of the bovine tribe. The reason is this; Jerome's Bible, the Latin Vulgate, tells that when Moses came down from the mountain top his face was "radiant" (rayed) with the great light shining from his pure soul. In the Greek Septuagint the translation said it was "cornua," meaning "radiant." Jerome used this later version in making his Latin Vulgate and translated "cornua" as "cornuta," the last meaning horned. Angelo made his picture accordingly.

# Soil Is a Living Organism.

Formerly the soil was regarded as mineral matter, simply decayed rock mixed with dead organic matter, says an exchange. Now we know that the soil is a living organism whose life is as important as that of the animal or the plant itself. If the soil be killed, it is absolutely sterile. In other words, if the life of organisms which make soil fertile are destroyed the soil is incapable of producing a crop. Plants, as a rule, eat only mineral food, such as phosphoric acid, potash and nitric acid, but animals usually eat only organic foods, such as fats, sugars and protein matter.

His Case Not So Bad After All. "Ah, it's a sad old world," sighed the

man who had been cheated out of \$20. "Yes," assented his neighbor, "One of my horses got his head fast in the hayrack last night and broke his neck. I was offered \$200 for him less than a month ago."

"Pshaw! That's too bad. Looks as though it was going to brighten up, doesn't it?" And he went on his way whistling cheerfully.-Chicago Record-Herald.

# His Revenge.

M. Colombies, a merchant of Paris, had his revenge on a former sweetheart, a lady of Rouen, when he left her by will a legacy of \$6,000 for having some twenty years before refused to marry him, "through which," states the will, "I was enabled to live independently and happily as a bachelor."

Strangers Now.

"You ought to see the lovely letters my husband writes," said the bride of a month to one of her girl friends.

"Oh, I've seen a few," rejoined the, dear girl friend. "In fact, I've got nearly a trunkful of them in the attic."-Exchange.

To box the comblushes is beyond my comprehension. pass means to name all the points in The report does her a grave injustice, order just as fast as you can speak. for as a matter of fact she not only has This is the way an old down east skipno monopoly in blushes, but does not per will rattle it off: North, nor' by man, and the southerner gave his ormake use of the share that properly east, nor'-nor'east, nor'east by north, belongs to her. There are some wo- northeast, nor'east by east, east-nor' men, of course, who blush if you even east, east by north, east, east by south, blink an eyelid in their direction, but east-sou'east, sou'east by east, sou'east, as a general thing men blush much sou'east by south, sou'-sou'east, sou' by more readily and more violently than east, south, sou' by west, sou'-sou'west, sou'west by south, sou'west, sou'west "This is not a random statement that by west, west-sou'west, west by south, I am making for the purpose of hear- west, west by north, west-nor'west, ing myself talk, but a sober deduction nor'west by west, nor'west, nor'west founded on careful observation. For by north, nor'-nor'west, nor' by west,

Can you do it? If a needle is drawn a few times over netized needle through a small cork. Place the cork in a bowl of water, taking pains to see that the cork when it floats on the water will carry the needle in a horizontal position or "on an even keel." Another way is to cut about three inches from a hollow straw (such as is used to suck lemonade) and to push the needle inside the straw. The straw will float and carry the needle. Now observe what happens. The floating needle will slowly swing round till it points north and south. The straw will behave in the same way. Push it in any other direction, and the moment it is free it swings back again.

We do not know who first observed the fact that a floating magnetized needle will point to the north. Nor do we know precisely when or where some unknown inventor used this idea to make a compass. All we know is that the Chinese made and used compasses more than 2,000 years ago.

When men began, perhaps 10,000 years ago, to sail upon the water, they used marks upon the shore to guide them on their way. Long years after they observed that a certain star kept at all times the same place in the sky, and they used this pole star as a guide in steering their ships. Today a steamship starting down the Hudson river he uses the buoys, beacons and other guide marks to steer the ship down the are being fattened in confinement. shut the door." The opening of the ship to the captain, who instructs the go on the roosts until ten or twelve east by north or whatever course he nearest policeman, that the box has the compass, keeps the ship headed in nest boxes.
