

The Daily Nebraskan

VOL. XVI. NO. 158.

UNIVERSITY OF NEBRASKA, LINCOLN, TUESDAY, MAY 29, 1917.

PRICE FIVE CENTS

SUMMER STUDENTS WILL GET DRILL

UNI. WILL CARRY ON SYSTEM OF MILITARY PREPARATION

Acting Commandant Allen Probably in Charge—One Hour Credit May Be Given

Plans are about completed for holding regular military drill in connection with the summer term at the University. Prof. C. J. Frankforter of the department of chemistry, who has been active in the formation of a definite plan for summer drill, made this announcement Monday.

As the plans now stand, drill will be held six days in the week at 7 p. m., under the direction of Ordnance Sergeant Allen, acting commandant, unless he is called into government service. In this event Professor Frankforter, who was colonel of the regiment at the State farm while in school, will have charge. Credit for one semester's drill will probably be allowed students who drill regularly, and students who will be in Lincoln are urged to come around and help make it a success. Students who have had some drill will probably be commissioned, at least as corporals, which will give them both the military training and the experience in drilling other men.

Professor Frankforter will be glad to take the names of students in school now who will turn out for the summer work. The only uniform will consist of an olive drab shirt, which, though not requisite, is considered to be advisable.

OUTLINE WORK AND PURPOSE OF W. A. A.

MRS. JESSIE BEGHTOL LEE SUMMARIZES ORGANIZATION

Complete System of Athletic Awards Is Announced by the Physical Education Department

The newly organized Woman's Athletic association of the University, designed to systematize some of the co-ed sports, was summarized by Mrs. Jessie Beghtol of physical education in a statement made yesterday.

A complete system of point awards offered by the association has been compiled and was announced in connection with the statement, which follows:

"It is the aim of the newly organized women's athletic association to interest every girl in the University in some sport—to provide suitable awards to successful contestants—and to regulate the competitive games and contests according to the newly made plans of the national women's athletic association. To this end, the athletic association has adopted a point system, with the winning of 600 points as its goal.

About Membership

"The membership is open to all the girls of the school who will win 100 points and pay within two weeks of this achievement the entry fee of fifty cents. Any girl who falls thus to signify her intention is automatically dropped from the roll of prospective point winners—and loses her first 100 points. This is done to protect the girls who intend to compete seriously for awards and who must at the same time take the responsibility of managing the association affairs. Awards of white sweaters, with a red "N" on the left side, are to be the reward for the 600 point winners—and each year an additional trophy will be awarded to the girl in the senior class who has made the most points during her four years of college life.

"The affairs of the organization are managed by the customary officers, and a recording secretary who keeps a card catalog of the activities of every member and prospective members, and various sport leaders. These sport

leaders interest girls in the particular sport which they are sponsoring, aid in selecting teams, arrange for matches and public appearances, select officials, and attend to the duties which naturally arise in managing any college activity. Points are awarded, and leaders are appointed for baseball, basketball, soccer, hockey, track and swimming, and the minor sports (in which competition is entirely for individual honor), of dancing, tennis, club swinging, shooting, hiking, and eventually skating."

The final meeting of the year will be held Monday, June 4, at 8 o'clock, in S 102, Armory. New sport leaders will then be chosen and the announcement of the successful contestants for

(Continued on page 2)

\$50 IS LIMIT FOR SORORITY RUSHING

PAN-HELLENIC COUNCIL PROVIDES PENALTY FOR EXCESS

Those Who Go Beyond Amount Set Forbidden to Pledge at Midsemester

Sorority rushing expenses for next summer and fall must not exceed \$50 for each sorority, the Pan-Hellenic council decided at the last meeting of the school year last evening in Faculty hall. Friday from 5 to 6 o'clock was set as the spring pledge day. Prof. Louise Pound was elected chairman of next year's board, the other members of which as selected are Prof. Marguerite McPhee, Acting Registrar Florence McGahey, Miss Edna Perrin and Mrs. Samuel Avery.

