

The Bell

Our idea of a handsome conservative patch pocket suit

SOME men like their style straight. The conservative man likes his diluted with a little simplicity, of which this Hickey-Freeman model is a fine example. Outside of three patch pockets, it is a plain suit of clothes, but there's something in the way it is tailored that is far too exclusive ever to be plain!

Come in and try it on

**OLD MAN "AGWAN"
GAINS POPULARITY**

Campaign for Subscriptions of
Comic Magazine Scoring
Huge Success.

Valuable prizes will be awarded
This Week to Leading
Solicitors.

The AWGWAN sale continues. Starting with Wednesday of last week the opening day of registration at the university forty co-eds entered into the contest for subscriptions which forecasts the greatest number of subscriptions ever entertained by the traditional Old Man AWGWAN.

While no exact figures were to be had up to late Monday night the indications seemed to point to Dorothy Wolfe as the leader of the contestants entered in the big campaign. Verna Buchta and Mary Herzing are contending for second honors as it now appears but the present standing of the contestants may be radically changed by the time set for the end of the campaign Wednesday evening at 6 o'clock.

Among the prizes offered for inducement to solicitors there will be given a handsome leather Nebraska pillow-top for first prize and an athletic ticket for second prize. A 1919-1920 Cornhusker and a year's subscription to AWGWAN will be given those capturing the lesser honors.

This year's AWGWAN is sponsored, as usual, by Sigma Delta Chi, journalistic fraternity. It has the endorsement of the university student publication board and the hearty support of business interests, local and foreign.

AWGWAN has been recognized ever since its first publication in university and publication circles all over the United States as the official "Smile" of Nebraska. It ranks with the foremost of its kind and enjoys a large circulation in the university and wherever Nebraska alumni are to be found.

Students who have already subscribed for AWGWAN may receive this month's issue by presenting their receipts either at Station A, or at the Student activities office, basement of Administration building.

Owing to the fact that only one thousand copies were printed for this

month there are remaining only a few copies which are being readily taken. Subscribers should therefore secure their copies early to avoid disappointment. Any one may subscribe for the university comic with the solicitors or in the Student Activities office, at the regular rate \$1.50 for the nine issues.

**RHODES APPLICANTS
TO APPLY SATURDAY**

During the war in this country the attendance was so slight that many of the colleges were converted into barracks for the men in training. One of the five largest aviation stations of England was maintained at Oxford. The quadrangles were used as drilling grounds, and the colleges as O. C. T. barracks. The American Belgian Relief society was composed almost entirely of Rhodes men and many of these enlisted early in the American Ambulance Corps stationed in Paris. Traveling during the war was not permitted. The first contingent of Rhodes scholars left in January 1920 and the other will take up residence October, 1920.

**HUSKERS TURN OUT
IN LARGE NUMBERS**

Schellenberg, Hubka, and Luman are expected to be out for practice Tuesday afternoon which will make the total.

Previous to Monday's practice only twenty-two freshmen had reported on the field in suits. A complete list of the first year men will be available in a few days.

The Passing of Cinderella

THE quaint little childhood tale of the poor kitchen maid is not so far removed from recent reality.

For we all recall the staggering piles of dishes, the dust-strewn floor, the tubs of clothes, the treadmill task at the sewing machines! Yes, Cinderella-like was the housework of yesterday.

And now, the girl of 1920 looks to electricity—most tractable of handmaidens—as the fairy prince who makes life easier and fuller.

Just a push of the button—and tiny electric motors sweep, wash dishes or clothes; clean, scour and polish; make ice or ice cream, run the sewing machine and play the piano or phonograph.

While the motors do the work, other electric appliances are distributed about the house to make good living more convenient. Electric cooking utensils, hair driers, cigar lighters, burglar alarms, door bells, and furnace regulators, are now operated by the magic wand of electric power.

The development of the miniature motors for the kitchen and electrical devices was made possible by the rapid progress in experience gained by the General Electric Company's Engineers, whose efforts in the application of electricity for every sort of industrial endeavor during the past quarter century have brought freedom from the drudgery of other days.
