

THE DAILY NEBRASKAN

VOL. XVII, NO. 22.

UNIVERSITY OF NEBRASKA, LINCOLN, THURSDAY, OCTOBER 11, 1917.

PRICE FIVE CENTS

MANY CHANGES MADE IN LINE-UP FOR SATURDAY

Substitutes May Fill Four Positions

HUSKERS OUTWEIGH IOWA

McMahon, Kellogg and Schellenberg Form Speedy Trio Behind Line in Yesterday's Scrimmage

Substitutes will fill at least three and possibly four positions in the Nebraska line when the Cornhuskers meet the Hawkeyes Saturday if yesterday's practice line-up is to be used. Teter and Hubka will be at the ends in place of Rhodes and Riddell, while a substitute will fill Hubka's regular place at right tackle. It is possible that Captain Shaw may not start the game owing to injuries to his hands, but it is highly improbable.

Rhodes may get into the game, but as he has not been in a scrimmage for the past week, it is very improbable. Riddell will certainly not be in the game. Hubka will be moved from left tackle to right end, where he started the game last week and has been playing in most of the scrimmages of the week. Hubka has shown in the few times he has played a tackle position that his natural position is there and it is almost certain that as soon as Riddell gets back into the game Hub will be shifted to Captain Corey's old place.

Speedy Backs in Line-Up

For the first time this season the four star members of last year's freshman backfield were on the varsity at the same time last night, when McMahon, Kellogg and Schellenberg occupied births behind the line and Day held down the center's job. The trio behind the line contains enough speed for any team to get away with the victories if they can be kept in the game. All of them have played important positions on the side lines most of the time during the early stages of the season. The coach is hoping now, however, that they will be able to escape the effects of the jinx and be able to take part in the rest of the games.

Ted Riddell appeared on the field for the first time in over a week last evening, but he had a stiff leather brace on his knee and was sent in after a short signal practice and a jog around the field.

Huskies Outweigh Iowa

According to advance dope the Cornhuskers will slightly out-weight the Iowans. The Hawkeyes have a fairly heavy line, but the backfield is composed of four light, speedy men of the Bergam type, although lacking some of the speed of the Notre Dame star. In Captain Davis the Iowans have a man who is most dangerous in a close game. He is a kicker of known ability and can be counted on to score if within the forty-yard line. He is one of the Iowa boys who is causing the coach a great deal of worry.

Dean R. A. Lyman Speaks At Y. M. C. A. Men's Meeting

Dean R. A. Lyman, of the college of pharmacy, was the speaker at the regular Y. M. C. A. men's meeting last night. A large number of students enjoyed his talk, the central theme of which was, "Why Am I Here?" Dr. Lyman has been in close touch with student life for many years, and his observations as expressed are directly concerned with University men.

"A man's primary purpose in being at school is to secure an education," said Dean Lyman, "but we are prone to permit the everyday routine to overshadow the best things in our lives at college." Many of the finer qualities which we should attain for a well-rounded education cannot come from the study of mathematics, psychology, or other courses in the University curriculum. A man, through personal touch with his fellows in a weekly religious meeting, finds a means of growth which he cannot gain elsewhere. Education does not make good men and women. Religion alone can do this, and it is men with this vision who mean most in the world's life.

The meeting was closed with an appeal for strength of character and loyalty to highest ideals.

NEW DELIAN SOCIETY ANNOUNCES PROGRAM FOR NEXT FRIDAY EVENING

The Delian Literary society will hold its regular meeting at 8 o'clock

on Friday evening, in the banquet room of the Temple. A cordial invitation is extended to all.

The following program will be given:

The Poles in History—Augusta Janosky.

Recitation—Delbert Metzinger.

Piano Solo—Catherine Tool.

Debate—Resolved that every student should participate actively in the athletics of the University—Josephine Strode and Clara Hibbs.

Repairs Engine.—The senior class of the mechanical engineering department has obtained possession of an old gas engine, and is giving it a thorough over-hauling and tuning up, preparatory to putting it into operation again. The engine, although it is nearly five years old, has been run but a very little, and gives promise of good service for some time.

Receive Kimball County Map.—The state department of conservation and soils, which has its office in the University, received a copy yesterday from Washington of the soils map to be used in the new government report of the soils survey of Kimball county. The map is to be carefully checked over by the officials here, corrected, and then sent back to Washington, ready for the engravers.

DEAN STOUT SPEAKS AT MEETING OF ENGINEERS

Gives Illustrated Talk on "Reminiscence of Construction Work"

Dean O. V. P. Stout spoke Tuesday evening before the civil engineering society on the subject: "Reminiscences of Construction Work." The talk was illustrated with photographs of all great construction projects of the world. Dean Stout told also of the positions of several engineers who had graduated from Nebraska University and were now engaged in some of the world's greatest construction projects.

A short business meeting preceded the talk. F. H. Hall was elected vice president of the society. Several new members were taken in.

Professor Chatburn invited the society to accompany Professor Mickey on a trip to the asphalt plant and the city paving.