The rushing expenses were limited as a result of a recent investigation which showed that the amounts spent last fall totaled over twice that previously decided upon. Itemized bills of rushing next fall will be audited at the office of student activities. Sororities who exceed the \$50 will not be allowed to pledge at midsemester.

Reads at Geneva.—Prof. Alice Howell, head of the department of dramatic art, gave a number of readings at the commencement program at Geneva last Friday evening.

Art Class Work.—The art classes have been making some interesting studies in color of portions of the art gallery. If the weather permits, the rest of the term's work will be devoted to out-door sketching. The art and design classes under Miss Louise E. Mundy are designing labels for jam jars as a practical contribution to the canning courses.

WASHINGTON CAMPUS MAY BE CAMP

Western University Offers Grounds to Government for Naval Drill

University of Washington, May 28.—Use of the university campus as an auxiliary naval training camp this summer has been offered to the federal naval headquarters, following a suggestion of Captain R. E. Coontz, commandant of the Bremerton navy yard. Miller Freeman, formerly in command of the Washington naval militia, suggested the move because of the suitable location of the campus. The offer of the university is in keeping with its policy to give over any of its resources to the government.

The establishment of the camp is contingent upon the resumption of naval militia recruiting. Bremerton would be unable to handle all the men that would be added in this way, and the proximity of the campus to the navy yard, coupled with the fact that by June 15 a water route will be available upon the opening of the Lake Washington canal, makes the campus site satisfactory in every way. The

GIVES OUT PLANS FOR RED CROSS WORK

DIRECTOR REED ANNOUNCES SUMMER COURSE IN FIRST AID

Classes in Red Cross will be given at the University summer school with full credit for all students attending.

The work will be divided in three divisions—first aid, nursing and dietetics. Dean Rufus A. Lyman of the college of pharmacy will give the courses on instruction in nursing and a professor from the school of agricultural will lecture on dietetics.

A lecture or laboratory demonstration will be given daily during the eight weeks of the summer school term according to the course as outlined by Prof. A. A. Reed, director of the summer school.

Peru normal is intending to offer a similar course in Red Cross during the summer session and have conferred with Director Reed as to the best outline for the work.

Dr. R. C. Clapp, of the department of physical education was named chairman of a permanent education Red Cross committee of the local chapter at a meeting of the Lincoln commercial club yesterday.

proposition at present is for the summer only, but Captain Coontz hopes eventually to have a naval training camp established here for university men, lasting through the period of the war.

Paul Weiss, a senior who was with the Great Bear expedition into the Bering sea last summer, is organizing a naval militia unit on the campus and has already the names of over 50 men. This group will train here provided the government accepts the university's offer.

J. L. BOUCHAL, '12, PRAGUE VICE CONSUL, ON HIS WAY TO AMERICA

A letter has been received by Prof. Sarka Hrbkova from John L. Bouchal, '12, who has been vice consul at Prague, Bohemia. Bouchal says that he will report at Washington, D. C., in June and then come to Nebraska

Nebraska Closes Successful Track Season With Missouri Valley Meet

With the highest score ever made by a Nebraska track team in the Missouri valley meet, the 1917 season practically closed last Saturday. Two men will probably be sent to the western intercollegiate meet at Chicago, one week from Saturday, but the work of the team as a whole has been finished.

Too much credit cannot be given to the men of this year's team and to Coach Stewart, not only for the accomplishments of last week but for the work in the earlier meets. With a good nucleus from last year's team and a few sterling performers from the freshmen squad of last year Coach Stewart introduced a new schedule of winter work and developed the machine which proved second only to Missouri Saturday.

Werner a Mainstay
Success of the season's work can be attributed to every member of the team, but the greatest bulk of the praise must go to Charles Werner, the husky sprinter and jumper. This man could have devoted himself to any two events and would have been a star of the first magnitude, but he chose rather to give up personal glory to score more points for the team. His crowning performance was at the valley meet when he took second in individual to Simpson, with 16 points to his credit.

