N. STORY HARDING, Managing Editor Gregg McBride News Editor for this issue.

THE AWGWAN DESERVES SUPPORT OF STUDENT BODY.

The biggest publicity agent of Harvard outside of its athletic teams is its comic monthly magazine, "The Harvard Lampoon." Cornell University's "Cornell Widow," is a factor which has put Cornell in the foremost rank. The "Iowa Frivol," "California Pelican," "Carolina Tar Baby" and numerous other college comics have had the power, through their extensive circulation throughout the country, and the cleverness of their columns, to put their respective schools in the limelight. Any and all of these comics have been the biggest factor of free advertising that the universities could obtain.

In the last few weeks, the "Awgwan" has received communications from "Topics of the Day," "Fox News" and "Universal Current Events," stating that from the columns of the "Awgwan," they have taken the liberty to quote humorous clippings and jokes. This in itself is a tremendous advertisement to the University. Last year in the "Judge" College Wits Contest, "Awgwan" scored twice and throughout the country "Awgwan" is a familiar name, and with it is connected the University of Nebraska.

Out of an approximate five thousand students, the school subscription to "Awgwan" is but eight hundred copies. The "Awgwan" must have more subscriptions and support or it will die out.

LEAGUE OF NATIONS NOW IN SESSION AT GENEVA.

The League of Nations is not scrapped, dead, or deceased. To some this may not be evident—because we have heard and read continued reports of the death of the League. The League of Nations is now assembled at Geneva in its first formal assembly. And the only citizens that will be able to keep their confidence in Hiram Johnson's and Lodge's assurance that the League is deceased will be those who refuse to read the city papers this week.

Great Britain has sent a hundred diplomats, Japan is represented by the diplomat Baron Hayashi and a numerous suite, and Lord Cecil, one of the founders, is on hand in behalf of South Africa. Outside of the nations which fought on Germany's side, no important country is unrepresented save Mexico and the United States. Germany and her allies are now desirous of gaining admittance into the League. It doesn't seem feasible that these nations are going to a large expense in sending their delegates to a League that is dead, deceased, and buried.

It is true that America does not have to belong to any League of Nations—but if it belongs to any it will have to be this one. Does anyone believe that forty nations, each one of which thinks it is capable of thinking as wisely as America are going to undo their work just to please the United States?

Politicians for the last year have spun leagues out of their own small imaginations, in order to force the League of Nations issue. Now that the election is over, we should be able to understand that if we are to join the league partnership of nations, that we cannot dictate all the terms, because such a league would not then be a partnership, but an autocracy.

IF DREAMS COME TRUE.

If the dreams of government chemists come true the straw stacks on the farms will prove the solution for the increasing shortage of gasoline. In the west where straw stacks are the most abundant, government chemists are now conducting experiments in the destructive distillation of wheat straw into fuel suitable for use in heating and driving internal combustion engines. The process used in the past is too expensive to

make the fuel commercially profitable, but it is hoped that it will be produced at a lower cost than the present price of gasoline. It has been proven, according to reports on file, that one ton of straw will produce forty gallons of fuel. On the basis of the estimated straw crop for this year Nebraska would alone produce thirty-five million gallons. And Nebraska is only one in a galaxy of states that grows wheat.

It is therefore the dream of the chemists that the day will come when the American farmer will have his own still to turn his straw, now worthless, into fuel to drive his automobile, and other farm machinery. It has been conservatively estimated that Nebraska farmers have been wasting much of their straw, which contains twelve dollars additional gross revenue.

If the dreams come true, the country will point the way to "every farmer his own automobile fuel producer." The straw stack produced the fodder for the yoke of oxen—the motive power of our pioneer days. It is therefore fitting and in harmony of progress, that it should feed the modern method of locomotion.

PROCRASTINATION—AN EVIL.

Putting things off is one of the greatest evils of college life. The student who decides to do his work on the morrow, to make up his back work at the same time he is going ahead with advance work, and who crams for examinations, is a victim of this evil. It is almost as fatal to put off one's study as it is to skip an examination. It is essential that a student put the most of his effort and ability into getting his lessons. That is what he is here for. That is what he is sent or allowed to come here for. That is what the University was built for, to attend to the intellectual needs of the youths of the state. So with this great institution, the elaborate preparations for hard and earnest work, the effort and self denial of home folks in order that he may attend college, the student who fails to do his work, to do his duty as it were, is a criminal. And the student who fails is the one that puts off doing his work until it is too late. Efficiency is not an inherent power. Efficiency is acquired by evolution. It is the outgrowth of effort, of concentration, of self sacrifice, of vigilance and its greatest factor the power of doing things when they should be done. The movie, the dance, the vaudeville, the car ride, the little game of cribbage, the evening spent in gossip or on a date, all tend to destroy efficiency. They take one's mind from his studies tearing down his power of concentration. They lead him to be extravagant and overcome any tendency to sacrifice anything that would interrupt his pleasure. They slacken up his effort to derive benefit from his work and lead him to think that there is more to get from pleasure than from books. His power of observation is dimmed, his mind loses its interest in school. He is a victim to procrastination. Then is the movie, the vaudeville, the dance, the little game and the date a nuisance and a hindrance to a college student. Relaxation is necessary. It is not necessary that a student make a bookworm of himself and avoid any touch with the above but they must be used as a relaxation by a mind of good, well balanced judgment and not made an habitual nuisance. Their tendency is to make one "put off until tomorrow" the things which should be done now. A balanced ration of work, sleep and entertainment is necessary. An overdose of any of the three is fatal in some way to the college student.

