PRICE FIVE CENTS

IVY ARRIVES FROM CASTLE ON RHINE

Will Be Planted by Junior and Senior Classes This Spring

Marcus Poteet and Herbert Reese in Germany Write to Chancellor Avery

The ivy which will be planted this year by the presidents of the junior and senior classes on Ivy Day, will have a story of its own. It was sent by Marcus Poteet and Herbert Reese, former innocents now serving with American Army of Occupation, from the Roland castle situated along the Rhine. The Roland castle is a very famous one for the part it took in ancient warfare. Last year the ivy was sent from the battle fields of France by the same men. The Chancellor received the following letter from Herbert Reese:

Rolandseck, Germany,
March 29, 1919.

Chancellor Avery,
University of Nebraska.

Dear Chancellor:
I am writing this letter in behalf of Lieut. Poteet to let you know we think of our Alma Mater often, and that, on this occasion we are for the second time sending a plant of ivy from "over here." Our glorious adventure overseas has ended with the winning of the war. We think of little these days but of that longed for westward journey to get back to good old America.

Through absence and our experience over here, we have come to know the nobility and greatness of our country. We have become patriotic Americans. The principles for which she stands, her achievements and her justice brings all the admiration of a man's character to surface.

In like manner we have learned to appreciate more fully our Alma Mater, and so, before leaving Germany we are sending this plant of ivy, taken from one of those famous castles on the Rhine—Rolands castle—as a remembrance.

Very sincerely,
(Signed) Herbert S. Reese.

NEW OBSERVATORY MAY BE CONSTRUCTED IN FUTURE

At the meeting of the board of regents Saturday afternoon, April 19th, no definite action was taken in regard to the building program for the university. It is expected that complete plans will be formulated at the next meeting. The only building now in the process of evolution on paper is the new observatory for the courses in astronomy. This building will be constructed some time in the near future, but no definite date has been set for the actual beginning of the work. The premises adjoining the university campus will be cleaned thoroughly this summer. The social science and teachers college building will be ready for occupancy by their various departments by the opening of school next fall.

CONVOCATION

The University Cadet band will be the attraction at convocation in Memorial Hall this morning at 11 o'clock. A part of the University week program will be given. The chorus in a part of their university week program will furnish the music at Thursday's convocation. Students will have the opportunity to hear Nebraska's famous Cadet band this morning at convocation. A number of excellent pieces have been selected to be played. A big crowd is expected.

HOME ECONOMICS HAVE STYLE SHOW TOMORROW

The Home Economics department are preparing for a fashion show, Wednesday evening, April 23, at 8 o'clock. It will be held at the State Farm campus, Agriculture Hall, room 306. A splendid assortment of beautiful garments have been loaned to the department by Miller & Paine. Several of the girls of the department will be the models. Mr. Bjorhman is to have charge of the entire display. Although the fashion show is primarily for girls in the department, all girls and faculty women are cordially invited.

WORLD FELLOWSHIP CLUB WILL BE FORMED TONIGHT

Students Interested in Work of Work of Foreign Field Will Meet at Temple

Tonight at 7:00 o'clock in Faculty Hall, the Temple, there will be a meeting of all students and faculty members who are interested in the organization of a World Fellowship Club in the university. This comes as the result of a need that has been expressed repeatedly during the last year. During the war there was built up throughout the United States what might be called an "international consciousness." People have necessarily become better acquainted with and therefore more interested in the peoples of other lands, and of different colors and languages.

Now that the war is over, unless this international interest is kept up in some way, one of the most valuable by-products will be lost, and are liable to find ourselves living within the walls of our own little backyard just as we used to live. It is the purpose of the World Fellowship Club to keep alive and to develop this world-wide interest.

The Student Volunteer organization endeavors to do this sort of thing, but its membership is confined to those who have definitely decided to go into some sort of foreign work as a life occupation. Membership in the World Fellowship Club is open to all students who are sufficiently interested to come to its meetings.

