ENGINEERING NOTES

Prof. O. J. Ferguson of the engineering college has received a letter from Claudius E. Bennett, electrical engineering, 1909. He is now assistant chief engineer of the Ebro Irrigation and Power Company, at Barcelona, Spain and has charge of the installations and power distribution for the company. The Barcelona plant furnishes electrical energy for Barcelona and 150 towns in the vicinity. Bennett was preceded by several Nebraska men.

Fred L. Hunt, electrical engineering, 1902, in a letter to Prof. O. J. Ferguson desires to be put into communication with a Nebraska engineer as a prospective member of his organization. He is chief engineer of the Turner Falls Power and Electric Company of Greenfield, Massachusetts.

A number of inquiries have been made relative to the senior engineering class. A number of the largest American companies want college graduates for positions as soon as the school term is over. Several companies are sending representatives to interview the seniors. There are opportunities for juniors to do summer work. The Westinghouse Company of Pittsburg, the General Electric Company of Schenectady, New York and West Linn, Massachusetts, the Western Electric Company of Chicago and New York, the H. L. Doherty & Company of Denver and Toledo, the Standard Oil Company, New York office, Western Union Telegraph Company, New York office, the St. Paul Gas Light Company St. Paul, Minn., The Nebraska Telephone Company, Omaha, and the American Telephone and Telegraph Company, of Omaha have made inquiries for men.

"One Sunday In a Life-Time" will be observed at the First Congregational Church next Sunday, February 29. Dr. Holmes will speak especially to the university young people. The chorus choir will furnish special music. All university people are cordially invited.

Dr. Gratz will preach next Sunday at 11 a. m., using as his subject, "February's Extra Day," and in the evening on "Revivals Under Savonarola and John Knox." St. Paul's Church, 12th and M. "The Church with the Chimes."—Adv.

**SHOP UNITS TO TAKE
DIRECT FACTORY FORM**

Step Taken to Allow Students to Study Production Methods at Close Range.

All the shop units of the mechanical engineering department are being correlated into a direct factory form on a production basis. This step was taken in order to allow students to study at close range production methods with all the elements of manufacturing that enter into it.

The war department under the Caldwell bill has provided for the sale of government surplus machine tools to universities at fifteen per cent of their cost. The mechanical engineering department had originally planned to sell the present equipment and replace it with machines bought from the government. Prof. C. A. Sjogren made a trip east recently to select and inspect such machines as could be used in the department at Nebraska. He found that most of the types and sizes of machines that could be used here had previously been disposed of. The Belgian government and the United States arsenals had had first pick of the best of the smaller tools. However, a few machines have been selected but the old equipment could not be repaired.

It is planned to manufacture a gas engine on a production scale in the department. The engine is of a two-cylinder navel type.

The insignia of this honorary Greek letter fraternity will be like that of other similar organizations, namely, a key.

On his trip east Professor Sjogren visited supply depots in Detroit, Rochester, Cleveland, Rock Island, and Chicago. In Chicago there were \$50,000,000 worth of machine tools, most of which were large and used for special purposes. Many of the machines were used to make the French seventy-five shells. The ordinance department had more tools for sale than the quartermaster, aircraft or signal corps as it was a larger user of these machines which could only be used for special purposes.

**WOLOCHI CAMP FIRE
GIRLS TO ORGANISE**

The Wolochi Camp Fire girls have made plans to get in touch with all Camp Fire girls on the campus and in this way effect an organization of all university Camp Fire girls. All girls who wish to become active members of Camp Fire and either to learn about the work or work for degrees are invited to join the group of active Wolochi girls. This group is essentially a guardian's training class. It will be organized as a real Camp Fire and conducted as such.

The Wolochi Camp Fire was formed three years ago and each year a different group of girls has made up the membership. Many of the one-time Wolochi girls have expressed a desire to be connected with the group while they do not have the time to take an active part in the work. For these girls an alumnae group is being formed.

Ruth McKenney is the secretary of this group and all former Wolochi girls who wish to renew their connection with Camp Fire are asked to communicate with her. The Wolochi Camp Fire also wishes to reach all the girls who have been Camp Fire girls or guardians in their home towns. These girls are asked to leave their names and addresses at Miss McKinnon's office in the Woman's Hall. According to this plan all the Camp Fire girls on the campus will be reached. Mrs. F. F. Teal is guardian of the Wolochi Camp Fire and leader of the work on the campus.

**FOUR TEAMS LEFT
IN PENNANT RACE**

(Continued from Page One.)
ter for the Belts Wymer connected for two baskets. Anderson and Carman starred for the Sig Eps. The playing was fast all through the game and the result was in doubt until the final whistle sounded.

Alpha Sigma Phi had little difficulty in winning over Phi Kappa Psi, 19-11. The winners took the lead from the start and were never headed. Only four field goals were registered by the Phi Psi team while the Alpha Sig flippers hit the hoop for eight counters. Naxon and Corr played best for the victors. Wright, McCreary and Roope excelled for the losers.

As a result of yesterday's games, Sigma Alpha Epsilon, Phi Delta Theta, Delta Tau Delta, and Alpha Sigma will enter the semi-finals. These games will be played this afternoon. The Deltas and the Alpha Sigs clash at five o'clock, and the Phi Deltas meet the Sig Alphas at six. The winners will battle for the championship tomorrow.

**THE FIRST SIGN OF
SPRING OR WHY HATS
MAKE THE WOMAN**

(Continued from Page One.)
Then there is the Hat Amorous, a delicious confection of Georgette crepe and ostrich feather fancies. It comes in several shapes and colors, according to whether the wearer is albino, blonde, medium-blonde, Titian, American brunette or Spanish brunette. It is guaranteed to bring at least one desperate love affair a season, and if worn at just the right angle, is practically certain to land a millionaire.

Third, there is the Hat Criminal, a small black straw shape coming down over one eye, and trimmed with a single cerise poppy. If the wearing of this hat is supplemented by the liberal application of a cerise lipstick, the wearer will find herself capable of any crime from forgery to murder.

**TRACKSTERS WILL
TRY-OUT TODAY**

(Continued from Page One.)
number now reporting.

The honor roll system is proving an efficient means of keeping a line on what each candidate is doing and also serves as an impetus to cause each man to do his very best and thereby win a place on the roll of honor. The exchange of lists with Missouri adds to the worth of the scheme as each school tries to outdo the other.

If the try-outs cannot be held today, Coach Schulte announces that they will be staged at two-thirty Saturday afternoon, rain or shine. All students interested in the success of Nebraska in the cinder sport are invited to be present at the athletic field at three o'clock this afternoon.

Don't make the mistake of trying to economize by buying cheap clothes.

Pay enough to get good clothes; then be sure you do. Get good tailoring, good fabrics, good style—clothes that will give you such lasting service that you'll not have to buy them so often. You'll find these things only in good clothes.

And you'll find them all in the New Farquhar Clothes for spring—at moderate prices—quality considered. You're probably interested in what young fellows will wear this spring. Come take a look at these clothes without any obligation to buy unless you're ready.