He was teaching her Arithmetic; He said it was his mission; He kissed her once, he kissed her twice, and said, "this is addition;" And on he added, smack by smack, in silent satisfaction. She timidly gave him one back and said, "now that's subtraction." Then he kissed her and she kissed him without an exclamation; And then they both together said "That is multiplication." But dad appeared upon the scene, and snorted in derision; He kicked "poor him" three blocks away, and said, "that's long division."

Fond father: "How is my son getting along in school?" Principal: "He's, halfback on the football team and all the way back in his studies."

Hungry History Pupil (near lunch time): "The soldiers had a hard time until the refreshments (reinforcements) came."

M. in History class: "An infantry is a place where babies are kept."

UNI NOTICES

Delian.

Open meeting Friday night in Faculty Hall. Professor Bengston will give an illustrated talk on Central America. Also music and games. The student body is cordially invited.

Union.

The regular Union program and evening of games will be open for all students Friday. The fun starts at 8 o'clock.

Y. M. C. A. Forum.

Professor Cochran leads the discussion at the Y. M. C. A. Forum tonight, at 5 o'clock in the Y. M. C. A. social room. The subject will be "Is Patriotism Compatible with Christianity?"

Locker Notice.

Men who have been assigned lockers in the gymnasium locker room and who are not using them can rent them for the remainder of the semester by calling at Dr. Clapp's office, G 206.

Menorah Society.

A regular open meeting of the Menorah Society will be held in Faculty Hall next Sunday at 7:30 p. m. Everybody is welcome.

Phi Delta Phi

Phi Delta Phi will meet at the Acacia house, 6 o'clock Thursday evening, November 18.

Cornhusker Song Book Committee. A meeting of the Cornhusker Song Book committee will be held in Law 107, Thursday, 4 p. m.

Commercial Club Men.

The Commercial Club meets this week at 11 a. m. Thursday, room 305, Social Science building. Mr. J. L. Robb, secretary of the Western Storage Battery company of Lincoln, will talk on "Service." Some advance "dope" will be given by the committee on the next big event of the club.

W. S. G. A. Board.

W. S. G. A. Board will meet in Ellen Smith Hall, 5 o'clock Friday.

Varsity Dairy Club.

Varsity Dairy Club meeting, November 18, 7:30 p. m., Agriculture Hall, room 306. There will be an interesting program consisting of talks by the members of the dairy judging team, a debate, and music by School of Agriculture orchestra. Business meeting immediately following the program. Everybody welcome.

Pre-Medic Society.

There will be a meeting of the Pre-Medic Society Thursday evening at 5 o'clock in Bessey Hall.

Christian Science Society.

The Christian Science Society of the University meets Thursday evening at 7:30 in Faculty Hall, Temple building. All students, alumni and faculty are cordially invited to attend.

Palladian.

All members will meet at 8 o'clock Friday evening in closed meeting for initiation.

Twin's Club.

Twin's Club will meet at 1201 South Eleventh street, Friday, November 19, 8 p. m., for the first social meeting of this school year. Twins, new at the University, most cordially invited.

Pi Kappa Phi fall party, Lincoln hotel.

SUNDAY, NOVEMBER 21.

Menorah Club meeting, 8 p. m., Faculty Hall.

ILLINOIS DEDICATES MEMORIAL CHIMES AT HOMECOMING

The dedication of the senior memorial chimes was the most impressive ceremony at the 1920 Homecoming celebration at Illinois. The largest bell is dedicated to President James James; the second is hung in the memory of the men of the United States School of Military Aeronautics which was established at the University during the war. The chimes are the gift of the graduating classes from 1914 to '21.—The Daily Cardinal.

ROCKED TO SLEEP

An old darkey went to the judge and wanted to have his wife arrested for rocking him to sleep.

"Why, man," said the judge, "you can't have your wife arrested for rocking you to sleep."

"That's all right, judge," replied the darkey, "but you should have seen the rock."
