Commercial Coffee.

Coffee is the easiest thing in the trade to adulterate, even whole coffee being open to suspicion. That which is sold ground at 40 cents a pound is frequently half chicory, the latter being worth about eight cents. While chicory improves the flavor of coffee, according to most tastes, it defrauds the buyer in point of value. As the coffee bean improves with age, it is a good plan when sure of a pure, good article to buy in bulk, then roast and grind as needed.

This practiced every ten or fifteen minutes relieves the muscular tension and rests the eyes.
