FRESHIE-ENGINEERS'

YESTERDAY'S BASEBALL GAME POSTPONED

GARDINER AND ELLIS GET "N"

Win Letter by Going to Finals in Missouri Valley Tournament—Captain for Next Year Will Be Elected This Spring

The Freshmen-Engineer baseball game which was postponed from last Tuesday will be played tomorrow morning at 10 o'clock.

The game will be played on the Athletic field and visitors are invited to attend and support their respective teams. The Engineers have been picked by the dopesters for a victory. They have played good steady ball all season and it is doubtful if the younger artists will be able to defeat them.

Two other games have been postponed, the Aggies-Academics from Wednesday and yesterday's contest between the Laws and the Freshmen. These games will be played off during the coming week. The Freshmen and Aggies will mix tomorrow in their scheduled match. The Freshmen will also play the Engineers on the 25th.

"Chuck" Gardiner and Harry Ellis have qualified for their tennis "N" by virtue of their performance in the Missouri Valley Conference Meet, both being runners up in the singles and doubles. They will be awarded letters at the next meeting of the Athletic Board. The captain of next year's tennis team will also be elected at this time.

IBSEN'S "GHOST" AT TEMPLE THEATRE

Students of School of Drama Score Hit in Norwegian Author's Tragedy

The School of Drama of the University presented "Ghosts" to a well-filled house at the Temple Theatre last evening. This play, indicative of its name, is one of the most morbid tragedies that is ever presented upon the stage. It offers opportunities for splendid character work and the cast more than made good last night. Ibsen in this work has presented a concrete example of the "sins of the father" being visited upon the son. The play is a powerful indictment of immorality.

The work of Essie Jones as Mrs. Alving and Maurice Clark as Oswald, her son, excelled that usually seen in an amateur production. Harold Campbell in the role of the minister did excellent work. The part of the charming and joyful housemaid was ably interpreted by Louise Dobbs, while Carlisle Jones, who took a part in the play only two days ago, gave a very satisfactory interpretation of Jacob Engstrand, the crippled carpenter.

Professor Grummann, in speaking of the play, said: "It was one of the best amateur productions I have ever seen. Miss Jones and Mr. Clark gave some very remarkable character interpretations and the whole cast are to be congratulated upon their work."

Make good money this vacation. You are guaranteed a liberal salary and given a good commission. No capital required. A deposit of \$5 is required to show your good faith. Same returned at expiration of contract. Leave address and phone number with Daily Nebraskan today. Need five more men or women.

White House Professor Discovered It "Hard-times come in cycles, and a Columbia professor has just discovered the logic of it." "Purely cycle-logical, eh?"—Judge.

INCLEMENT WEATHER FRIEND TO SLUFFER

Outdoor Sports and Pleasures Have Been Abandoned While Energy Has Been Expended on Overdue Work

While the present inclement weather has seemed a thing to be looked on with disfavor and referred to with disgust, it really has been a blessing in disguise.

"Fussing," tennis and all such finer sports have had to be abandoned, but think how many back themes are being written, unknowns worked in chemistry, and lessons studied because of this very thing.

SCANDINAVIAN CLUB DISCUSS LUSITANIA

Considerable Feeling Aroused by Discussion of the Affair—Dean Sherman Addressed the Club

Quite a bit of feeling bordering on the intense was the outcome of the Scandinavian Club's attempt to discuss the Lusitania affair. Dean L. A. Sherman gave an interesting discussion on "Scandinavian Letters." Officers were elected for the ensuing year.

Dean Sherman told in an easy and unassuming way of how he came to be interested in Scandinavian literature. One day, by way of diversion, he picked up one of the productions of the Swedish masters and began to translate it. He became so fascinated that he "dropped everything" to begin a study of the language. Special stress was laid upon the love of nature which permeates all northern literature. The speaker emphasized the difficulty of translating Swedish poetry into the English and still preserve some of the spirit, telling how he spent a holiday in translating four lines. The richness of Tegner's poetry was dwelt on especially.

At the business meeting the following officers were elected: President, A. Jensen; vice-president, Knute E. Carlson; secretary-treasurer, Helen Sohlberg; Swedish press correspondent, Prof. J. E. A. Alexis; Norwegian press correspondent, Prof. A. S. Riddervold; Danish and English correspondent, Bennett C. Vig. President A. R. Swenson spoke of plans for the coming year. Dean Sherman was elected honorary member.

When the Lusitania affair came up for discussion the storm broke. A futile attempt was made to adjourn. While no German supporters were present, opinions were given ranging all the way from exemption of Germany's acts, as well as America's negligence. Professor Alexis was so neutral that he refused to discuss even the literary value of President Wilson's message.

BOTANICAL LECTURE

BOTANIST WAS FRIEND OF LATE DOCTOR BESSEY

MISSOURI BOTANICAL GARDEN

Doctor Moore, a Noted Botanist, and Director of the Gardens in St. Louis, to Lecture at the Temple

Dr. George T. Moore, director of the Missouri Botanical Garden at St. Louis, and one of the most noted botanists, delivers an address this evening at University Temple upon the work of the botanical garden which he has in charge. Doctor Moore was born in Indianapolis in 1871, graduated at Wabash College and received his Doctor's Degree at Harvard in 1900. He served as assistant

Dr. George T. Moore.

in cryptogamic botany at Harvard and became physiologist and algologist with the department of Agriculture at Washington in 1901. Doctor Moore has been in charge of botany at the Marine Biology Laboratory, Woods Hole, Mass., for the past ten years in summer school work. He is the discoverer of a method for preventing pollution of water supplies by algae and certain pathogenic bacteria. He perfected the method for inoculating the soil with bacteria which enabled certain crops to use atmospheric nitrogen. He is botanical editor of the American Year Book.

