

The Daily Nebraskan

VOL. XV. NO. 44.

UNIVERSITY OF NEBRASKA, LINCOLN, MONDAY, NOVEMBER 15, 1915.

PRICE 5 CENTS.

DR. WINFIELD HALL TO LECTURE HERE

FAMOUS PHYSIOLOGIST HAS MESSAGE FOR ALL STUDENTS

HAS VISITED FIFTY COLLEGES

President of Notre Dame Has Praise for the Service He is Performing A Scientist of International Reputation

Dr. Winfield Scott Hall, of Chicago, physician, scientist and author, will deliver a lecture before the men of the University in the Temple theatre this afternoon at 5 o'clock on "The Sixth Life of Man."

"Do not fear you will overwork me," said Dr. Hall in a letter to Mr. Glenn S. Everetts, president of the University Y. M. C. A., so it is possible Dr. Hall will give one or more of his other lectures before a University audience. His other lectures are: "A Physician's Message to His Daughter," to women, and "From Youth Into Manhood," to high school boys. The noted physiologist has a message for everyone.

Since September 20, Dr. Hall has visited over fifty universities and colleges, mostly southern and eastern, and has addressed one hundred and fifty audiences, aggregating over 30,000 students, men and women.

John Cavanaugh, C. S. C., president of the University of Notre Dame, said to Dr. Hall after his visit there: "In your lecture, on 'The Young Man's Problem,' you are doing a great service for the rising generation. I am convinced that one great source of vice is ignorance about matters presented in your lecture. Priests are constantly giving instruction on these same points but it is a distinct advantage to have their teaching re-enforced by a distinguished physician, expressing himself with the plainness of the laity, and speaking always in a reverential spirit."

Paul Super, general secretary, Y. M. C. A., said to Dr. Hall after his visit to the University of Missouri: "I wish to express our keen appreciation of your visit here. It did a world of good. It is an important part of a man's college course to hear such a series of lectures. The men speak very highly of them."

Dr. Hall is a scientist of international reputation. He has been professor of physiology in Northwestern university since 1895. He received his B. S. degree from that institution in 1887. He received the following degrees: M. D. in 1888, M. S. in 1889, M. D. from the University of Leipzig in 1894, and Ph. D. in 1895. He became a Phi Beta Kappa at Northwestern, and is a member of the Sigma Xi and Alpha Omega Alpha fraternities. He is past president of the American Medical Society of Chicago. He has written a number of books on physiology and sexual hygiene and is considered an authority on these subjects.

Union Holds Initiation

The Union society held initiation Friday night, at which time twenty new members were taken into the society. Next Friday night the annual home-coming program will be held in Union hall, on the third floor of the Temple.

Pre-Medics Give Dance

About one hundred couples attended the annual Pre-medical "hop" in the Music hall of the Temple last Friday night. This was one of the few all-University dances for which the tickets are less than \$1, the price being 75 cents. The action taken by the Pre-medics in this regard only goes to show that such a dance can be given for less than the usual dollar.

Comus Club Dance

The Comus club gave its second dance at the Music hall of the Temple last Saturday night. The club dances are given under the supervision of the University, the same as club dances, this year. Only thirty-six tickets are validated and that will be the maximum number of couples at the club dances, unless the membership is increased.

GIRLS' CLUB HOLDS PARTY

Discuss the Point System—No Action Taken, but a Committee Will Be Appointed to Investigate

Point system was discussed pro and con by the members of the Girls' club at the party, Saturday afternoon. No definite stand was taken as far as the adoption of the system is concerned. It is encouraging to note that the sentiment of most of the girls is favor of it. There is, however, great need of more knowledge of the system as worked out by other universities and how it might be feasible here. A committee will be appointed by the club president, Edna Froyd, to make a thorough investigation of different limits and schedules of the point system, and report at a mass meeting of the club during Convocation.

The objects of the point system are: First, to relieve the few overburdened women who because of their capability are asked to undertake more duties than they can without injury to their health or to their academic work; and second, to distribute among a larger number of women the work which gives them splendid opportunities to develop their powers of organization and their executive abilities.

