

SPORTS

DELTA TAUS CHAMPS

The Delta Tau Delta five won the interfraternity basketball championship for 1916 by winning from Sigma Alpha Epsilon last evening in the Armory by a score of 12 to 8. The winners and their opponents will be presented banners by the athletic board. Delta Tau Delta won the championship before, in 1914.

The first half started slow. Engstrom and Flynn jumping about even at center. For several minutes no one scored. Le Bas got the first one when he threw a foul. The Sig Alphas came right back with a goal. The fighting got faster as the men warmed up. Flynn secured a basket and Irwin followed suit by working the old corner game on the Sig Alpha guards. The final score for the half was a foul basket secured by Le Bas. Inability of Hoefler to throw the free ones kept the Sig Alphas from evening the score. The half ended, 6 to 2, in the Delts' favor.

The second half started with both teams full of fire. The Sig Alphas lost several good chances for a basket. Engstrom scored first with a free goal. The Delts scored two baskets in rapid succession, and Le Bas got another free one. Nolan secured a beauty from the center of the floor. The Delts came right back with a ringer. The playing became rougher as the Sig Alphas tried to overcome the Delts' lead, but time was called before they were able to even up. Final score, 12 to 8.

Most of the members of the two competing fraternities and many other spectators witnessed the battle, and rooted when the play became exciting.

The lineup:
Delta Taus— Sig Alphas—
Le Bas.....f..... Hoefler

Irwin.....f..... Corey
Flynn.....c..... Engstrom
Hager.....g..... Emly
Kline.....g..... Nolan

Score: Delts, 12; Sig Alphas, 8.
Goals: Corey, 2; Flynn, 2; Irwin, 1; Le Bas, 3; Nolan, 1.
Foul goals: Le Bas, 2; Engstrom, 1; Hoefler, 1.
Substitutes: Grant for Irwin.
Referee: Campbell.

SELECT ALL-FRAT BASKETBALL SQUAD

The interfraternity basketball tournament was brought to a close last night by the Sigma Alpha Epsilon-Delta Tau Delta game. The tournament has been one of the best undertaken and the games have shown remarkable class for interfrat games.

In picking an all-fraternity team, it is natural to give the division contenders first place, but to limit the team to five men would not be mentioning many men who are of first class calibre. This selection is the result of as fair a comparison of teams and individuals as possible under the conditions upon which the games were played:

FORWARDS

Flothow—Beta Theta Pi.
Pickett—Sigma Phi Epsilon.
Le Bas—Delta Tau Delta.
Schumacher—Alpha Tau Omega.
Selzer—Phi Kappa Psi.

CENTERS

Albrecht—Sigma Phi Epsilon.
Flynn—Delta Tau Delta.
Engstrom—Sigma Alpha Epsilon.

GUARDS

Hager—Delta Tau Delta.
Shaw—Alpha Tau Omega.
Beck—Acacia.
Cook—Phi Kappa Psi.

tire university course without even getting on the gym floor in a track suit and then at graduation they wonder why they feel sluggish and as if they are unfit to actively attack problems which might require some physical endurance. With five months more to develop the muscles and to get good red blood coursing through the veins why is it that so many men never go near the gym or get out into the country and get some exercise? Merely because it is an unwritten law with many students that enough exercise is obtained going back and forth to class. They rise in the morning, walk a block or so to class and return at noon or in the evening without having walked more than a mile. Then at night they are again at the study table until the "wee" hours, then go to bed with a wonder expressed why they do not sleep. The college student is known everywhere by his effort to become a hermit and hibernate during the times when the weather is a bit biting. Then, if ever, is just the time to get into action. You do not have to be on the athletic teams to use the gym, and if you get out just a couple of hours each week studying will become more a pleasure instead of a distaste. From now on, let this be your slogan: "IT PAYS TO EXERCISE."—Purdue Exponent.

DR. BARKER AT WESLEYAN

Dr. F. D. Barker, of the department of zoology, delivered an illustrated lecture on "The Role of Animal Parasites in Disease" before the students of Wesleyan university Wednesday evening.

MAX G. TOWLE

A graduate of the Law college in the year 1914, announces that he is a candidate for the office of Justice of the Peace upon the Republican ticket at the April 18th primaries.

It is desired that all students of voting age having resided in the state six months, county forty days, and the precinct ten days, register at the City hall any day before April 8th and then get out and support Max for this office. —Adv.

The College World

SANGUINE SCIENTIST FINDS DEATH RATE ENCOURAGING
Earth Wouldn't Be Big Enough if Difficulties of Existing Were Much Diminished

University of Washington, Mar. 14.—If one-fifth of all the animals born on earth were to live a normal life, there wouldn't be room enough to hold them all, Prof. Trevor Kincaid told a zoology class recently.

If the elephant family, for instance, had multiplied in a direct geometric ratio, as all animals tend to increase; if each successive offspring had survived the hardships of life and rounded out a normal career, there'd be standing room only on the earth, he said.

"Or, taking it from another angle," he added, "if the salmon family had survived all the adversities that befall a fish, each living an average salmon's life, there wouldn't be enough ocean on the earth to hold them all."

A single tapeworm, according to the Washington zoologist, lays 100,000,000 eggs at a time. So, if every egg should hatch out and the worms grow unmolested, one mother tapeworm could supply every man, woman and child in the United States with a little tapeworm.

Fortunately, however, only a very small percentage of animals born survive, and nature has provided barriers which will always keep the numbers limited properly.

SEE THINGS

See things. There is no other way of getting the best out of life with such a degree of success. The man who sees things takes advantage of his opportunities and accomplishes his plans. We of poor eyesight are likely to say that such a man was lucky in being in the right place when the right opportunity appeared. The truth is he was able to see things.

One of the charges brought against men who have a college education is that they have been trained to understand books, but have not learned to notice with accuracy the practical things of the work-day world. They say (the men who find fault with colleges) that few college men really see things until they have been out in the world for years.

This charge ought not to be true against any man. First of all, he should be taught to observe what is going on about him. Then, as he grows older, whether or not he has a college education, he will be able to make the best of his environment. One must see things to accomplish anything of worth.—University Mis-sourian.

IT PAYS TO EXERCISE

At this time, just at the start of the second semester, there is a splendid opportunity for many students to take advantage of the benefits offered by exercising in the gymnasium. There are a number of Purdue men who probably go through their en-

aye, aye, captain!

To Arms!

"Now listen, girlie, you've been wondering what makes me feel so good lately; whence this store of quivering energy; this keenness of brain; this sparkle in me eye. My dove, there could be but one answer—

Tuxedo

The Perfect Tobacco for Pipe and Cigarette

"Tux" touches the spring that releases the punch—the live wire energy—the get-there spirit. Smoke "Tux" for solid enjoyment, too—for the mellow richness and delicate fragrance of choice Burley, freed from harshness and "bite" by the original "Tuxedo Process." You can smoke "Tux" all day long, if you like, and get a new pleasure and satisfaction out of every pipeful.