Doctor Moore was a close friend of Doctor Bessey and Doctor Bessey's last journey away from Lincoln was made last fall to attend the celebration of the anniversary of the Missouri Botanical Garden at St. Louis.

Doctor Moore's address on the Missouri Botanical Garden and its services given tonight at the University Temple illustrated with lantern slides. The public is invited.

ORTHOPEDIC HOSPITAL WORK EXPLAINED

Illustrated Lecture to Be Given Before Sociology Class Eight by Doctor Orr

Dr. H. W. Orr will explain the work of the Orthopedic Hospital to the class in Sociology 8 this afternoon at 3:00 o'clock in M. E. 206. The lecture will be illustrated with lantern slides.

Professor from Copenhagen Speaks

Dr. Frederik Ravn, professor of plant pathology in the University of Copenhagen, spoke yesterday afternoon at the University Farm on plant diseases and their relation to heredity. Doctor Ravn is making a tour of the grain sections of the United States, giving talks at various stops.

He—May I come a little nearer?
She—No, I'm afraid you might—
He—No, I promise I won't.
She—What's the use then?—Harvard Lampoon.

TOURNAMENT IN HANDBALL DOUBLES

Games Will Be Played This Week and Next—Consolation Finals in Singles Now On

The handball tournament in doubles will be played the latter part of this week or the first part of next.

The tournament in singles have been played and the completion of the consolation finals is now taking place.

The entries to date for the doubles are Collins and Pascale, Hiltner and Charlesworth, Williams and Clapp, Lindstrum and Beach, and Chat and Ellis.

DANISH PATHOLOGIST ON A VISIT HERE

Dr. Frederick Ravn of Copenhagen a Guest of the University Today

Dr. Frederick Kolpin Ravn, the Danish plant pathologist, arrived in Lincoln Thursday morning. Doctor Ravn is making an extensive tour of the principal grain regions of the United States and in connection with his research work is giving lectures on cereal diseases at several universities.

Prof 3 to 5 p. m. he was to hold a seminar on the general subject, "Heredity and Plant Diseases," in room 311 Plant Industry Hall, a meeting open to all interested in the subject.

The University Faculty Club will tender Doctor Ravn a complimentary dinner at the Temple at 6:30 p. m., Thursday. He is accompanied on his trip across the United States by Dr. Clyde E. Leighty of the office of cereal investigations of the United States Department of Agriculture.

Lincoln Poster Betokens Cheer

Rain may come and rain may go, but the brilliancy of the Lincoln Pageant posters shines on forever. Cadets have railed at the effusions of Jupiter Pluvius (when they had to drill), "fussers" have cursed under their breath the treason of Dame Spring, co-eds have been dismayed by the aqueous conditions, but despite all this, the posters have gleamed "like a good deed in a naughty world." Posted at the most convenient places, with their color and gayety they have silently admonished the discouraged passer-by to "cheer up." The sturdy pioneer looks towards the future with the same undaunted hope as he did when he first saw our campus. The Indians have contracted some of the grouch of their pale-faced brothers. Rising above all, the stately figure of the martyred Lincoln leads a solemnity that should indeed cause the on-looker to ponder and think.

ENGINEERS' SOCIETY

LECTURE GIVEN CONCERNING PAVEMENT CONSTRUCTION

NEW OFFICERS ARE ELECTED

At the Last Meeting of the Year Professor Mickey Lectured—The Financial Report of the Year Favorable

At the meeting of the Engineering Society, held Wednesday evening, Prof. Clark E. Mickey gave one of the most interesting and instructive talks heard by the Engineers this year. Professor Mickey spoke on the subject nearest his heart, "Pavements," and covered the legal as well as the engineering phases of contracts and specifications in a masterly manner.

Following the talk was held the election of Blue Print officers for the coming year and the announcement of the results of elections already held. These are as follows:

Board of Control of the Engineering Society:

W. K. Fowler, president.
J. P. Fairbank, vice-president.
F. W. Norris, secretary.
H. F. Nelson, treasurer.
L. L. Westling.
Officers of the American Institute of Electrical Engineers:
O. J. Ferguson, president.
V. L. Hollister, secretary.
F. W. Norris, student chairman.
J. Buchta, student secretary.
P. M. McCullough, treasurer.

Officers of the American Society of
(Continued on page 3)

COMMERCIAL CLUB DINNER AT Y. M. C. A.

Prof. J. E. LeRossignol, Head of the Department, Acted as Toastmaster—Officers Were Elected

The University Commercial Club gave a dinner at the Y. M. C. A. last night instead of the picnic at Capital Beach, as planned. Prof. J. E. LeRossignol, head of the department of Political Economy, acted as toastmaster.

Following is the toast list:
Prof. O. R. Martin of the School of Commerce—"The Faculty and the Club."

E. J. Althouse—"The Club Picnic."
J. F. Christensen, district manager of a large Eastern corporation—"The Padded Club."

H. K. Burket, president of the Lincoln Commercial Club—"What Your Club Can Do."

Guy E. Reed of the School of Commerce—"The Club and the University."

President R. V. Koupal—"Our Club." Officers for the ensuing semester were elected as follows:

R. H. Van Boskirk, president.
Mr. Miller, vice-president.
E. J. Althouse, secretary.
Mr. Saunders, treasurer.

'15—The Dean and the Registrar are the college's best supporters.

Ex-'15—Meaning that they are a good pair of suspenders?—Princeton Tiger.
