

THE GRADUATES OF 1916

The "Ag" Men

Roland N. Houser will teach Agriculture in the Geneva H. S.

Benj. H. Thompson will return next year to complete work necessary for his M. A. degree. He will be an assistant in the Dairy department.

J. B. Shepherd has accepted a position as dairy specialist with the Great Western Sugar Co. His headquarters are Denver, Colo.

Arthur Anderson will superintend his farm at Oxford, Nebr.

Harold R. Campbell is assisting in the Dairy department.

Fred Taylor is now farming at home near Broken Bow.

Lewis Boyd Rist has accepted the position of assistant county demonstrator for Gage county under Mr. Liebers.

Lewis A. Townsend will teach agriculture in the Curtis School of Agriculture.

Louis Elmer McReynolds will be found at his farm near Ashland.

John Wilhelm Sjogren will be a teacher of agriculture in the Gothenburg H. S.

Jerdin F. Saumann is farming at his home near Diller, Nebr.

Anton W. Skudrna has accepted a position with the Great Western Sugar Refining Co., as chemical analyst.

Rex Truman is engaged this summer in concert work with the Standard Chautauqua Co.

Linus Chase is farming at Pawnee City.

Paul H. Stewart will return in the fall to become an assistant in the Department of Agronomy.

Harry P. Rigdon will return next year to take up his work as graduate assistant in the Department of Botany.

DAIRY BUILDING  
SOON COMPLETED

(Continued from page 1)

bear a high reputation for quality throughout the city, the percentage of butter-fat being always well above the legal requirement. The department also has excellent delivery equipment, several capacious and speedy trucks being utilized to handle the city trade.

The second floor has class-rooms and laboratories and on the third floor in addition to the laboratories is a large lecture room.

The strike of the steel workers on March 12, caused considerable delay, but the work is being rushed now and the building will probably be ready by the time the University opens in September, or at the most, within a short time afterwards.

CHEMISTRY BUILDING  
FUMIGATED UNEXPECTEDLY

During the middle part of last week the atmosphere in one of the laboratories of the Chemistry Department took on a rather smoky appearance due to the fact that many billions of molecules of carbon disulphide took it upon themselves to ionize and unite

with many more billions of molecules of oxygen, forming thereby much carbon dioxide and also an enormous quantity of the well known gas-sulphur dioxide. It is now stated by good authority that all diphtheria, smallpox, hook worm, and various other harmful bacteria either expired or moved temporarily out of the building along with the students, and that the chemistry building is now one of the safest and most desirable places to live in on the campus.

"Where there is beauty we take it, where there is none we make it."—Townsend Studio, 226 So. 11th St.

Yale students produced Wagner's "Die Walkuere" on June 5 in the Yale Bowl at a cost of \$25,000. Metropolitan opera stars, among them Mme. Schumann-Heink and Mme. Melaine Kurt, took leading parts.

Harvard undergraduates held a monster military celebration known as "Preparedness Week," beginning Monday, June 5.

Many public lectures will open the 1916 summer session at the University of Wisconsin to the public outside the university.

Sixteen members of the present faculty of the state university have resigned or obtained leaves of absence for next year.—Uni. of Wash. News Letter.

Freshmen at the state university of Washington have rejected the honor system of examinations.