No girl shall carry more than 20 points at any one time. The proposed assignment of points is as follows:

Y. W. C. A.—	
President	14
Vice president	7
Secretary	8
Treasurer	8
Cabinet member	6
Girls' Club—	
President	14
Vice president	7
Secretary	8
Treasurer	8
Board member	6
Council member	3
Member Dramatic club	1
Major part in play	5
Minor part in play	3
Member German Dramatic club	1
Major part in play	5
Minor part in play	3
Class Plays—	
Major part in play	5
Minor part in play	3
Palladian	2
Union	2
Latin club	2
Tegner club	2
Komensky club	2
German club	2
English club	2

NEBRASKA WINNER OVER JAYHAWKERS

RECORD BREAKING CROWD SEES CHAMPIONSHIP GAME

KANSANS WERE EASILY BEAT

Forward Pass Used to Advantage by Nebraska—First Scoring During Second Quarter—Kansas Fails to Show Expected Strength

By a score of 33 to 0, giving the Cornhuskers the largest margin of any game this season, Nebraska conquered the Jayhawkers on the Lawrence grid-iron Saturday. The weather was ideal for the match and the rooters were divided about evenly between the two teams. The town of Lawrence probably never saw such a crowd as poured into it Saturday to see the over-confident Kansans defeated.

The First Quarter

The Jayhawkers appeared on the field at 2:15 p. m., and the Cornhuskers gave them a long wait in which to grow nervous.

James won the toss. The Cornhuskers defended the east goal.

Corey kicked off to Nielson, who missed the ball and was downed on the Kansas 1-yard line. Lindsay punted to Rutherford on Kansas' 20-yard line. Otoupalik made one yard through line, Chamberlain made three around left. Corey made eight through center and first down. Rutherford made two around right end. Ball on 9-yard line.

Rutherford made three around the right end. Rutherford made no gain on right side. Kansas' ball on her own 5-yard line.

Rutherford made 10 yards around right end but fumbled. It was Kansas ball on her own 10-yard line. Lindsay punted to Rutherford on the 42-yard line. Caley failed to gain. James broke through and broke up a forward pass from Caley. Nebraska's ball on Kansas' 49-yard line. A forward pass, Chamberlain to Caley, was good for 30 yards. Rutherford made 14 yards around right end. Ball on Kansas 10-yard line. Chamberlain made two yards. Rutherford made two on a split formation. Chamberlain made 2 around right end. Chamberlain failed to gain around left end. Kansas ball on downs on her own 3-yard line.

Lindsay punted 52 yards to Caley, who returned 5. Time out for Caley to recover wind. Otoupalik made 2 through line. Shaw made 3. The quarter ended with teh ball on Kansas' 38-yard line.

Score: Nebraska, 0; Kansas, 0.

The Second Quarter

At the beginning of the second quarter a forward pass, Caley to Chamberlain gave Nebraska a touchdown. Chamberlain shook off two tacklers. Otoupalik kicked out to Chamberlain. Corey kicked goal.

Score: Nebraska, 7; Kansas, 0. Groth kicked off ten yards to Moser. Chamberlain made two yards around right end. Cook went in for Caley. Nebraska was penalized fifteen yards for holding.

Lindsay punted to Cook, who returned to the Kansas 37-yard line. Reese went in for Proctor. Kansas took time out. Cook made ten yards. Cook fumbled, but Nebraska recovered. Reese made four yards. Time

Play Given at Regent Miller's

"Believe Me, Xantippe," was given successfully by the Dramatic department in the theatre at the home of Regent J. E. Miller, 1849 C street, Thursday evening. The occasion was a banquet celebrating the twenty-sixth anniversary of Sorosis, one of the prominent woman's clubs of the city. The same play will be given November 19 at the Temple.

