### The Culbertson Nursery

Took form in the year 1901, and has been in existence ever since. I take this manner of offering a catalogue to the public and would suggest to all interested to cut this out of the paper and hang it up for future reference. While it is brief, it is specific in naming the tribes, sorts and especially adapted fruit trees, forestry, shrubs and bulbs, absolutely known to be adapted to this country. If you will send me an order, with the money or not at all, I will give you notice of acceptance, and a day ahead of delivery and the trees shall in no wise be in transportation longer than six hours.

#### Information for Your Benefit

All agents are paid a salary ranging from \$50 to \$100 a month and expenses, in effect 25 per cent of the value of the amount of stock sold and delivered by them. Said agents tell you all things are good for all men, therefore help yourself and we will replace your losses free of charge indefinitely and otherwise. I save you this discount and there is no misunderstanding between you and the agent; you deal with me direct.

After twelve years of experience with the Augustus Folla I say to you that it will stand more than any other tree in this country, and it is hardy, and it is a ball-storm or anything else, rapid in growth, makes good hedge, makes a good shade tree and makes good timber, grows to 16 inches in diameter in twelve years, exceeds any tree that is planted in the United States, for the much needed usefulness of any tree grown. Come with me and try a half dozen, three to four feet high, at 20c apiece.

These trees are not grown by irrigation, and if they do not live I will replace them at half price until they live. If you have any doubts as to my responsibility or truthfulness, write to any man in Hitchcock county, Nebraska, and I will abide by what he says. Remember there will be no flap-doodle or jingo discussions created by tree agents, manipulation or ambiguous statements. You will tell your troubles to me direct and thereby find out whether you want to continue business with me.

This catalogue suggests to you the varieties to plant, backed by the experienced tests, and propose and pledge ourselves to replace your losses at half price and the transportation which you must pay.

We further supply any article in nursery stock listed in any other catalogue, in any size or variety you may desire at the same discount, and guarantee and replace at half price. We have many things in stock not mentioned for want of space and unnecessary expense of incorporating them in this catalogue.

I call the attention of the people of McCook to this fact that you can buy of me any house plant, any thing in shrubbery and call me by phone No. 108 at my expense. I am at the door of your homes.

### Where Idols Are Eaten.

At certain seasons in some parts of India it is the duty of every devout person to eat a special sort of confectionery. Every confectioner in October, for instance, has a pole about six feet high at his door, and to this is nailed a great hook about a foot long and thick in proportion. On one side of this is a brisk fire, with a huge earthen pan on it. Before the pan a man may be seen sitting, for nobody stands when he can sit, with a kind of wooden ladle, and with this he briskly stirs a quantity of bubbling, black looking sugar till it becomes quite tough. He then scrapes it together and puts it on a piece of board to cool a little, and then, getting up and dexterously throwing it on the large hook, he begins to pull out the tough substance. He draws it out to the length of four or five feet at a time and throws it back and elongates it again, and so he manipulates it till the mass becomes as white as snow. This composition so treated is manufactured in all sorts of sacred forms—figures of little idols and gods—and is eagerly bought for consumption.—Strand Magazine.

### Ink Froze on the Pen.

The winter of 1683-4 in Europe still holds its place as one of the most severe and remarkable on record. So tremendous was the cold that trees split asunder with deafening reports. The strangest sight of all was on the Thames. Here on more than a foot thickness of ice a thoroughgoing row of streets was erected. There were tailors' shops, butchers' shops, tobacconists, printers and, indeed, many other businesses all being carried on as if they had stood there for years. Writing anywhere but near a large fire was impossible, as the ink froze in pot and on the pen, whole barrels of liquids were frozen solid and wine was sold in one pound blocks. New bread on being taken out of the oven would immediately stiffen and become sold. There were hundreds of deaths from the cold, and throughout the frost the poor suffered miserably.—Pearson's Weekly.

### Little Great Men.

A Chinese who had long studied the works of Confucius, who knew the characters of 14,000 words and could read a great part of every book that came in his way once took it into his head to travel into Europe. Upon his arrival at Amsterdam his passion for letters naturally led him to a bookseller's shop, and as he could speak a little Dutch he civilly asked the bookseller for the works of the immortal Nixofou. The bookseller assured him he had never heard the book mentioned before. "Alas," cried our traveler, "to what purpose, then, has he fasted to death to gain a renown which has never traveled beyond the precincts of China and not one university that is not thus furnished with its little great men.—Oliver Goldsmith.

### First American Play.

The first play written by an American produced in this country, according to the Philadelphia Public Ledger, was the tragedy, "The Prince of Parthia," by Thomas Godfrey, which was brought out at the Southwark theater in the Quaker City in April, 1767, by Lewis Hallam's company, the first organization of players to visit Philadelphia. Godfrey was an ambitious young poet, who died at an early age. His play was above mediocrity and an important part of the volume of his works published in 1765.

### A Use For His Obituary.

A well meaning and conscientious editor on being shown by the man most interested that the death of the commandant was falsely reported in his paper, apologized profusely and offered to make it all right. "We'll print a correction at once," he said.

"Well," said the man who wasn't dead, "perhaps it would be better to let it stand. I'll show it to my friends when they want to borrow money."

### Painful Etiquette.

The royal court of France used to be a great place for etiquette. Louis XIV, once caught a severe cold owing to the fact that on his arising from his bed one cold morning the lord of the chamber, whose duty it was to hand him his shirt, happened to be absent. Not one of the numerous courtiers present had the courage to transgress etiquette by handing the garment to the shivering monarch.—London Scrap Book.

### Indifferent.

"I can't give you an opinion on that question," the statesman replied, "because it's a question I pay no attention to. I am indifferent to it—as indifferent as the backwoodsman's wife. That lady, you know, looked on while her husband had a fierce hand to hand tussle with a bear, and afterward she said it was 'the only fight she ever saw where she didn't care who won.'"

### Going On.

A terrible case of thumping and stamping came from Bob's room early one morning. "Bobby, Bobby," called his mother from downstairs, "what is going on up there?" "My shoes," replied Bob.

### One Drawback.

Olive—What an improvement it will be if the time ever comes when everybody can get a seat in the street cars. Violet—Oh, I don't know. A girl would never be sure then that she was pretty. —Puck.

Some children act as if it were a constant surprise to them that their parents had the excellent taste to pick them out.—Nantucket Inquirer and Mirror.
