Object to Location.

A remonstrance has been circulated and numerous signed objections to the location of the new city dump in the pocket of the canyon north of the city between 2nd and 3rd streets east. The paper will be brought to the attention of the city officials at the session of the council on Monday night next. The chief objection urged is that the smell from the dump will be offensive in warm weather in case of wind blowing from the north. It is further urged that the dump should be located either east or west of the city. No doubt, the authorities will give the petitioners such relief as the case demands.

NOTICE.

The city has provided a new city dumping ground in the canyon north of the north end of 3rd street east. A lane has been fenced from end of the street to the dumping ground, which is also enclosed. All persons interested will please notice. Now is the time to give your premises, alleys, etc., a thorough cleaning after the accumulation of the winter. Kindly give this your attention, citizens. Fred Schlagel, Chief of Police.

Buy the White Line.
This week, F. E. Whitney purchased The White Line Transfer from Elmer Hawkins, and is now in charge. Mr. Hawkins will assist Mr. Whitney for a while, but expects to remove from the city before long. In a few weeks Mr. Whitney expects his brother Earl to arrive from Fort Dodge, Iowa, and he will then be in active charge of the business—having conducted a large dray and transfer business in his present home for some time. Mr. Whitney will, of course, continue his present work as engineer out of McCook. Here's success to the new proprietor.

ENTIRE REPUBLICAN TICKET IS ELECTED

An Unusually Large Vote Was Cast for a Municipal Election

RESULT SHOWS McCOOK WILL BE PLENTY WET

The "Young Turks" Had Their Scimiters Out Bright and Shining and Welded Them With Conspicuous Effect.

McCook's city election passed off, Tuesday, without incident other than the casting of a larger vote than is usual at city elections, and the taking of a more than usually active part by the railroad boys.

The result had been more or less clearly indicated for some days before the voting—and as expected, the entire Republican ticket was successful by substantial pluralities.

The result given below is unofficial—but substantially correct:

	1st	2nd	Plur.
For Mayor—			
Hostetter, R.	212	197	120

Stoll, R.	209	240	271
For Treasurer—

It might be illuminating—if not entertaining—if the real motif could be made known of the disproportionate interest manifested in the city election in unexpected sources.

SOME SOCIAL AFFAIRS.

Mrs. T. B. Campbell entertained the Sunday school classes of Miss Slaby and Miss Thursby, Monday evening. Miss Thursby's class of girls was invited regularly, and the boys then called over from their B. B. C. meeting at Yule Dorwart's. With some hesitation the boys accepted and learned that only the games were of the "April fool" variety. The refreshments were genuine and of the usual excellence of Mrs. Campbell's hospitality.

The Kappa Kappa Gammas met with Mr. and Mrs. C. L. Fahnestock, Monday evening. A seven o'clock dinner was served, the decorative scheme being attuned to "All Fools' Day." START THE SURVEY TODAY.

Messrs. Washington and Roberts Are the Engineers.

John Sandburg of Denver and Messrs. Washington and Roberts of Greeley, Colorado, arrived in the city, last night, and begin today to make the survey of the proposed McCook Irrigation Ditch district.

Messrs. DeRemer & Olson have employed the firm of Engineers Construction Corporation of Greeley, Colorado, to make the survey, etc. Mr. Baker, president of this company, is one of the oldest irrigation engineers in the west. This firm surveyed and had charge of the construction of the Kimball Irrigation district of this state. They have done the surveying and construction engineering on 42 different systems in the west.

The survey just entered upon will show the cross sections of the proposed ditch so that the land owners can know what land exactly can be reached by the proposed system.

Land owners within the proposed district will await with interest the completion of this work; and when the water supply information and other details promised by the state university are ascertained and made public the land owners interested will know just how the matter stands and will be able to act advisedly in this vastly important proposition, which if determined scientifically to be practicable will revolutionize Western Red Willow county and place McCook on the map in capital letters large and dark.