Captain Overman and "Squirt" Owen are two others to whom much of the success is due. A more conscientious worker and careful trainer has seldom captained a Cornhusker team than this year's leader has been. Owen ran the best race of his career last Saturday and pulled a close second to the best

SENIORS TO DECIDE SWEATER QUESTIONS

PRESIDENT KAUFFMAN CALLS MEETING FOR THURSDAY AT 11

Marguerite Kauffman, president of the senior class, has called a meeting for Thursday at 11 o'clock in Law 101, to take action on the senior football sweaters. It was made known yesterday that the class faced a deficit if it paid a bill of \$100 for sweaters given members of the senior eleven, this year's interclass champion.

The trouble came about through the fact that the award was voted to members of the team at what is claimed to have been an unauthorized meeting of the class, in which football men took a prominent part.

The statement has been made unofficially that the athletic board will pay the part due on the sweaters over the amount in the class treasury, which falls considerably short.

CONVOCATION

Dean O. V. P. Stout, dean of the college of engineering, Dean Charles Fordyce, of the teachers' college and Dean E. A. Burnett, dean of the agricultural college, will speak on the war and its relation to the University at the last Convocation of the year in Memorial hall at 11 o'clock this morning.

The speakers will summarize the war and its relation to the University and tell of the ways in which it affects their departments and summarize the work that may be expected of them, to help in carrying the war to a successful conclusion.

This will be the last time the undergraduates will gather together before they leave for home and it is expected that a large audience will hear the addresses which have been arranged.

to visit his parents at Wilber. Mr. Bouchal received his passports some time ago but has only succeeded in getting to France as yet. Mr. Bouchal received an A. B. and an L. B. degree here and left for Prague shortly after graduation.

quarter-miler in this section of the country. His work through the season has been of the highest and his running in the relay teams has been the chief point of success for the team in more than one instance.

Some Dependable Point Winners
Finney, Graf, Reese and Grau have all been dependable as point winners, all of them having won at least two firsts in dual meets. Graf and Reese have had little trouble in winning in all starts, but one, and developments Saturday showed that the Ames team was very lucky to get away with wins over these men. Graf ran an easy race Saturday in the 2-mile, and contrary to early reports, had a lead of more than 100 yards at the finish.

Riddell, Shaw, Bryans, Fuchs, Townsend and Jackson, men who have been on the team for most of the season have proved invaluable in point getting and it was due as much to the work of the first four named, as to any of the members of the team that the Ames team was crowded out Saturday.

Four New Records Made
Four new records have been hung up by the team this year their holders are: Werner, Finney, Graf and Riddell. Werner broke the broad jump record in the Kansas meet when he made a leap of 23 feet, the former record being 22 feet 7 1/2 inches. Finney did the high hurdles in 15 3/5 seconds in the Minnesota meet and again in the Kansas meet. This is 1-5 of a second faster than the former record. Graf ran the two mile in 9 minutes and 52 seconds in the Minnesota meet which lowers the records made in 1909 by 17 seconds. Riddell broke the record for the javelin throw, made last year,

by 12 feet when he hurled it 157 feet 3 inches in the Minnesota meet.

Records that Don't Count

One other record was broken and one tied Saturday but they will not stand, as they were made by men who took second place. Grau ran the half-mile in 1:59:2 which is more than one second better than the present record, and "Squirt" Owen ran the quarter in 50 seconds, equalling Guy Reed's record.

Werner is the only man that is at present sure of not being in school next year. Some of the men may be taken in the draft but all are planning to be back. There are several valuable freshmen coming up. Close followers of track at Nebraska are predicting the best season in track the Cornhuskers have ever had.

BEGIN WORK ON NEW BUILDING

EXCAVATION STARTED FOR AGRICULTURAL ENGINEER LAB.

Expect Structure to Be Completed by Middle of February—Will Be One of Largest in West

Excavation has begun for the new \$135,000 agricultural engineering building on the farm campus, and the first shipment of material is expected today. Most of the material to be used in the construction of the building will be on hand by June 1 and work will be carried on rapidly throughout the summer. The building will probably be ready for occupancy by the middle of February.

