The problem of how to. control and regulate deboting in the University having been satistactorily solved, it now remains for the student body to do ite ehare toward making these contsgts succesestul. The thing most needed now is moral and financial support from both students and faculty.
Students may support this enterprise by taking an active share in the union debatiog contests, thus preparing themeelves for the larger and more important debater. They should abandon tho idea that a debate is a mere talking contest and shou'd realize that it is an intellectual test worthy of the brainiest man in the institution. It ought to be conaidered as high an honor t) represent the institution in a debating meet. as in a footba!l game. It is only when it is looked upon in this light that debating can take ite true place among colloge contests.

JJNIOR LAWS MEET The Juntor laws met yesteraay to t ransant business relating to the class football team. Mr. Chase was chosen manager of the team. Those of the class who expect to play will begin practice today. :

## TRACK TEAM.

On next Saturday at 2 p . m. a handlcap track meet will be held on Nebrska field. The different events will be pulled off promptly so as not to interfere with the football game which begins at three o'clock.
Following is the list of those entered.

Inferior Printing

Stamps inferiority upon the user. Our work is executed by the most experienced workmenand every order large or small, recelves our careful nearly every Babylonian temple, Di Hilprecht determined that the stage tower existed long before the Semitic invasion and that it was of Sumerian origin. In an early stratum, belonging to a time eight or ten centuries prior to Sargon, 3800 B. C., was found an altar with several inches of ashes of animal sacrifice
Around the altar was a low wall or enclosure. Close by was found a bin contalning several bushels of the same kind of ashes, and not very far away were found several vases probbly used for sacrificial purposes. The altar doubtless was a prominent part of the carliest temple of which at the present there is scarcely a trace. A considerble portion of the temple is yet to be excavated, but from the exact measurements already taken, from the historical inscriptions recovered which give accounts of the building operations of the different kings who restored, rebuilt and made additions to the $t$ emple; and from the contents of the different strata, which have been carefully noted, Professor Hilprecht, aided by his arcfitects, expects to reconstruct the portion of the temple thus far excavated as it appeared in the different periods, and at the same time to give a history of this oldest known sanctuary.

## no joint debate.

There will be no joint debate be ween the two political clubs this year - he Hayward republican club met yesterday and decided not to accept the challenge of the Jeffersonfan club The reason given was that there is so iftle time before election. No student would voluteer to prepare a debate on such short notice, so the matter will be dropped.
Preliminary arrangements wer made by the Hayward club to send out representatives to the meeting of the state league of republican clubs.

All new students of the University should avail themselves of the first opportunity to visit the State Historl cal exhibit in the basement of the library. The Indian relics are espec illy good and well arranged showing samples of many things which the in dians of Nebraska have máde.
E.E. Blackman of the Nebraska His torical society, together with M. J. O Broun of the Minnesota State Histori cal Society, have gone this week to visit the sites of the old Pawnee res ervation on the Loup River.
E. E. Blackman visited the flint mines at Nehawka this week.