Dean Stout was the only speaker of the evening. Due to a misunderstanding it was stated yesterday that Chancellor Samuel Avery spoke before the meeting.

To Coach.—Grove Porter, '18, has been chosen as coach for the school of agriculture. The football team was to begin practice Wednesday to prepare themselves for the first game, which is to be October 26, with Fairbury high school at Fairbury. The school has some fast men and the "Aggies" will make a good showing in all probability.

Commissioned.—Doctor A. R. Davis, assistant professor of plant physiology was granted leave of absence to go to the training camp at Fort Snelling. He was commissioned captain in the coast artillery and is now in the east teaching the new recruits how to handle the big guns.

GRADUATE TEACHERS CLUB TO MEET FRIDAY NIGHT—DEAN LUCKEY TO SPEAK

The Graduate Teachers' club will meet Friday night, October 12, in Faculty hall, Temple. There will be a business meeting in the early part of the evening for the discussion of various problems after which the club will be addressed by Dean G. W. A. Luckey on "The Fundamentals of Graduate Study." All members are urged to attend as important business will be brought up at this meeting.

T. H. Smith Resigns.—T. H. Smith instructor at the forge and foundry in the mechanical engineering laboratories, handed in his resignation Wednesday, to take effect the last of the month. He will go from here to take up a new position as instructor in the state university of Minnesota.

Plans for Observatory Complete.—The blue prints for the new astronomical observatory are now complete and are in the hands of Prof. G. D. Swezey. The original plans were made entirely by University professors and the corrected copies were made by Professor Chowins.

IOWA RESERVATIONS FOR STUDENTS CLOSE TONIGHT

Rest of Season Students Will Be Admitted Through South-Central Gate Only

Reservations for students' season tickets for the Iowa game close tonight at 6 o'clock. Up to that time they may be made at the College Book store.

For the rest of the season all students will be allowed to enter the grounds from the south-central gate only. The gate at the main entrance which is usually used will be open only to those outside of school.

The number of season athletic tickets sold on the campus is expected to reach the 1,000 mark in the next week. Since the score of the Wesleyan game and the knowledge of the power of the Nebraska team there has been a rush for tickets as few wish to miss the real games which this promises.

Business men so far have sold about 500 of the season tickets in the downtown district for \$9.50. The student tickets for all football, basketball, and other athletic events may be purchased for \$4 at the student activities office.

Prof. Dickson on Commercial Trip.—Professor Dickson has gone on a two weeks' trip doing commercial work for the Greck-Hobey company, manufacturers of condensed butter-milk.

UNCLE SAM PLANS RECREATION FOR CAMPS

Funds Will Be Raised to Have Proper Recreation and Wholesome Influences Before Men in National Army.

John N. Willys, president of the Willys-Overland company, has just been appointed by Secretary of War Newton D. Baker and Secretary of the Navy Josephus Daniels as chairman of an executive committee which will direct a nation wide campaign for a war camp community recreation fund to represent the true "spirit of America." He will take charge at once and within a few days will have his assistants busy in every part of the United States.

This fund, which is being raised at the suggestion of President Woodrow Wilson, is to provide the "right sort" of recreation for soldiers in the communities near the new and old camps. The work is not a religious one, and, unlike that of other existing organizations, is not conducted inside the camp themselves.

Need \$3 for Every Man
It is the estimation of those in charge of the work that \$3,750,000—\$3 for every enlisted man—will be necessary to maintain the work during the coming year. The fund will be administered by an organization affiliated with the commissions on training camp activities of the war and navy departments.

The recreational facilities of each of the communities are to be organized under the direction of an experienced agent stationed in each war camp community. It will be the duty of this man and his assistants to provide the "right sort" of social contact between the soldiers and the people of the community.

"The spirit with which our soldiers leave America and their efficiency on the battle fronts of Europe will be vitally affected by the character of the environment surrounding our military training camps," said President Wilson, in commenting upon the "Spirit of America" fund.

Will Provide Recreation
Clubroom facilities for the soldiers,

adequate sleeping and restaurant accommodations, facilities for bathing, swimming, baseball and other athletic games are to be provided. Public receptions for incoming soldiers will be tendered, and an effort will be made to have the men affiliate themselves with the churches and fraternal organizations in which they hold membership.

Community concerts and entertainments will be arranged, and every effort made to bring the civilians and soldiers together. Special facilities will be employed to see that relatives of the soldiers visiting the city are given proper care.

It will not be the purpose of the association to compete in any way with wholesome places of entertainment already in operation, but vigorous efforts will be made to close up all resorts of undesirable character.—University of Washington.

E. Mead Returns From Potato Plats.—Doctor Wilcox has just returned from a week's work in western Nebraska digging the potatoes on the experimental plats. The significance of the potato crops is being "rediscovered" as it were. A much increased acreage was planted and a fine yield is now being harvested. Much interest is being shown by growers in the study of potato diseases and in the development of modern methods of storage and marketing.

