

# The "Velie" 30- \$1,750

When you understand the real worth of the "Velie" Automobile; the high standard of its construction, materials, design and workmanship; its extraordinary equipments and its one year's guarantee--as compared with the ninety-day "warranty" on most cars--you will wonder how we can give such value at such a price, \$1,750 complete. There is nothing mysterious about it. The John Deere Plow Co. has a plant out put and buying power, which makes it a simple problem so long as we are content with a modest profit on each car. Let us demonstrate this to you.

### DRUG DREAMS.

Queer Visions Conjured Up In the Brains of Daring Experimenters.

An experimenter with the Mexican drug mescal is rewarded by many and varied visions. Before him flit myriads of dainty butterfly forms, glistening, iridescent, fibrous wings of insects, revolving vessels on whose highly polished concave surface of mother-of-pearl many strange and vivid hues play. There are elaborate sweetmeats in endless and appetizing variety and living arabesques of gorgeous hues and superhuman design.

He may take up a pen for the purpose of making notes, but will find himself unable to use it. A pencil, however, proves easy of manipulation. As he writes his paper is covered with a soft golden light, and his hands, seen indirectly, appear bronzed, scaled, fantastically pigmented and flushed with red.

Tiring of the visions, he may light the gas, which immediately fills the room with a glorious radiance, while wonderfully colored shadows of red, green and violet flit here and there. Generally, it is said, no feeling of depression or physical discomfort follows the dream.

A medical experimenter in Kentucky soon after taking a large dose of hashish began to feel very excited; a feeling of inner joyousness possessed him; all fatigue seemed banished forever, and his mind ran riot, one bizarre idea after another rapidly passing through his mind. Later his brain appeared to split in two parts, one of which urged him to the performance of comic restures, while the other as insistently hinted at impending death and suggested restraint and instant medical advice.

While waiting for a doctor he experienced alternate spells of lucidity and periods when all connections between himself and the outside world seemed to be severed, when a chaos of disjointed ideas and wild reveries obsessed him. The duration of these latter periods was never longer than two minutes, but each seemed an eternity. It appeared a hopeless task to follow the minute hand of his watch during its infinite round; long before the sixty seconds had elapsed he gave up the stupendous task in deep despair. The departure of the doctor synchronized with the return of the feeling of impending death, now most horribly intense.

He imagined himself surrounded by grotesque, menacing, cruel visaged monsters. He felt himself expanding, dilating, dissolving into space, as he ascended steep precipices, covered with Brobdignagian creatures somewhat like lizards, overhanging enormous abysses, the while he was overwhelmed by a horrible, rending, unutterable despair.—Detroit News-Tribune.

### MAKING GOLD LEAF.

The Metal Is Beaten For Hours by Men, Then Finished by Girls.

In one of the downtown business streets may be seen sticking from one of the upper windows a massive arm and hand, the hand grasping a huge hammer and the whole sign gilded. It is the sign of the gold beaters' establishment, where thousands of the gold sheets are turned out after having been packed by girls.

Gold leaf is packed more by the aid of the breath than by the hands. The operation of transferring a sheet of almost transparent gold leaf from one place to another is so delicate that it is possible to do it only by a light puff of the breath. It takes most girls six weeks to acquire this knack, and some girls are never able to acquire it.

The gold reaches the beaters first in wide bars or nuggets and has to be weighed, melted and made into inch wide ribbons before anything else is done. The ribbon is then cut into inch squares and beaten with a hammer wielded by a man. When each leaf has been beaten thin it is transferred to a mold, where it is beaten four hours more. The beating is done with a wooden hammer weighing from seven to eighteen pounds, on a sheepskin cushion, which rests on a granite block. The gold used for beating is usually 22 or 23 carats fine. A little alloy of copper or silver is added to make it spread. It would be impossible, the beaters say, to handle perfectly pure gold.

After the gold has been beaten it is handed over to the girls, who lift the unshaped leaf from the mold with a pair of wooden pinchers, flatten it out on a sheepskin cushion by gently blowing on it, cut it to a perfect square, replace it between the leaves of the book and flatten it out with the breath. There are twenty-five leaves in a book, and a skilled girl can pack seventy books in a day, for which she gets from 2½ to 3 cents a book.—New York Times.

### Logical Result.

On the notice board of a church near Manchester the other day the following announcements appeared together: A potato pie supper will be held on Saturday evening. Subject for Sunday evening, "A Night of Agony."—Manchester Guardian.

### In Later Years.

"We," remarked the young married woman, "try to see how few quarrels we can have in a year."

"We," said the old married woman, "try to see how few cooings."—Louisville Courier-Journal.

### She Does.

Suffragette—We believe that a woman should get a man's wages. Married Man—Well, judging from my own experience, she does.—Boston Transcript.