Roscoe Pound Defines "Rights"

Roscoe Pound, A. B., '88, A. M., '89, Ph. D., '97, contributes to the October International Journal of Ethics a paper on "Legal Rights," wherein many different meanings of "rights" are given. Dr. Pound, former dean of the Nebraska College of Law, now professor general jurisprudence in Harvard university, is one of America's most profound and prolific writers in legal principles.

GIRLS' HOCKEY MATCH GAME

Upper Class Team Wins by Score of 2 to 1—Lucille Leyda and Camille Kork Stars

The Freshman-Sophomore team went down to defeat when they met the Junior-Senior girls at hockey Friday afternoon on the athletic field. The final score was 2-1, the two goals for the Seniors being made in the second quarter by Lucille Leyda. The under classmen were not able to break through the upper classmen's defense until the last quarter of the game, when a goal was made by Camille Kork.

The excitement of the first match game was responsible for causing some of the team plays to be fumbled, but on the whole the girls kept their heads and played a consistent game. The crisp air was especially invigorating to the players, if not to those in the bleachers on the shady side of the field.

It is hoped that a girls' athletic field can be secured in the near future and more girls allowed the privilege of this open air game another year.

Staff Gets Ice Cream

The masculine members of the editorial staff of the Daily Nebraskan are indebted to the Girls' club for a treat of ice cream after the Girls' club party Saturday afternoon. The recipients of the favor by an unanimous vote, passed resolutions in favor of more frequent meetings of the Girls' club.

To accommodate students in the consolidated high schools, which are springing up over the state the state university senate Saturday morning reduced its requirements in modern languages, permitting students to substitute mathematics. Heretofore, it has been necessary for those entering the university to present six points entrance requirements in modern languages and four points in mathematics. Hereafter students will be required to have ten points of both subjects put together, but not less than four points in each subject. The consolidated high schools place little emphasis on modern languages and pay more attention to mathematics. A committee consisting of Dean Davis, Dr. E. H. Barbour and Prof. F. M. Fling was also appointed to present the work of the Bessey memorial association to members of the university faculty. The alumni association has already taken up the matter.

MECHANICS OF DAILY NEBRASKAN

WORK OF NEWS GETTING ON THE COLLEGE DAILY EXPLAINED

SHOULD GET NEWS IN EARLY

Editor-in-Chief Directs the Policy of the Paper—Managing Editor Supervises Assignments—Special Reporter for Athletics

The Daily Nebraskan is a paper published by and for the students of the University of Nebraska and yet it may be a matter of news to a great many to know just how this paper is conducted.

It is easily understood that the editor-in-chief is the head. To him falls the task of not only directing and supervising the whole publication, but also of writing the editorials which are really reflections of general student opinion.

The managing editor, as the name implies, oversees all the news which appears in the paper. His task is a big one, for he must see each day that there is enough news to fill the space. He makes the assignments, that is, assigns to each reporter some event to run down and write up. These assignments are received in the morning, in order that the reporter may have several hours in which to look up his material. It is necessary that any organization wishing an event published leave word at the office early in the day. There are times when there is not news enough to warrant the next day's publication, yet a paper must be issued. The complaint is then heard that the Nebraskan has nothing in it. This condition would be greatly relieved if the various departments would give their news to the office before giving it to the city papers, and if the different social organizations would send in their social notices.

The managing editor is assisted by two associate editors, whose business it is to read and correct all "stories" and write the "heads." This must be done between 4 and 6 o'clock, since the news is not usually handed in before that time.

The business managers have charge of the advertising, finances, subscriptions and proof-reading. The work of reading proof cannot possibly be done as carefully as for a city paper; because the men who do it are students carry full amount of university work and doing this only as an extra.

Lowest of all in the rank of official position, but of fundamental importance nevertheless, are the reporters, who get the news. This department is divided into a number of sections, the personals, athletics, girls events. And as far as possible a reporter is provided for every department on the campus.

The reporters receive neither remuneration nor credit for the work on the paper, and must cover their assignments in spare time. It sometimes happens that the only time they can get the news article conflicts with a class. This accounts for the fact that the news in the Nebraskan is sometimes a day old.

Aside from the news of the paper, there is the "Forum," a column set
