

CORNHUSKERS ARRIVE IN NEW YORK READY FOR RUTGERS

(Continued from Page One)

In foot work to complete them. However, the workout was a decided success.

The Cornhuskers are in prime condition, and with no major injuries should put up a fine brand of football against Rutgers. Howarth, Dana and Schoepel are nursing slight bruises, but all should be in good shape by Tuesday.

Following practice the party dined at the Reynolds club on the commons of Stagg field, and thereafter broke ranks to visit friends for the next two hours. The Chicago-Ohio State game furnished entertainment during the rest of the afternoon. Both teams displayed good style.

Doctor Luehring and Captain Day are guiding the team in its progress enroute and judging by the morale of the team, they have been very successful. Other members of the Nebraska Cornhusker party are Dr. J. Lees, Dr. and Mrs. O. W. Everett, A. W. Godwin and E. C. Dinsmore.

FIVE HUNDRED ATTEND ALL-FRESHMAN RALLY

(Continued from Page One)

Hallowe'en colors by streamers, while pumpkins and cornstalks helped carry out the idea of the evening. The guests were met at the door by members of the reception committee, who passed out cards, on which the visitor wrote his name. The games and program which occupied the first hour of the evening were played for the purpose of acquainting members of the crowd with one another. Each guest was given fifteen minutes to find out and write down on a slip of paper as many names and home towns of those present as possible. "I've met more people in the last fifteen minutes," said one Freshman, "than I've met all year on the campus." The person having the most complete list was given a Hallowe'en prize.

Groups Furnish Stunts.

The first-year students were then divided into four groups, and each crowd gave a stunt. The winning stunt was an improvised play by William Shakespeare. As a reward, the winning group was allowed to have the first dance entirely to itself. A five-piece orchestra was so popular that almost the entire crowd remained until the very last.

Apples and pop corn balls were served to the guests during the evening. A large sign with the words "Class of 1924" was given a conspicuous place in the decorations.

The net proceeds of the party will be given to the Freshman treasury to help pay for the expenses of the Olympics contest, which were entirely borne by the first-year class.

ALUMNI FALL FROLIC BOOKED FOR FRIDAY

(Continued from Page One)

The program will close with a talk by President Pugsley of the Alumni club on the advisability of doing extensive work by committees during the year.

The entire program for the evening follows:

- Music and U. of N. songs.
- Review of political campaign by candidates themselves. President Pugsley presiding.
- "Why Everybody Voted for Me," W. G. Harding.
- "Why I am Elected," Jas. M. Cox.
- "Why the Socialists Won," Eugene Debs.
- "Behold Your Next President," Parley P. Christensen.
- Scurrilous newspaper dealing in ridiculous personalities distributed during meal by newsboys.
- Election returns.
- Football returns, Rutgers vs. U. of N.
- Demonstration by followers.
- Divide tags equally republican, democrat, socialist and farm labor party.
- Departs from Former Dinners.

For the past few years these alumni dinners have been more or less dignified affairs. This year begins a new era in alumni banquets. The name of the newspaper that will make its initial appearance during the evening is "The Yearly Shuck." A prize has been offered to the person present who can find a bit of truth in the ridiculous personalities in the publication.

Election returns will be given out at intervals during the evening. Dancing will follow the program. Returns from the Nebraska-Rutgers game which will be played at the Polo Grounds, New York City, November 2, will be given out. Charles Pugsley, president of the Alumni club will preside at the affair.

Tickets for the banquet may be obtained from the University faculty and from Miss Annis Chaiken at Alumni headquarters in Administration building.

NINE APPLICATION MADE TO NEBRASKA DEBATE LEAGUE

Abstracts and Bibliography Ready for Distribution to High Schools.

Nine new applications are in for membership in the Nebraska High School Debating League, the fourteenth annual contests of which will be on the proposition "That the literacy-test restriction on immigration should be repealed." Membership is increasing especially in the central part of the state. The new applications, announced Saturday by Prof. M. M. Fogg, president of the league, are as follows:

Aurora, Supt. J. L. Doremus; Blue Hill, Supt. C. L. Wescott; Clearwater, Supt. Noel Seney; Hebron Academy, Principal Wm. L. Young; Indianola, Supt. C. E. DeBord; Juniata, Supt. F. R. Fair; Schuyler, Supt. R. T. Frost; Western, Supt. G. W. Hildreth; York, Supt. A. W. Graham.

