ACHIEVEMENT

Twenty-five years ago the General Electric Company was founded. It has set free the spirit of research. Since then, electricity has sent its thrill through the whole structure of life. It has given tangible form to invention, in apparatus of infinite precision and gigantic power. Eager to turn wheels, to lift and carry, to banish dark, to gather heat, to hurl voices and thoughts across space, to give the world new tools for its work—electricity has bent to man's will. And it has gone forth, co-operating with every industry, to command this unseen force and fetch it far to serve all people. Throughout this period the General Electric Company has held the great responsibilities and high ideals of leadership. By the achievements which this company has already recorded may best be judged the greater ends its future shall attain, the deeper mysteries it yet shall solve in electrifying more and more of the world's work.