The original plan made over a year ago will be followed out with the exception of the framework which will be of concrete instead of steel. The building, which will be situated at the north end of the west quadrangle, will be when completed one of the largest laboratories of its kind and the only one west of the Mississippi devoted exclusively to work in agricultural engineering. It will be equipped with a number of appliances for conducting practical tests of farm machinery which will enable Nebraska students to carry on investigations possible in but few other college laboratories.

One of the features of the new building will be a plot in the basement over one hundred feet long for the conduction of practical tests of farm machinery.

The building will be of the same general design as Bessey and Chemistry halls on the city campus. It will be finished in brick and stone conforming to the general plan to be carried out in campus extension.

WRITES ARTICLE ON STATE COMMERCE

BLACKSTONE INSTITUTE PUBLISHERS ARTICLE BY DR. MAXEY

"The Police Power of the States and Interstate Commerce," by Dr. Edwin Moxey, professor of international law, has been accepted and published by the Blackstone Institute, one of the foremost compilers of legal references.

In his article Dr. Maxey gives a clear-cut analysis of the intricate and involved questions of the powers of the state and interstate commerce commission and traces the development of the question by citation of prominent cases.

Dr. Maxey is the author of "International Law," "Triumph of American Diplomacy," and "Conflict of Laws," and also prepared the article on "Public Laws and Elections," in the Modern American Law.

BOTANY DEPT. MOVING INTO BESSEY HALL

The department of botany has started to move into its new quarters in the Bessey building, and the other de-

OWEN ELECTED TRACK CAPTAIN

GRITTY LITTLE QUARTER-MILER TO PILOT 1918 TEAM

New Captain Has Made a Wonderful Record and Is Expected to Surpass it Next year

Griffith ("Squirt") Owen of Johnstown, Pa., was given the greatest honor in the power of the members of the track team to bestow when he was unanimously elected to captain next year's team. The election took place following the Saturday meet at Ames.

For the past two years Owen has been the Cornhusker's one hope in the quarter-mile and has been the most useful man in the relays. This year he has added the 100-yard dash to the list of his performances.

The most notable performance of "Squirt's" University career was in the meet with Kansas when he ran more than an eighth of a mile without a shoe on his left foot. Not only did he run the last lap of the relay in this way but he won it after starting several yards behind the Kansas man.

In this meet Nebraska took an early lead and held it throughout. It was decided toward the end of the meet that Kansas might as well be given the mile relay by default as Nebraska didn't need the points and probably couldn't win it anyway. Then Coach Stewart conceived the idea that to win the mile relay from the Jayhawks would be the surest way of all to show them how helpless they were. The race was run and "Squirt" put the final straw on the Kansas' camel back when he ran past their fourth man at the finish.

"Squirt," who weighs in the neighborhood of 120 pounds was singularly honored by an Ames sport writer before the meet by being doped to win fourth place in the discus throw.

MEN IN CAMP TRY BATTLE FORMATION

NEBRASKANS AT FT. SNELLING THRIVE ON ARMY LIFE

Fort Snelling, Minn., May 28.—The parade ground here now every day resembles a scene from Pathe's weekly, with hundreds of men in various formations. There are long "firing lines" having 160 men strung out over the plain. The further you are from a big company, the more spectacular appears its drill.

Semaphore signaling takes up regular daily periods.

The semaphore code is simple, and easily learned, but you have to learn it thoroughly.

The Nebraska men are thriving on the military life. Ralph Wagner and Ed. Shoemaker like it better all the time. Herb Reese is happy. Alfred Adams, one of the tallest men in his company, is going fine. K. M. Snyder, '16, Council Bluffs, Ia., has joined the camp.

partments of biological science will begin their abandonment of Nebraska hall as soon as examinations are over. The work of the department of botany will of course be completed for the semester in Nebraska hall.

The date for the formal opening of Bessey hall has not been announced. It will be the first of the new buildings of the city campus to be completed from the campus extension appropriation. The building is dedicated to Dean Charles E. Bessey, late head of the botany department.

Chemistry hall, following closely Bessey hall in point of time of erection, will probably also be occupied when college opens next fall.