The central district, of which Supt. Don R. Leech, Friend, is the director, is the first one to report that the membership limit—eight—has been reached. A new district is likely to be formed to take care of other applicants in the center of the state. The central district schools will be Aurora, Clay Center, Friend, Geneva, Osceola, Sutton, Western and York.

Thirty abstracts of authoritative articles and books on the literacy test, together with Bibliography I, are being distributed by the Debating and Public Discussion Bureau of the University extension division of the University.

The annual meeting of the league will be held at Omaha, Thursday afternoon, November 4, at the conclusion of the meeting of the argumentation section of the State Teachers' association.

BABY INTERNATIONAL TO BE HELD ON NEXT FRIDAY

College of Agriculture to Stage Stock Show in Judging Pavilion this Week.

Next Friday evening at 8 o'clock the Baby International will swing its doors open to the public. This show, given by students in the College of Agriculture, will be held in the judging pavilion, Farm campus, and will consist of an exhibition of some of the animals going to the big show at Chicago in December.

The Baby International is given with the purpose of exhibiting the live stock and of giving students an opportunity to fit live stock for show purposes. More than forty students are taking part in the contest. In addition to the twelve classes which will be exhibited, a special class of Shetland ponies will be shown. For this class girls have been selected.

Entertainment, consisting of an orchestra and special features, will lend variety to the program. Extra seats will be provided at the ends of the pavilion, thus giving capacity for four hundred spectators. Prizes will be awarded the students who exhibit the best fitted animal. Dr. Mac-Campbell, head of the Animal Husbandry department at Manhattan, Kans., will judge the classes. Only one class at a time will be exhibited. The price of admission is thirty-five cents.

Amanda Heppner Will Attend Advisers' Meet

Miss Amanda Heppner, Dean of Women at the University, goes to Omaha the first of this week to attend the alumni luncheon which is planned for Thursday noon at the Rome Hotel. Friday afternoon she will attend a meeting of the advisers of women of all the state normal and high schools.

WANT ADS.

- MODERN rooms, good heat and privileges. L6630. 5t
- WILL the man who took or exchanged overcoats at the Saratoga recreation parlors last Saturday night be so kind as to call L5608 and exchange with the other coat owner. He will give you \$5 for your kindness. 4t
- BLACK leather, loose leaf notebook taken from east window in Armory between 11 and 12 o'clock Monday. Will person who took it return it to Student Activities office immediately? 206 U Hall. 5t
- FOR SALE—Gibson mandolin and case, as good as new, worth \$75, will take \$40. Call L8219. 5t

Laws Preparing For Engineer Grid Game

The Laws are holding football practice daily in anticipation of the coming clash with the Engineers. They were able to turn out three full teams and among the players there is some excellent football material. They expect to be in good form by Saturday, November 6, the day scheduled for the decisive game. The band will be on the field and a large attendance is expected. The Laws will meet immediately before the game and attend in a body, thus encouraging their team to victory by organized cheering.

The game is expected to be interesting and exciting for both colleges have been preparing for some time. The score promises to be close.

LAW REQUIREMENTS ANNOUNCED FRIDAY

Faculty Outlines Plans for Second Semester—Class Schedule Given Out.

Requirements of the Law College were changed and other plans for the second semester were mapped out at a meeting of the Law College faculty October 27.

It was decided that (1) a student who, from any cause, has missed 20 per cent of class exercises in any courses during a semester shall receive no credit in the course, and a student who has missed 20 per cent of all class room exercises in his enrolled classes shall receive no credit for work during the semester except upon petition approved by the faculty.

(2) A student who has a total in all courses of five or more unexcused absences must present a thesis upon a topic assigned by the dean. Such thesis is to contain not less than two hundred words for each absence and is to be submitted at the next examination period. No credit is to be given until such thesis has been accepted.

(3) No person shall be admitted as a regular student and as a candidate for a degree, who has less than one year of college in addition to full entrance credit. "One year" shall be interpreted as thirty semester hours, with the exception that a student may be admitted upon condition if he shall have twenty-eight semester hours of work in Nebraska University or its equivalent.

Entrance Conditions. (4) Entrance conditions shall not be made up during the law school year, and shall be made up within one year from entrance to the college, except that the faculty may, upon petition, authorize a further period.

(5) A student who shall fail to pass in more than eight hours of his work in this college at any examination period or who in the opinion of the faculty is unsatisfactory in one-third of his work shall not be admitted to classes for a period of six months except upon petition and consent of the faculty.

(6) Credit shall be given for the following subjects:

Contracts	8
Torts	6
Pleading	6
Property	6

In contracts, if two hours per week are given in the first semester, and four the second, three hours credit shall be allowed for the first semester and five for the second. Presence at general lecture will be required.

