## THEORISTS CHANGE TO PRACTICAL ATTORNEYS IN NEBRASKA COLLEGE OF LAW IS CLAIMED BY THE LAWS.

(Continued From Page One.)  
 the many things they have learned in the lecture rooms and library.  
 Underclassmen are chosen as parties to the suits, and as jurors. Seniors act as counsel. Professor Geo. N. Foster is the judge. During the year trials of all varieties are ground thru this tribunal. One day may see an action in justice court, wherein "A" seeks to collect thirty-five dollars from "B", for an overcoat lost from "B's" check room; the next, may witness Joe Pizar suing the traction company, in district court, for damages caused when a car hit Joe, he having had his head stuck in a hole in a sandpile near the track.  
 Whatever the case, and regardless of any amusement it may afford the participants or the audience, the lawyers involved reap the same harvest of experience. They must prepare and file the same papers, must find and learn to propound the same principles of law as if they were in a real court. Here they learn to control the "rude and unprofitable mass" knowledge, and turn it into wisdom.

## NEWS OF THE DAY

**Oregon Team to Honolulu.**  
 SAN FRANCISCO, Dec. 1.—University of Oregon's football team sails from here December 14 for Honolulu to play the University of Hawaii and a team of all stars during the Christmas holidays. Last year the University of Nevada made the Christmas trip to the Islands.

**Western Trip up to "Big Ten."**  
 IOWA CITY, Ia., Dec. 1.—The board of athletics at the University of Iowa met here last night with Dr. William Buffield of Los Angeles for the purpose of discussing the probabilities of Iowa participating in a football game at the Tournament of Roses at Pasadena, Calif., New Year's day.  
 Little is known of what the purpose of the Californians' visit was but the board came out flatfooted and passed a resolution against the proposed trip.

It is expected by athletic followers here that the question of whether Iowa will play California will really be decided at the meeting of the "Big Ten" officials at Chicago, December 2 and 3.

**Husker Swimmers vs. Omaha A. C.**  
 OMAHA, Nebr., Dec. 1.—A dual swimming meet between the University of Nebraska team and the Omaha Athletic club will be held here January 29.  
 The events in which the teams will contest are the 200-yard relay, 50-yard free style, 100-yard back stroke 220-yard free style and fancy diving from the low board.

## ENGINEERS HEAR NOTED DESIGNER

(Continued From Page One.)  
 uses determined at one place may be wholly inapplicable at some other place though the kinds of materials may be termed the same. In all determinations, due regard must be made as to economic conditions but also consideration must be made as to safety. In large ornamental buildings like our capitol there should be no chance left or settling, with the resultant creation of unsightly cracks to mar the beauty of the edifice.  
 Mr. Jarrett went into some detail as to the peculiar subsoil conditions met in our most important cities and gave some very interesting methods which have been used for the sinking of proper foundations in the various localities. He also spoke at length as to the hydro-electric development in the west giving special attention to the foundations of the large masonry dams which must be constructed for the compounding of water for these enterprises. These often present some very difficult problems especially on the western coast.  
 He ended his talk by relating an experience which happened to him while working in New York on the foundations for the Singer building. The steam to run the compressors which furnished air to the pneumatic caisson was cut off and thus the air pressure was lost while passing thru quicksand, and this would allow the caisson to run into the caisson. Quick work and decision was necessary but the difficulty was overcome by filling the caisson with water thus balancing the hydrostatic pressure without the pit.

He ended his talk by relating an experience which happened to him while working in New York on the foundations for the Singer building. The steam to run the compressors which furnished air to the pneumatic caisson was cut off and thus the air pressure was lost while passing thru quicksand, and this would allow the caisson to run into the caisson. Quick work and decision was necessary but the difficulty was overcome by filling the caisson with water thus balancing the hydrostatic pressure without the pit.
