

SIX MEN REMAIN
IN TENNIS TOURNNEY

Chatt, France, Weaver, Ellis, Riley,
and Gardner the Sticklers—
Play Finished Today.

The players in the Tennis Tournament have dwindled down to only six men and if the weather man had not interfered with their plans yesterday afternoon there would have been three more contestants out of the race. Chatt was to play France; Ellis was matched with Weaver and Riley and Gardner were billed for a battle; all matches to have been played yesterday afternoon but on account of the inclement weather the games were all postponed till today. The match between Chatt and France puts the winner in the finals against the winner of the other matches. Ellis will play Weaver, the winner to go into the semi-finals while Riley and Gardner will play for the other place in the

people were seated at this banquet, about fifty of whom were ladies. Up to this year no ladies were allowed to be present at the banquet.

In spite of the European war a number of foreign professors were present at the celebration, others sent their papers to be read while still others were unable to respond to the invitation in any way. Among those present were Professor N. Wille of University of Christiania, Norway; Professor Appel of University of Berlin, as well as Director Johanna Westerdik of Amsterdam, Holland, who was the only foreign woman present, but who made herself more conspicuous than all the American women by her continual smoking of cigarettes.

There is an interesting history connected with this Garden. About 100 years ago Henry Shaw came to America from England. He became wealthy in hardware business and later built a house on his country estate, planting many trees, shrubs, flowers and estab-

semi-finals. The winner of the two latter matches will then play the winner of the Chatt-France match Saturday morning for the University championship.

The five remaining matches will all be good ones as all six men are capable of holding their own against any players in the state and the battles are being keenly watched by the student body.

There were twenty-five girls gathered in the Armory after convocation yesterday morning to arrange for the Girl's Tennis Tournament which will be held soon. Much enthusiasm was shown by those present and it is expected that they will all put up a strong fight for the prize.

BESSEY ATTENDS
BOTANICAL REUNION

Reports a Fine Time at Twenty-fifth Anniversary—Delivers Lecture to Convention.

Dean Bessey reports a very pleasant time at the recent celebration the twenty-fifth anniversary of the Missouri Botanical Garden where he delivered an address on the Phylogenetic Taxonomy of Flowering Plants. In the morning the party went for a long automobile ride and at 1 o'clock lunch was served in the old Shaw mansion. At 2 o'clock, in the Garden lecture room the address of welcome was given by Director Dr. George L. Moore, followed by papers on botanical subjects by Dr. Britton, director New York Botanical Garden; Professor N. Wille of University of Christiania, Norway, and Dr. C. E. Bessey of Nebraska, and others. They then visited the plant house and at 7:30 went to the Trustees' banquet. Four hundred

lishing a greenhouse. This garden was known far and wide as Shaw's Garden. About forty years ago the public were admitted and twenty-five years ago Mr. Shaw willed the garden to St. Louis under the name of "Missouri Botanical Garden."

The garden has many greenhouses, the most interesting of which are, the palm house where palms gathered from every part of the world grow, the economic house in which useful plants as tea and coffee are raised, the floral display house for the flowering plants of great beauty, the Cycad, cactus, banana and orchid houses.

Outside are water, medicine, and rose gardens. The Herbarium there is the largest in America and the library is probably the best and largest in the world.

GIRLS GATHER IN
FRIENDLY MEETING

Met in Art Hall Yesterday Afternoon—
Affair Proved to be a Decided
Success.

Yesterday afternoon from 3 to 5, Art Hall in the Library Building was the scene of a tea given to all University women by Miss Mary Graham. The purpose of this function was to furnish a general get acquainted stunt for the co-eds and also to further the study of art. The greater part of the afternoon was spent in the study of art as represented in the hall itself. Tea, lemonade, and wafers were served in the way of refreshments. The affair proved to be a decided success in spite of the inclemency of the weather.

MAGEE'S

ENGINEERS HOLD
REGULAR MEETING

Under Auspices of Electrical Engineer-
ing Department—Mr. Hoge Gives
Instructive Lecture.

The other evening the Engineering Society held its regular meeting, this time under the auspices of the Electrical Engineering Department. Mr. J. C. Hoge, a former U. of N. student, gave an interesting and instructive illustrated lecture on the A street pumping station of this city.

It is of interest to note that this plant was originally designed and built by Prof. Morse and Dean Richards, two former Nebraska faculty members. Many changes and additions have been made as the demands for

water and power have increased with the growth of the city. The plant is about ten or twelve years old.

Mr. Hoge graduated from Nebraska in 1909 and took a Masters' Degree in Electrical Engineering in 1911.