(7) The faculty of Arts and Science College are requested to increase the amount of law hours to be credited towards an A. B. degree from twenty-four to thirty-two.

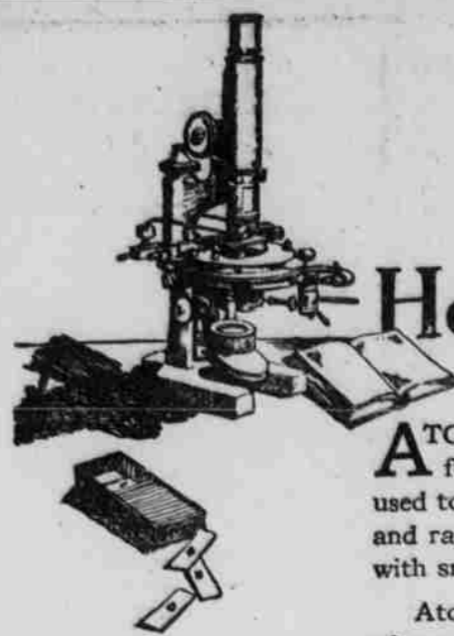

(8) Mid-semester examinations shall be given to first-year class. The examination will consist of one examination by each instructor in each subject.

(9) The schedule for the second semester as outlined be approved.

(10) "Twenty per cent rule." To obtain his degree a student must have attained an average grade of 70 or having an average grade of 70 before 1919-1920 he must have not less than 80 per cent of his work since then 70 or above.

Professor Ivey Will Speak to Omaha Men

Professor Paul W. Ivey of the College of Business Administration will deliver a series of fifteen lectures, one every Tuesday evening, before Omaha business men, on "Salesmanship." Regent Webster of the University is the chairman of a committee of the Omaha Chamber of Commerce and is in charge of these talks, which are to be given under the auspices of that organization. The lectures will form a part of the University's extension program.

How Large is an Atom?

ATOMS are so infinitesimal that to be seen under the most powerful microscope one hundred million must be grouped. The atom used to be the smallest indivisible unit of matter. When the X-Rays and radium were discovered physicists found that they were dealing with smaller things than atoms—with particles they call "electrons."

Atoms are built up of electrons, just as the solar system is built up of sun and planets. Magnify the hydrogen atom, says Sir Oliver Lodge, to the size of a cathedral, and an electron, in comparison, will be no bigger than a bird-shot.

Not much substantial progress can be made in chemical and electrical industries unless the action of electrons is studied. For that reason the chemists and physicists in the Research Laboratories of the General Electric Company are as much concerned with the very constitution of matter as they are with the development of new inventions. They use the X-Ray tube as if it were a machine-gun; for by its means electrons are shot at targets in new ways so as to reveal more about the structure of matter.

As the result of such experiments, the X-Ray tube has been greatly improved and the vacuum tube, now so indispensable in radio communication, has been developed into a kind of trigger device for guiding electrons by radio waves.

Years may thus be spent in what seems to be merely a purely "theoretical" investigation. Yet nothing is so practical as a good theory. The whole structure of modern mechanical engineering is reared on Newton's laws of gravitation and motion—theories stated in the form of immutable propositions.

In the past the theories that resulted from purely scientific research usually came from the university laboratories, whereupon the industries applied them. The Research Laboratories of the General Electric Company conceive it as part of their task to explore the unknown in the same spirit, even though there may be no immediate commercial goal in view. Sooner or later the world profits by such research in pure science. Wireless communication, for example, was accomplished largely as the result of Herz's brilliant series of purely scientific experiments demonstrating the existence of wireless waves.

House of Youth

Youth and Beauty Are Lessons Not Learned in Books

No brain-racking tests, no wearisome theses—but a simple, enjoyable lesson every girl should learn—the wholesome, gentle art of personal attractiveness, and the important part FASHION plays in its acquirement.

For beautiful attire is to youth what the setting is to the jewel, the fragrance to the rose, the rhythm to the song. It is that branch of your education which becomes an innate part of yourself and expresses your individuality to your associates. It may determine your success—it can shape your destiny. Never underestimate the value of beautiful attire.

"House of Youth" Suits and Coats are standards in artistic fashion for the younger set. In them are embodied all those delightful fancies of youth, fraught with a fineness of execution wholly unique—suits and coats of beauty—EXCLUSIVE BUT NOT EXPENSIVE.

If you desire more information write us for information where they may be obtained.