The movement is being promoted by the two Christian Associations, the Student Volunteers and many other students who are not actively engaged in the work of any one of these organizations. It will be possible to

BIG OPPORTUNITY OPEN FOR COLLEGE GRADUATES

Unlimited opportunities are opening for graduates from the schools of engineering, architecture, and commerce. Several large companies have written to university authorities asking for a limited number of college graduates this year, on the completion of their university course. Mr. H. L. Stevens of the H. L. Stevens Company, 30 North Michigan Avenue, Chicago, writes a letter to Prof. J. E. LeRossignol, head of the School of Commerce and Economics department at the University, which will no doubt be of great interest to commercial graduates and those who are at the present time pursuing that course. Mr. Stevens says:

"We are in a position to take on a limited number of college graduates this year, on the completion of their university course. H. L. Stevens & Company is an organization specializing exclusively in the design, construction, financing, and operation of hotels and we want young men of assured character and ability whom we can develop for executive positions in our organization. We expect the men who come with us to stay for life if they are successful and, for that reason, our requirements are very exacting and rigid as to character, personal habits, and per-

PHI DELTS DEFEAT SIGMA NU 8 TO 5

Sig Eps Trounce Acacia Team 16 to 1 Yesterday on Athletic Field

Delta Tau vs. Farm House and A. T. O. vs. Delta Chi This Afternoon

Phi Delta Theta aggregation upset the dope in inter-fraternity circles yesterday afternoon when it walloped the fast Sigma Nu nine to the tune of 8 to 5.

The game was played on the old M street diamond before a good sized crowd of ball fans. The Sigma Nu's started the fireworks in the second stanza by shoving three runs across the rubber. A big retaliation drive was started by the Phi Deltas in the following frame when seven tallies were registered. The ability of the Phi Deltas to bunch their hits made possible the victory. Smith, hurling the pill for the Phi Deltas displayed good control in the last inning by whiffing three men with three on bases.

Ohde and Mackey, slab artists for Sigma Nu, gave the fans some big league pitching. Rodwell and Brehm were the heavy stick welders for Sigma Nu.

The score:

Phi Delta Theta—8.	ab	h	r.
Maguire, 2b	3	1	1
Kline, 1b	3	3	2
Deering, 3b	3	1	1
Reavis, ss	3	1	0
Smith, cfp	3	1	1
Seymour, lf	2	1	1
McDonald, rf	2	2	1
Koehler, c	2	1	0
Hammond, p	2	1	1
	23	12	8

Sigma Nu—5.	ab	h	r.
Rodwell, 1b	3	3	2
Landale, ss	3	0	0
Mackey, Wm., 3b-p	3	1	0
Munn, M., c	3	1	0
Taylor, cf	3	0	0
Brehm, R. R., lf	3	0	0
Mackey, T., 2b	3	1	0
Brehm, H., rf	2	2	2
Ohde, p	2	2	2
	26	9	5

Umpires—Swanson and Hopkins.

JUNIOR R.O.T.C. COMPET SLATED FOR THURSDAY

Silver Ring to be Awarded for Best Company Drill—Medal for Individual Honors

The annual competitive drill of the Junior R. O. T. C. will be held at the State Farm campus Thursday afternoon. The city campus officers will be much in evidence and every one is invited to attend. The following program will be given:

- Review of Cadet Battalion by Professor H. E. Bradford, Principal of School of Agriculture.
- Individual competitive drill: (Four selected cadets from company).
- Competitive company drill: Company A, Company B, Company C.
- Presentation of sabers by sponsors.
- Awarding of prizes by Professor H. E. Bradford.
- Graduation parade.

Judges in Competitive Drill
Captain C. M. Harris, F. A., U. S. A.
Captain Brian O'Brian, F. A., U. S. A.
Captain Jesse G. Faes, F. A., U. S. A.

- Prizes
- Company drill: Silver ring to be placed on cadet color for winning company.
 - Individual drill: First prize, gold medal; second prize, silver medal; third prize, bronze medal.

PRIZE HUSKER TEAM URGED TO PARTICIPATE IN PENN RELAYS

MAY QUEEN ELECTIONS

Elections for May Queen in which all senior girls may participate will be held Wednesday and Thursday. Each senior girl may nominate one candidate in the Wednesday preliminaries. The five senior girls receiving the highest number of votes will comprise the final ballot, and from these each girl may vote for one in the Thursday election.

MAJOR GENERAL SIBERT WILL DELIVER ADDRESS

Will Participate in Dedicatory Exercises of Semi-Centennial Celebration

Major General W. L. Sibert has accepted the invitation of Chancellor Avery's to deliver the dedicatory address for the new chemical building. Chancellor Avery served under General Sibert in the Chemical Warfare Service last year. The exercises will be held in the afternoon of Ivy Day, May 23, as a formal part of the semi-centennial celebration. The laboratory to be dedicated is regarded as the finest and the most complete plant west of the Mississippi river.

