The Modern Scarecrow.

The mawkin (scarecrow) nowadays is a poor creature compared with what he used to be, and it is a wouder that any experienced rook consents to be scared by him. Thirty years or so ago he was really a work of art, with a hat, a coat, a stick and sometimes a painted face, feroclous enough to frighten a little boy in the twilight, let alone a bird. Now a rag or two and a "jumble sale" cloth cap are considered sufficient, backed up generally by the argument, which may prove more effective, of a dead rook tied up by the leg to a stick .- Rider Haggard's "Farmy er's Year."