SAYS CAMP TRAINING STRENGTHENS MEN

In Army Leadership, as in Civilian Life, Must Respect Oneself Before Others Will

By George E. Grimes
Fort Snelling, Minn., Oct. 8.—This day I am going to write something that I have been wanting to write, for a long time—since last spring. Then, with the opening of the first officers' training camps, there were good people who urged young men not to apply for admission, on the grounds that the army life meant almost certain moral ruin.

After one has covered half the period of the training, become thoroughly familiar with all of the men and types of men in the camp, and the conditions of the city near the encampment, it is possible to say, truly, that the tendency of military training is to make a man stronger morally, if he wants to succeed, and the horrible examples that can be produced are no more typical of the training camp than of men as a whole.

(Continued to Page Four)

Returns From Iowa.—Professor Bradford has returned after about a week's trip of extension work in Iowa and will take up his duties as principal of the school of agriculture. He gave lectures at Allison Thursday and Friday to the teachers' institute of Butler county, and on Monday and Tuesday to the Grundy county teachers at Grundy Center.

Rechristened.—The department of agricultural botany has been rechristened under the name of plant pathology and physiology. The new name more exactly indicates the special field of this department namely instruction and research in plant pathology and plant physiology.

HISTORICAL SOCIETY TO DONATE REPORTS TO NEBRASKA MEN IN CAMP

The executive board of the State Historical society, at its meeting Thursday afternoon adopted a general plan for a program for the annual meeting January 15 and 16. The main subject is "Farmer Movements in Nebraska."

The board also voted to donate sets of the Historical Societies reports to the libraries of those training camps where Nebraska men are located.

Films in Conservation.—The state conservation motion picture films were shown at Sutton last night. The meeting was addressed by the Hon. Henry Richards of the state council of defense. The films are now being sent out to various towns under the joint auspices of the state conservation committee and council of defense. The principal purpose of the plan is to present the conservation problems of Nebraska to the public and to avoid wastage.

Conducts Institute.—C. A. Fulmer of the department of education spent the past week conducting an institute at Decorah, Ia.

CENSUS OF CORNHUSKERS TAKEN IN CLASSES TODAY

Questionnaires Distributed Will Show Number of Harvesters

STUDENTS FOR FURLOUGHS

Dr. G. E. Condra, Head of State Conservation Committee Favors Selective Furloughs

To further ascertain the attitude of the students, in regard to the proposed three weeks' vacation or furloughs, all instructors have been requested to distribute questionnaires today among the men students, asking them to give the required information, as to whether the plan meets with the approbation of the student body as a whole, in order that the results may be tabulated.

The board of regents will meet tonight for a discussion of the policy to be followed and this tabulated list of results will be in their hands for consideration. From it they will be able to tell almost exactly the aid which the University would render toward food conservation by closing for the three-week period, and compare that method in services with allowing furloughs to those that would go.

Questions Asked

Every man will be asked to sign his name to four questions, asking whether he has ever husked corn, if he feels he is able to be of substantial service as a Cornhusker, if it would be agreeable to have a vacation from October 29, to November 17, for the purpose of husking corn (this vacation to take the place of Thanksgiving and Christmas holidays), and if he would use the proposed vacation for the essential purpose, and finally, if he would prefer that school go on as usual, and aid be given by the University in making up work lost through this absence.

Dr. Condra's Statement

Dr. G. E. Condra, head of the state conservation and welfare work in Nebraska, stated yesterday that he was in favor of taking an inventory of the University of Nebraska, to determine what men can husk corn. Dr. Condra favors drafting these persons for cornhusking but is opposed to closing the University and permitting men who are not qualified to husk corn, to go here and there, in idleness, by wasting the time which President Wilson has urged should be spent in classes.

The general spirit manifested so far by the students, has been against rather than for the vacation. Many people feel that they would lose valuable time, for which they would be unable to give any valuable service to the state.

Dean Burnett at Omaha.—Dean E. A. Burnett of the college of agricultural has returned from Omaha where he spent several days last week at the National Swine show. He was there as official judge of Duroc Jersey hogs.

Registration for Chorus Will Close This Week

Men, especially tenors, are needed to fill the ranks of the University chorus under the direction of Mrs. Carrie B. Raymond. Arrangements have been made with the University to allow one hour credit for this work and hours for rehearsal will not conflict with drill periods. All those interested in this course may visit the rehearsal in Art hall at 7 o'clock Thursday evening.

A new interest has been added to chorus work this year through the movement to have the chorus sing University songs about the campus and at all activities in which the students are represented. To accomplish this it is necessary to have a large section of male voices.

NEBRASKAN FREE TO UNIVERSITY SOLDIERS

Believing that Nebraska men actively engaged in the war are just as anxious for news from the campus as their former classmates are for word from them, the management of The Nebraskan will send the paper free of charge to every Cornhusker soldier whose address is known. You can help by sending lists of addresses to The Nebraskan, either mailing them to Station A or telephoning them to the business office, B-2567.