General Sibert was born in 1860, attended the University of Alabama and graduated from the U. S. Military Academy in 1884. His principal technical and scientific work has been in engineering. While his work in this country has been notable, his principal fame rests on the fact that he built the Gatun Locks and Dam, Panama Canal, the west breakwater, Colon Harbor, and the excavated channel from the Gatun Lock to the Atlantic ocean. He was assigned to command a division in France under General Pershing in June, 1917, and was withdrawn from France to push across the chemical warfare program in order to meet the new conditions introduced by the Germans in using gas in their attacks.

His results were so successful that America was able to produce at the time of the signing of the armistice several times as much gas as that produced by all the other warring nations combined. The knowledge of the gas situation on this side of the water as built up by General Sibert is said to have had much to do with bringing about the armistice.

RECOMMENDS FELLOWSHIP FOR GERTRUDE STURMS

A letter has been received from Miss Lucile Eaves, formerly an instructor in the sociology department at the university, concerning the proposed fellowship in social economic research for which Gertrude Sturm, '17, Miss Eaves states that Miss Sturm's qualifications are higher than those of any other candidate, and she sincerely hoped that the board would award the fellowship to the young woman. In her letter Miss Eaves enclosed the necessary blanks which other students may make use of if they are interested in this work. These paid fellowships in social economic research are offered each year by the Women's Educational and Industrial Union to women who wish to thoroughly prepare themselves for such work. Clerical assistance, equipment, and traveling expenses necessary for the investigation required are furnished by the Department of Research. Further information will be gladly furnished by the department of economics at the University of Nebraska.

Nebraska Quarter Milers' Time at Drake Event Fastest in Country this Season

\$400 Must be Raised Immediately if Quartet Competes at Philadelphia Sunday

Will Nebraska send her prize relay team to the Pennsylvania Relays? She will if \$400 can be raised today and tomorrow. After the four Cornhusker stars, McMahon, Gibbs, Ed. Smith and Fuchs had humbled the best teams of the Missouri Valley and the Big Ten Conference in the mile relay, the premier event of the big Drake meet last Saturday, three of the biggest athletic coaches in the country urged Coach Stewart to send this team to Philadelphia. Geo. W. Orton, president of the Pennsylvania Relay Association wired his congratulations and said that the entry list had been closed but Nebraska would be allowed to enter in recognition of the victory at Drake.

The performance of the Husker quarter milers last Saturday completely upset the sport predictions of the west. Their 3:26 for the mile is the fastest time any relay team of the country can boast of this season. Three teams of the Big Ten Conference: Chicago, Michigan and Notre Dame were slated to walk away with the big event, but the Nebraska, Missouri and Kansas runners were 20 yards ahead of their nearest competitors at the finish. Coaches A. A. Stagg of Chicago University, Rockney of Notre Dame, and "Steve" Farrell of Michigan urged the Nebraska mentor to send his quartet to the Quaker meet at any cost.

The phenomenal performance of the Nebraska team is the only reason in the world why the opportunity of attending this year's event has come to them. The entry list was officially closed last Saturday. Michigan, Chicago, Notre Dame, Missouri and K. U. had already entered but Nebraska had been forced to wire her regrets. When, however, the Scarlet and Cream 440-yard men took the measure of the above teams, its presence in the biggest national track event of the year became almost a necessity and the president of the Pennsylvania Relay Association wired immediately that the rules would be set aside if Nebraska would enter.

\$400 Needed

Four hundred dollars will have to be raised today and tomorrow if the Scarlet and Cream quartet is to measure its speed in actual contest with every other first rate university in the country. Four hundred dollars looks like the Hindenburg line did to the Allies in 1917. The condition of the athletic treasury puts it up to Nebraska supporters to come over with the "eagles" if the line is to be smashed. The team will have to entrain tomorrow night if it goes to "Philly," and four hundred berries must be raised, begged, borrowed, plucked, donated and crated in that time.

Cornhusker track fans have never wanted anything so bad as they want to send the boys to "Philly." They are desperate. Wild rumors of mass meetings and other rallies to raise the big "necessary" are floating around. Whatever is to be done will be done quick. Coach Stewart spent yesterday afternoon and evening in stirring up the field and today will have definite plans. Something is going to happen.
