

OMAHA DAY PROVIDES ATTRACTIVE PROGRAM TO INTEREST STUDENTS
(Continued from Page 1.)

visited the students of the University of Nebraska to visit its industrial plants, art galleries, schools, and other places and objects of great educational value and interest, on Friday, May 6.

"This invitation will be accepted and the day declared a holiday, provided the students show a sufficient amount of interest to make it worth while.

"In addition to the educational features offered, the Commercial Club of Omaha will also offer entertainment through the day and evening that will make the day one of intense pleasure, as well as of profit.

"If this invitation is to be accepted by the students, they should make their decision known at the very earliest opportunity, and through means offered by the members of the Omaha Club."

Sincerely yours,
CARL C. ENGBERG,
Law.

"If you know a man and he is a good man, you will like him. If you like him and secure his friendship, you have created a new and valuable asset for both. Omaha needs the University and the University needs the metropolis. No Omaha office should look elsewhere than to the graduates of this school for its new blood. No graduate should overlook the opportunities of Omaha. A strong school should get acquainted with a vigorous city. Omaha day is the time to lay the foundations of a better mutual understanding and appreciation. It is an investment in the future which we can not afford to neglect."

WARREN A. SEAVEY,
Engineers.

"Omaha day offers the University student an opportunity not given by any other day of the year. Our metropolis opens its doors to us, invites us in and liberally provides for our entertainment. And the city is not narrowly limited in its material from which to make a program. Even a glance at the list of trips planned gives one a new appreciation of the occasion and the efforts of those who have developed it.

"Engineers will have some difficulty in making their choice from among the various possibilities. Let me emphasize that there are both engineering and non-engineering places to be visited. The broad-minded engineer is very much interested in many things which do not pertain to his own daily work. Why not take advantage of this chance to visit something of this kind? Human activities and human production are represented by all the fields open. An engineer is interested in what men do, in what men think, and in what men are. My advice is that you go to Omaha on Omaha day,—and that you join a group whose trip will take you into new surroundings and give you new things to think about and to evaluate."

O. J. FERGUSON,
Business Administration.

"Let us have another Omaha day by all means. I am sure that all the instructors and students who were there on previous occasions, have grateful memories of Omaha's hospitality. I like to think of the joyous reception we have always had. The fine picnic luncheon at the auditorium the first time we went, and the excellent luncheon at the stock yards on the second occasion, when we had many good things to eat, including some incomparably tender juicy roast beef, are notable events in my life.

"Students of the College of Business Administration, of course, will be interested in something more than luncheons, suppers, and dances, as they will be eager to improve their minds by looking into the various phases of industrial and commercial life in the business capital of Nebraska. They should really spend a week in Omaha, but in a single day, under competent direction, they can see and learn a great deal."

DEAN LeROSSIGNOL,
Arts and Sciences.

"Omaha day has become a tradition in this University. And the tradition is a worthy one, not only as it offers the opportunity to the student to study the institutions and life of the state metropolis, but also as it enables the people of Omaha to become acquainted with the University.

"There are many reasons why the trip should be of interest to the students in the College of Arts and Sciences. There are smelters and packing houses for the more strenuous

The parks and boulevards, city hall, and schools may stir the interest of others whose minds are of softer fibre.

"It is a day's holiday with a deal of genuine and practical interest; and all this at a cost not to exceed the price of a scant handful of weekly movies or lunches.

"You cannot afford to miss it."
P. M. BUCK, JR.,
Dean.

Chemistry.

"The trip to Omaha on Omaha day, May 6, will offer an opportunity to students interested in Chemistry to visit a number of large commercial laboratories; such as the laboratory of the United States Smelting and Refining Co., The U. P. Testing Laboratory, Laboratories of the Packing Houses and a number of others. All students majoring in Chemistry are urged to take advantage of the opportunity to visit one or more of these laboratories. There will be a number of desirable trips arranged."

FRED W. UPSON,
Chairman, Dept. of Chemistry.

Dentistry.

"Omaha day has come to be regarded as almost a part of the course in an educational way.

"If the trip is to be taken wholly as a day of recreation, it will not be of as much value to you as it will if you take advantage of the many trips provided for your education.

"In addition to the general trip planned, it would be well for the Dental students to visit our own College of Medicine, the Dental College of Creighton University, and the dental supply houses of Omaha. There are also magnificent private dental offices in Omaha which are of interest to all prospective dental practitioners."

W. CLYDE DAVIS,
Agriculture.

"Omaha day will give an opportunity for students of the Agricultural College to visit a number of notable agricultural industries located in Omaha. Among these are the stockyards and packing industry, the creamery industry, the grain exchange, the alfalfa mills, and the agricultural implement houses. It would be difficult to find in any leading city in the United States lines. The city of Omaha is justly proud of its commercial development and offers this opportunity for students to secure detailed information along any of the lines in which they may be specially interested."

E. A. BURNETT,
Pharmacy.

"I strongly urge all students in the College of Pharmacy to make the trip to Omaha on May 6th. Places of special interest to students of Pharmacy are the glandular extract department of Armour & Co., the soap and glycerine factory of Cudahy & Co., the manufacturing department of the House of Gehring, the wholesale drug houses and the compounding departments of the Sherman & McConnell retail stores. In addition there are many other educational features of such a trip that are well worth while the time and money invested. The pre medics will be entertained the greater part of the day in the University Hospital and the College of Medicine. No pre medic can afford to miss this trip."

R. A. LYMAN, Dean.

DRAKE RELAY TRYOUT IS HELD YESTERDAY
(Continued from Page 1.)

squad. The numeral roll is growing daily and now has a total of seventy names on the list. Thirty-one of the

men on this list have already won their numerals and the remainder of the men have points toward winning theirs.

The ticket sale for the track season is not going like Coach Schulte had planned and he is very much disappointed in the outcome. In an interview yesterday Coach Schulte was very free in expressing his ideas about the matter. "If Nebraska is to have a real track team and to have outside competition that the track squad here merits the school as a whole will have to get back of the team and push. We have one of the greatest track squads in the country and if we are to be known we will have to participate in the Penn games and some of the other big meets of the year. We cannot do this if the student body will not support us. I have placed on sale two thousand season tickets for one dollar apiece and if a student body of four thousand or more students cannot buy up this small number at such a low price, I feel there is something wrong somewhere." This was the manner in which Coach Schulte expressed himself yesterday.

The ticket campaign will continue up until Saturday night and the girls of Nebraska have one of the best chances they ever had to show that they are behind the track squad, and Coach Schulte is making this a banner year for Nebraska in the cinder path sport.

UNIVERSITY BAND HOLD INITIATION

The University of Nebraska Band held its annual initiation and banquet Wednesday evening. The initiation was held in the Chapel from 4:30 to 6 o'clock, and twenty-eight new men were taken into Alpha chapter of Gamma Lambda, the new national college band fraternity. Gamma Lambda was founded at the University of Nebraska in the spring of 1920, and several chapters have been installed in other universities. It is the only national college band fraternity and it is expected that in the near future chapters will be granted to a number of the stronger college bands throughout the colleges of the country.

Following the initiatory ceremonies the banquet was held in the Blue Room of the Y. M. C. A. which was decorated with the fraternity colors, blue and white. President Herman Schroeder called upon a number of the new and old members for toasts.

A GOOD JOB DURING VACATION

with the

OTTAWA MANUFACTURING CO., Ottawa, Kans.

The Ottawa Manufacturing Co. is one of the very largest advertisers of farm necessities in this country. We desire the services of a few good salesmen and saleswomen to start now, or when school closes. Work during vacation or permanent. Write at once. State your qualification fully. This is a rare opportunity.

SALES MANAGER, THE OTTAWA MFG. CO., Ottawa, Kans.
